

Mahatma Education Society's

Pillai College of Engineering

(Autonomous)

Affiliated to University of Mumbai

Dr. K. M. Vasudevan Pillai's Campus , Sector 16, New Panvel – 410 206.

Department of Electronics & Computer Science

Syllabus

of

B.Tech. in Electronics & Computer Science

for

The Admission Batch of AY 2021-22

First Year - Effective from Academic Year **2021-22**

Second Year - Effective from Academic Year **2022-23**

Third Year - Effective from Academic Year **2023-24**

Fourth Year - Effective from Academic Year **2024-25**

as per Choice Based Credit and Grading System

Mahatma Education Society's

Pillai College of Engineering

Vision

Pillai College of Engineering (PCE) will admit, educate and train a diverse population of students who are academically prepared to benefit from the Institute's infrastructure and faculty experience, to become responsible professionals or entrepreneurs in a technical arena. It will further attract, develop and retain, dedicated, excellent teachers, scholars and professionals from diverse backgrounds whose work gives them knowledge beyond the classroom and who are committed to making a significant difference in the lives of their students and the community.

Mission

To develop professional engineers with respect for the environment and make them responsible citizens in technological development both from an Indian and global perspective. This objective is fulfilled through quality education, practical training and interaction with industries and social organizations.

Dr. K. M. Vasudevan Pillai's Campus , Sector - 16, New Panvel – 410 206

Department of Electronics & Computer Science

Vision

To produce professionally competent and socially responsible engineers capable of working globally.

Mission

To provide in-depth quality education in Electronics & Computer Science Engineering and prepare the students for lifelong learning.

To develop professional engineers who can critically and creatively apply the knowledge of engineering principles to solve real world problems.

To inculcate entrepreneurship skills and impart ethical and social values.

Program Educational Objectives (PEOs):

- I. Graduates will have the ability to apply engineering knowledge and skills to provide solutions to real world technical problems.
- II. Graduates will be successful as engineering professionals, innovators or entrepreneurs with a multidisciplinary approach contributing towards research and technological developments.
- III. Graduates will have the ability to pursue higher education in Electronics Engineering, Computer Science and allied streams.
- IV. Graduates will function in their profession with social awareness and responsibility while maintaining ethical standards.

Program Outcomes:

Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/Development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis, and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling of complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project Management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognized the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs):

Engineering Graduates will be able to

1. Gain knowledge and skills to analyse and design Electronics circuits as well as Computer Programs.
2. Develop hardware and software systems in the areas like Artificial Intelligence & Machine learning, Big Data, Information Security, Automation, Embedded Systems, Signal Processing and Communication Systems.
3. Apply modern Electronics and Computer engineering techniques and tools to find solutions for real life interdisciplinary problems.

The Autonomous status of the institute has given an opportunity to design and frame the curriculum in such a way that it incorporates all the needs and requirements of recent developments in all fields within the scope of the Technical education. This curriculum will help graduates to attain excellence in their respective field. The curriculum has a blend of basic and advanced courses along with provision of imparting practical knowledge to students through minor and major projects. The syllabus has been approved and passed by the Board of Studies.

Outcome based education is implemented in the academics and every necessary step is undertaken to attain the requirements. Every course has its objectives and outcomes defined in the syllabus which are met through continuous assessment and end semester examinations. Evaluation is done on the basis of Choice Based Credit and Grading System (CBCGS). Optional courses are offered at department and institute level. Selection of electives from the same specialization makes the student eligible to attain a B. Tech. degree with respective specialization.

Every learner/student will be assessed for each course through (i) an Internal/Continuous assessment during the semester in the form of either Practical Performance, Presentation, Demonstration or written examination and (ii) End Semester Examination (ESE), in the form of either theory or viva voce or practical, as prescribed by the respective Board Studies and mentioned in the assessment scheme of the course content/syllabus. This system involves the Continuous Evaluation of students' progress Semester wise. The number of credits assigned with a course is based on the number of contact hours of instruction per week for the course. The credit allocation is available in the syllabus scheme of each semester.

The performance of a learner in a semester is indicated by a number called Semester Grade Performance Index (SGPI). The SGPI is the weighted average of the grade points obtained in all the courses by the learner during the semester. For example, if a learner passes five courses (Theory/labs./Projects/ Seminar etc.) in a semester with credits C₁, C₂, C₃, C₄ and C₅ and learners grade points in these courses are G₁, G₂, G₃, G₄ and G₅ respectively, then learners SGPI is equal to:

$$SGPI = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4 + C_5G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

The learner's up to date assessment of the overall performance from the time s/he entered for the programme is obtained by calculating a number called the Cumulative Grade Performance Index (CGPI), in a manner similar to the calculation of SGPI. The CGPI therefore considers all the courses mentioned in the scheme of instructions and examinations, towards the minimum requirement of the degree learners have enrolled for. The CGPI at the end of this semester is calculated as,

$$CGPI = \frac{C_1G_1 + C_2G_2 + C_3G_3 + \dots + C_i * G_i + \dots + C_nG_n}{C_1 + C_2 + C_3 + \dots + C_i + \dots + C_n}$$

The Department of Electronics & Computer Science offers a B. Tech. programme in Electronics & Computer Science. This is an eight semester course. The complete course is a 163 credit course which comprises core courses and elective courses. The elective courses are distributed over 8 specializations. The specializations are:

1. AIML
2. Robotics
3. Data Analytics
4. System Security
5. High Performance Computing
6. Cloud Computing
7. VLSI Design
8. IOT

The students also have a choice of opting for Institute level specializations. These are

1. Business and Entrepreneurship
2. Bioengineering
3. Engineering Design
4. Art and Humanities
5. Applied Science
6. Life Skills, Repair, Maintenance and Safety

As minimum requirements for the credits to be earned during the B.Tech in Electronics & Computer Science program, a student will have to complete a minimum of three specializations of which two are to be chosen from the department list and one has to be from the Institute level specialization list. In order to complete each specialization, a minimum of three courses under that specialization has to be completed. The credit requirement for the B.Tech. in Electronics & Computer Science is tabulated in Table 1.

Structure of Undergraduate Engineering program

Sr. No.	Category	Breakup of ECS Credits
1	Humanities and Social Sciences including Management courses	9
2	Basic Science courses	26
3	Engineering Science courses including workshop, drawing, basics of electrical/mechanical/computer etc	20
4	Professional Core Courses	61
5	Professional Elective Courses	24
6	Open subjects – Electives from other technical and /or emerging subjects	9
7	Project work, seminar and internship in industry or elsewhere	15
8	Mandatory Courses [Environmental Sciences, Induction Program, Indian Constitution, Essence of Indian Traditional Knowledge]	(non-credit)
	Total	164

Semester-wise Credits and Marks

Sr. No.	Semester	Credits Assigned	Marks Assigned
1	I	18.5	675
2	II	21.5	750
3	III	23	800
4	IV	24	825
5	V	21	725
6	VI	22	750
7	VII	20	710
8	VIII	14	400
Total Credits & Marks		164	5635

Preface by Board of Studies in Electronics & Computer Science

Dear Students and Teachers, we, the members of Board of Studies Electronics & Computer Science, are very happy to present the B.Tech Electronics & Computer Science syllabus effective from the Academic Year 2021-22 . We are sure you will find this syllabus interesting, challenging, and up to date to fulfill specific needs and expectations.

The Electronics and Computer Science discipline combines two important disciplines of engineering: Electronics and Computer Science. The syllabus focuses on providing a sound theoretical background as well as good practical exposure to students in the relevant areas. It is intended to provide a modern, industry-oriented education in Electronics & Computer Science. Its primary goal is to offer a contemporary and industry-centric education, preparing individuals to effectively meet the global demands of the field.

The syllabus is meticulously crafted to align with the vision and mission of the Electronics & Computer Science Department as well as the standards set by various accreditation agencies. It takes into account technological advancements, innovations, and industry requirements, ensuring that the curriculum remains up-to-date and relevant to the evolving landscape of the field.

The development of this syllabus involves a collaborative brainstorming session, which includes the participation of Heads of Department and senior faculty members from the Department of Electronics & Computer Science.

We express our sincere appreciation and gratitude to the faculty, students, industry experts, and all the stakeholders for their invaluable contributions towards the formulation of this syllabus. Their expertise, insights, and active involvement have been instrumental in shaping and refining the curriculum.

Board of Studies in Electronics & Computer Science

Science
(Semester I)

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 101	Engineering Mathematics I	03	02	-	03	01	-	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 101	Engineering Mathematics I	40	40	40	60	25	-	-	125

Course Objectives:

1. To develop the basic Mathematical skills of engineering students that are imperative for effective understanding of complex numbers in engineering subjects.
2. To acquaint students with the hyperbolic, logarithmic functions and Logic.
3. To understand differentiation and expansions of functions which will serve as basic tools for Specialized studies in many fields of engineering and technology.
4. To learn the partial differentiation techniques and its applications used in engineering problems.
5. To learn the applications of Matrices useful in engineering.
6. To provide hands on experience using SCILAB software to handle Mathematical modelling.

Course Outcomes: On successful completion of course learner/student will be able to

1. Apply the basic concept of complex numbers and use it to solve problems in engineering.
2. Apply the basic concept of Hyperbolic, logarithmic functions and Logic in engineering problems.
3. Apply the concept of expansion of functions, successive differentiation and vector differentiation in optimization problems.
4. Use the basic concepts of partial differentiation in finding the Maxima and Minima required in engineering problems.
5. Use the concept of matrices in solving the system of equations used in many areas of research.
6. Apply the concept of numerical Methods for solving the engineering problems with the help of SCILAB software.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1	Complex Numbers Pre-requisite: Review of Complex Numbers- Algebra of Complex Number, Cartesian, polar and exponential form of complex number. 1.1. De Moivre's Theorem.(Without Proof) 1.2. Expansion of $\sin n\theta$, $\cos n\theta$ in terms of sines and cosines of multiples of θ and Expansion of $\sin n\theta$, $\cos n\theta$ in powers of $\sin\theta$, $\cos\theta$ 1.3. Powers and Roots of complex number.	02 02 02

2	Hyperbolic , Logarithm functions and Logic 2.1 Introduction to Hyperbolic functions, Logarithmic functions, Separation of real and Imaginary parts. 2.2 Propositional logic, logical equivalence, Negation of given statement, predicates & Quantifiers, Normal form, mathematical induction	03 03
3	Successive Differentiation, Expansion of Function and Vector Differentiation Pre-requisite:- Derivative of standard functions and Rules of derivative. 3.1 Successive differentiation: nth derivative of standard functions. Leibnitz's Theorem (without proof) and problems 3.2 Taylor's Theorem (Statement only) and Taylor's series, Maclaurin's series (Statement only). Expansion of e^x , $\sin(x)$, $\cos(x)$, $\tan(x)$, $\sinh(x)$, $\cosh(x)$, $\tanh(x)$, $\log(1+x)$, $\sin^{-1}(x)$, $\cos^{-1}(x)$, $\tan^{-1}(x)$. 3.3 Vector function of scalar quantities, Vector operator ∇ , gradient, Grad Φ , Directional derivatives. Divergence and curl and their Physical interpretation.	02 02 02
4	Partial Differentiation and Applications of Partial Differentiation. 4.1 Partial Differentiation: Function of several variables, Partial derivatives of first and higher order. Differentiation of composite function. 4.2. Euler's Theorem on Homogeneous functions with two independent variables (without proof). Deductions from Euler's Theorem. 4.3 Maxima and Minima of a function of two independent variables, Lagrange's method of undetermined multipliers with one constraint. Jacobian of two independent variables.	04 02 03
5	Matrices. Pre-requisite: Inverse of a matrix, addition, multiplication and transpose of a matrix , Elementary row and column transformation 5.1. Symmetric, Skew- Symmetric, Hermitian, Skew Hermitian, Unitary, Orthogonal Matrices and properties of Matrices (Without Proof). 5.2 Rank of a Matrix using Echelon forms, reduction to normal form and PAQ form. 5.3. System of homogeneous and non -homogeneous equations, their consistency and solutions.	02 02 02
6	Numerical Methods 6.1 Solution of system of linear algebraic equations (1) Gauss Elimination, (2) Gauss Jacobi Iteration Method (3) Gauss Seidel Iteration Method 6.2 Solutions of Transcendental equations (1) Bisection method (2) Secant Method (3) Newton Raphson	03 03

DETAILED LAB SYLLABUS:

Sr. No.	List of Practicals
1	Basic Mathematical Operations, Functions and Introduction to Programming in Scilab
2	Basic operations on Matrices
3	Programing on Gauss Elimination Method
4	Programing on Gauss Jacobi Method
5	Programing on Gauss Seidal Method
6	Programing on Numerical Solution of transcendental Equations by Bisection Method
7	Programing on Numerical Solution of transcendental Equations by Newton Raphson Method
8	Programing on Numerical Solution of transcendental Equations by Secant Method
9	Programing on Maxima and Minima of functions

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Term Work Assessment:

General Instructions:

1. Batch wise practical's are to be conducted. The number of students per batch should be as per norms.
2. Students must be encouraged to write SCILAB Programs in the laboratory. Each Student has to perform at least 4 SCILAB practical's and at least 6 assignments on the entire syllabus.
3. SCILAB Practical's will be based on (i) Gauss Elimination(ii) Gauss Seidel Iteration method (iii) Gauss Jacobi Iteration Method (iv) Bisection method (v) Secant Method (vi) Newton Raphson (vii) Matrices (viii) Maxima and Minima.(At least four).

The distribution of Term Work marks will be as follows –

Attendance (Theory, Practical's)	:	05 marks
Assignments on entire syllabus	:	10 marks
SCILAB Practical's	:	10 marks

Books/References:

1. Higher Engineering Mathematics, Dr.B.S.Grewal, Khanna Publication
2. Advanced Engineering Mathematics, Erwin Kreyszig, Wiley Eastern Limited, 9thEd.
3. Advanced Engineering Mathematics, R. K. Jain and S. R. K. Iyengar, Narosa publication,
4. Matrices, Shanti Narayan, S. Chand publication.
5. Applied Numerical Methods with MATLAB for Engineers and Scientists by Steven Chapra, McGraw Hill .

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Avg.						
EC 102	Engineering Physics I	30	30	30	45	25	-	-	100	

Prerequisite: Physics of Std 11th, 12th

Course Objectives:

1. To impart knowledge of basic concepts in engineering physics and founding principles of technology.
2. To provide the knowledge and methodology necessary for solving problems in the field of engineering.
3. To develop scientific temperament for scientific observations, recording, and inference drawing essential for technology studies.

Course Outcomes: Upon successful completion of this course, the learner will be able to

1. Explain the limits of Classical Physics and apply the fundamentals of quantum mechanics to study the one dimensional motion of microscopic particles.
2. Apply the knowledge of superconductivity to SQUID and Magnetic levitation.
3. Able to understand fundamental concepts of classical optics and applications of interference in science and technology.
4. Analyse the intensity variation of light due to Polarization and its use in various applications
5. Comprehend the concepts of electrodynamics and Maxwell's equations and their use in telecommunication systems.
6. Apply the concepts of electromagnetism in focusing systems and CRO.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1.	Quantum Mechanics: De Broglie hypothesis of matter waves; properties of matter waves; wave packet, phase velocity and group velocity; Wave function; Physical interpretation of wave function; Heisenberg uncertainty principle; nonexistence of electron in nucleus; Schrodinger's time dependent wave equation; time independent wave equation; Free electron, Particle trapped in one dimensional infinite potential well, Quantum Computing.	06
2.	Superconductivity: Critical temperature, critical magnetic field, Meissner's effect, Type I and Type II and high T _c superconductors; BCS Theory (concept of Cooper pair); Josephson effect Applications of superconductors- SQUID, MAGLEV	02
3.	Thin Film Interference :	06

	Interference by division of amplitude and by division of wave front; Interference in thin film of constant thickness due to reflected and transmitted light; origin of colours in thin film; Wedge shaped film (angle of wedge and thickness measurement); Newton's rings Applications of interference - Determination of thickness of very thin wire or foil; determination of refractive index of liquid; wavelength of incident light; radius of curvature of lens; testing of surface flatness; Anti-reflecting films and Highly reflecting film.	
4.	Polarisation of Light: Introduction, polarisation of light, Representation of plane polarised light, partially polarised light, Production of plane polarised light by i) Reflection (Brewster's Law), ii) Refraction (pile of plates), iii) Double Refraction (Nicol Prism), iv) Selective Absorption (Dichroism), HWP, QWP, Optically active materials and their applications like polaroids, LCD.	04
5.	Electrodynamics: Scalar and vector fields, Cartesian, Cylindrical and Spherical Coordinate system, gradient, curl and divergence in Cartesian coordinate system, line integral, surface integral, volume integral, divergence theorem, Stoke's theorem, Maxwell's Equations.	04
6.	Electron Optics: Electrostatic focusing, Magneto static focusing, Cathode Ray Tube (CRT), Construction and working of CRO. Lissajous figures.	02

DETAILED LAB SYLLABUS:

Sr.no	List of Experiments
1	Determination of radius of curvature of a lens using Newton's ring set up
2	Determination of diameter of wire/hair or thickness of paper using Wedge shape film method and estimation of Young's modulus of the material.
3	Brewster's law (Polarisation of light by reflection through glass slab.)
4	To study the nature of polarisation of laser light using photocell and quarter wave plate (QWP)
5	Use of CRO for measurement of frequency and amplitude.
6	Determination of unknown frequency by Lissajous figures.

Theory Assessments:

1. **Internal Assessment:** Two Internal assessments will be conducted for 30 marks each with average marks of both assessments as final score.

2. **End Sem Theory Examination:**

In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

- Question paper will comprise of 4 questions, each carrying 15 marks.
- Question number 1 will be compulsory and based on maximum contents of the syllabus
- Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)

- Total three questions need to be solved.

Lab Assessment:

1. Term work:

Term Work shall consist of minimum five experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments and Journal) : 10 marks

Project GroupWise or Topic Presentation : 10 marks

Attendance (Theory and Practical) : 05 marks

The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

Books/References:

EC 103	Engineering Chemistry I	02	01	-	02	0.5	-	2.5

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		1	2	Avg.					
EC 103	Engineering Chemistry I	30	30	30	45	25	-	-	100

Course Objectives:

1. To impart a scientific approach and to familiarize the applications of chemistry in the field of engineering.
2. The student with the knowledge of the basic chemistry will understand and explain scientifically the various problems related to chemistry in the industry/engineering field.
3. To develop abilities and skills that is relevant to the study and practice of chemistry.

Course Outcomes:

On successful completion of course learner will be able to

1. To understand and analyse the combustion mechanisms of various fuels and be able to characterize the fuels.
2. To select various lubricants for different industrial applications.
3. To become familiarized with corrosion forms and their effects and to recognize and use the method of corrosion protection.
4. To analyse the quality of water and will be able to suggest methods to improve water quality.
5. To assess the environmental impact and understand the methods for their minimisation.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1	Fuels And Combustion Pre-requisite: What are fuels, Types of fuels, Characteristics of fuels. 1.1. Calorific value of a fuel - HCV and LCV, Theoretical determination of calorific value of fuel by Dulong's formula, Numerical problems 1.2 Solid fuels : Coal, Analysis of coal - Proximate and Ultimate analysis, Numerical problems Liquid fuels: Composition and classification, Octane number, Cetane number, Biodiesel Gaseous Fuels:, LPG and CNG	05

	1.3. Combustion of fuels – Numerical problems for calculating the amount of air needed for the complete combustion of solid and gaseous fuels.	
2	<p>Lubricants Pre - requisites : Definition of Lubricants and Lubrication, functions of lubricants 2.1 Mechanisms of lubrication – Thick film, Thin film and Extreme pressure 2.2 Classification of lubricants - Solid (MoS₂, graphite), Semi solid (greases), Liquid (animal/vegetable oils, mineral oils, synthetic oils) 2.3 Properties of lubricants and their significance - Viscosity and Viscosity Index, Flash and Fire Points, Cloud and Pour Points, Acid Number, Saponification Number, Steam Emulsification Number and related numerical problems.</p>	04
3	<p>Corrosion Pre-requisite:- corrosion , corrosion product, electrochemical series, corrosive and non corrosive metals. 3.1 Mechanism of corrosion - Chemical and Electrochemical corrosion. 3.2 Types of corrosion : Galvanic corrosion, Differential aeration corrosion, Pitting corrosion, Intergranular corrosion, Waterline corrosion, Stress corrosion. 3.3 Factors Affecting Corrosion Rate : - (i) Nature of metal, (ii) Nature of environment.</p>	04
4	<p>Corrosion Control 4.1 Methods of Corrosion Control : Material selection, Design, Cathodic protection, Anodic protection 4.2 Protective Coatings: Metallic coatings anodic coating (galvanizing) and cathodic coating (Tinning), Different Methods of Applying Metallic Coatings (No explanation needed) 4.3 Organic coatings – Paints and Special Paints.</p>	03
5	<p>Water And Its Treatment Pre - requ Pre-requ Prerequisite: Knowledge of sources of water, Possible impurities in water, Characteristics imparted by impurities in water. 5.1 Hardness in water – types & its units, Determination of hardness by EDTA method, and numerical problems. 5.2. Effects of Hard water in boilers - Priming and Foaming, Scales and Sludges, Boiler corrosion, caustic embrittlement 5.3 Softening of water- Ion exchange process. 5.4 Desalination of brackish water- Reverse Osmosis, Electrodialysis, Ultrafiltration . 5.5 Municipal water treatment – Primary, secondary and tertiary, BIS specification of drinking water</p>	05
6	<p>Environmental And Green Chemistry Pre-requisites:- Definition of Environment and Primary concept of environmental pollution. 6.1 Concept and Scope of Environmental Chemistry. 6.2 Environmental Pollution and Control - Water pollution - BOD and COD, determination and numerical problems. E- pollution and N- pollution 6.3 Concept of 12 principles of Green chemistry, discussion with examples, numericals on atom economy.</p>	03

DETAILED LAB SYLLABUS:

Sr.no	List of Experiments
1	Determination of Hardness in water
2	Determination of Viscosity of oil by Redwood Viscometer
3	Determination of Flash point of a lubricant using Abel's apparatus
4	Determination of Acid Value and Saponification Value of an oil.
5	Determination of Chloride content of water by Mohr's Method
6	Determination of moisture content in coal sample.
7	Study of the effect of different environments (Acid, Base) on corrosion rate.
8	Determination of COD Value of water.
9	Removal of hardness using ion exchange column.
10	Calorific value of liquid fuel.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 30 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

- Question paper will comprise of 5 questions, each carrying 15 marks.
- Question number 1 will be compulsory and based on maximum contents of the syllabus
- Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3.
- Total three questions need to be solved.

Lab Assessment:

Term work Assessment:

Term Work shall consist of a minimum five experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments and Journal)	: 10 marks
Assignments and Viva on modules	: 10 marks
Attendance (Theory and Tutorial)	: 05 marks

The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

Books/References:

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 104	Programming with C	03	02	-	03	01	-	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Avg.						
EC 104	Programming with C	40	40	40	60	25	--	25	150	

Course Objectives:

1. To provide exposure to problem-solving by developing algorithms and designing flowchart.
2. Implement the logic to solve real world problems using the C programming language.
3. To develop solutions using different programming concepts.
4. To be able to write and read data from files.
5. To decompose solutions into smaller units using functions.
6. To create different types of data-structure using structure, arrays and pointers.

Course Outcomes:

1. Understand the basic terminology used in computer programming.
2. Use different data types, operators and keywords to write programs
3. Able to logically code using control statements and loops.
4. Use the concepts of arrays, strings, functions and Structures to structure complex programs
5. Use of pointers to access different user defined data types like arrays, Strings and Structures
6. Use different data structures and open/create/update basic data files.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1	Fundamentals of C Programming	History of C programming language and its features 1.1 Algorithm & Flowchart : Three construct of Algorithm and flowchart: Sequence, Decision (Selection) and Repetition 1.2 Character Set, Identifiers and keywords, Data types, Constants, Variables. 1.3 Operators-Arithmetic, Relational and logical, Assignment, Unary, Conditional, Bitwise, Comma,	05

		other operators. Expression, statements, Preprocessor, Structure of basic C program.	
2	Control Flow Statements	2.1 Decision making statements- if statement, if-else statement , if-else-if ladder, nested if-else, switch statement 2.2 Looping – while , do-while, for 2.3 Jump Statements- break, continue, goto, return, exit	10
3	Functions	3.1 Introduction to Functions, declaring and defining function, calling function, passing arguments to a function, recursion and its application. 3.2 Library functions – getchar(), putchar(), gets(), puts(), Math function, Ctype functions 3.3 Storage classes in C-auto, extern, static, register	04
4	Arrays, Strings and Structures	4.1 Array Introduction, Declaration, Initialization, Accessing array element, One and Two-dimensional array. 4.2 Strings Introduction, String using char array, String handling functions 4.3 Structure Introduction, Declaration, Initialization, Nested structure, Array of Structure.	09
5	Pointers	5.1 Pointer :Introduction, Definition, Pointer Variables, Referencing and Dereferencing operator, Pointer Arithmetic, Pointers to Pointers, void Pointer, 5.2 Pointers to Array and Strings, Passing Arrays to Function, Accessing structure using pointers, Array of Pointers, call by value and call by reference. 5.3 Dynamic Memory Allocation using malloc, calloc, realloc, free	05
6	File Handling	6.1 Introduction, types of Files, File Operations-Opening, Modes of opening a file, Closing, Creating, Reading, Processing File.	03

DETAILED LAB SYLLABUS:

Software Requirements: Turbo C

Module	Detailed Content				
1	1. Write algorithm and draw flowchart to find roots of quadratic equation 2. Write a program to swap two integers with and without using temporary variables. 3. Write a program to calculate the volume of a cone. Accept radius & height from the user.				
2	4. Write a program to find the greatest among three integers using ternary operator & if-else. 5. An electric power distribution company charges its domestic customer as follows : <table border="1" data-bbox="359 1848 1173 1975"> <thead> <tr> <th>Consumption Units</th> <th>Rate of charge</th> </tr> </thead> <tbody> <tr> <td>0 - 200</td> <td>0.50 per unit</td> </tr> </tbody> </table>	Consumption Units	Rate of charge	0 - 200	0.50 per unit
Consumption Units	Rate of charge				
0 - 200	0.50 per unit				

	201 - 400	Rs. 100 plus 0.65 per unit excess of 200 units
	401 - 600	Rs. 230 plus 0.85 per unit excess of 400 units
	601 & above	Rs. 390 plus 1.00 per unit excess of 600 units.
	<p>Program should read units consumed for a customer and calculate the total bill.</p> <p>6. Write a program to take input for a character and print the month names starting with that character using a switch case. (Ex: I/P = 'A', O/P = April, August).</p> <p>7. Write a program to find the result of the series: $1 - \frac{22}{3} + \frac{32}{5} - \dots + \frac{n^2}{(2n-1)}$</p> <p>8. Write a program to print the following pattern : (Take input for the no. of lines 'N').</p> <pre> * * * * * * * * * * </pre> <p>9. Write a program to print the following pattern : (Take input for the no. of lines 'N').</p> <pre> 1 12A 123BA 1234CBA </pre> <p>10. Write a program to find if the given number is palindrome number or not.</p>	
3	<p>11. Write a program for the sum of natural numbers using a recursive function.</p> <p>12. Write a program to illustrate different ways of passing parameters to a function to demonstrate increment/decrement operators.</p>	
4	<p>13. Write a program to cyclically rotate elements of the integer array in the right direction.</p> <p>14. Write a program to find transpose using the same matrix.</p> <p>15. Write a program to find the reverse of a string using another string (Define a user defined function to find the length of the string).</p> <p>16. Write a program using Structure to accept employee name, emp_id, date_of_joining and salary. Display the result in descending order of salary. Store data for N Employees.</p>	
5	<p>17. Write a program to dynamically allocate memory for the user entered size 'N' of an array, accept 'N' integers from the user and find the average of these integers using function and pointer (Pass array to the function using pointer).</p>	
6	<p>18. Write a program to accept a set of characters from the user until the user presses the full stop ('.') and store it in a text file. Read from the file and display the contents of the file.</p>	

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.

- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

Experiments (atleast 15 Programs) and Assignments (2 Assignments) should be completed by students on the given time duration.

Experiments : 15 Marks

Assignment : 05 Marks

Attendance : 05 Marks

The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

2. Oral/Viva Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus.

EC 105	Basic Electrical Engineering	03	02	-	03	01	-	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
1	2	Avg.								
EC 105	Basic Electrical Engineering	40	40	40	60	25	-	25	150	

Prerequisite: Resistance, inductance, capacitance, series and parallel connection of resistance, concept of voltage, current, power and energy and its units.

Course Objectives:

1. To provide knowledge on fundamentals of D.C. circuits.
2. To provide knowledge of D.C network theorems and its applications.
3. To impart knowledge on fundamentals of A.C. circuits
4. To impart knowledge on fundamentals of single phase A.C circuits and its applications.
5. To impart knowledge on fundamentals of 3- Φ A.C. circuits and its applications.
6. To impart knowledge on basic operation and applications of electrical machines.

Course Outcomes:

On successful completion of course learner/student will be able to

1. Apply basic concepts to analyse D.C circuits.
2. Apply various D.C network theorems to determine the circuit response/ behaviour.
3. Apply basic concepts to analyse A.C waveforms.
4. Evaluate and analyse single phase A.C circuits.
5. Evaluate and analyse three phase A.C circuits.
6. Understand the constructional features and operation of electrical machines.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1	DC Circuits Series and Parallel circuits, Concept of short and open circuits, Star-delta transformation, Ideal and practical voltage and current source, Kirchhoff's laws, Mesh and Nodal analysis (super node and super mesh included), Source transformation.	06
2	DC Theorems Linear and Nonlinear Circuit, Active and passive network, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, (Source transformation not allowed for Superposition theorem).	06

3	AC fundamentals Generation of alternating voltages, A.C terminology, RMS and Average value, form factor, crest factor, Phasor representation of alternating quantities, addition and subtraction of alternating quantities using phasors.	03
4	Single Phase AC Circuits AC through pure resistor, inductor and capacitor. AC through R-L , R-C and R-L-C series and parallel circuits, phasor diagrams, power and power factor, series and parallel resonance, Q-factor.	07
5	Three Phase AC Circuits Three phase voltage and current generation, star and delta connections (balanced load only), relationship between phase and line currents and voltages, Phasor diagrams, Basic principle of wattmeter, measurement of power by two wattmeter method .	06
6	Electrical Machines <ul style="list-style-type: none"> ● Working principle of single-phase transformer, EMF equation of a transformer, Transformer losses, Phasor diagram, Equivalent circuit, Efficiency. ● Principle of operation, construction and classification of DC machines, emf equation, speed control of DC motors and its applications. ● Principle of operation of Single-Phase induction motors, stepper motors and their applications. 	08

DETAILED LAB SYLLABUS:

Hardware Requirements: Hardware Kits, Three phase power supply and DC motor.

Sr.no	List of Experiments
1	Mesh and Nodal analysis.
2	Verification of Superposition Theorem.
3	Verification Thevenin's Theorem.
4	Study of R-L series and R-C series circuit.
5	R-L-C series resonance circuit
6	R-L-C parallel resonance circuit.
7	Relationship between phase and line currents and voltages in three phase system (star & delta)
8	Power and phase measurement in three phase system by one wattmeter method.
9	Power and phase measurement in three phase system by two wattmeter method.
10	To demonstrate cut-out sections of DC machine.
10	To control the speed of DC motor.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:**1. Term work Assessment:**

Term work consists of performing minimum 06 practicals. Final certification and acceptance of the term work ensures satisfactory performance of laboratory work.

The distribution of Term Work marks will be as follows –

Attendance (Theory, Practical's)	:	05 marks
Assignments on entire syllabus	:	10 marks
Practical's	:	10 marks

2. Oral/Viva Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus

Text Books:

1. “Basic Electrical Engineering”, by Prof. B. R. Patil, Oxford Higher Education
2. “Basic Electrical Engineering (BEE)”, by Prof. Ravish Singh”, McGraw Hill Education

Reference Books:

1. B.L. Theraja “Electrical Technology” Vol-I and II, S. Chand Publications, 23 rd ed. 2003.
2. Joseph A Edminister, “Schaum”s outline of theory and problems of electric circuits” Tata McGraw Hill, 2 nd edition
3. D P Kothari and I J Nagrath “Theory and Problems of Basic Electrical Engineering”, PHI 13th edition 2011.

		Internal assessment			End Sem. Exam					
		1	2	Avg.						
EC 106	Basic Engineering Workshop I	-	-	-	-	50	-	-	50	

Course Objectives:

1. To impart training to help the students develop engineering skill sets.
2. To inculcate respect for physical work and hard labor.
3. To get exposure to interdisciplinary engineering.

Course Outcomes:

Upon successful completion of the course students will be able to

1. Develop the necessary skill required to handle/use different fitting tools.
2. Develop skill required for hardware maintenance.
3. Able to install an operating system and system drives.
4. Able to identify the network components and perform basic networking and crimping.
5. Able to prepare the edges of jobs and do simple arc welding.
6. Develop the necessary skill required to handle/use different plumbing tools.
7. Demonstrate the turning operation with the help of a simple job.

Detailed Contents	Hrs.
<p>Note: Trade 1 and 2 are compulsory. Select any ONE trade topics out of the topic at trade 3 to 5. Demonstrations and hands on experience to be provided during the periods allotted for the same. Report on the demonstration including suitable sketches is also to be included in the term work CO-1 is related to Trade-1 CO-2 to CO-4 is related to Trade-2 CO-5 is related to Trade-3 CO-6 is related to Trade-4 CO-7 is related to Trade-5 CO evaluation is to be done according to the opted Trades in addition to Compulsory Trades.</p>	

Trade-1	Fitting (Compulsory): <ul style="list-style-type: none"> ● Use and setting of fitting tools for chipping, cutting, filing, marking, center punching, drilling, tapping. ● Term work to include one job involving following operations : filing to size, one simple male- female joint, drilling and tapping 	10
Trade-2	Hardware and Networking: (Compulsory) Dismantling of a Personal Computer (PC), Identification of Components of a PC such as power supply, motherboard, processor, hard disk, memory (RAM, ROM), CMOS battery, CD drive, monitor, keyboard, mouse, printer, scanner, pen drives, disk drives etc. · Assembling of PC, Installation of Operating System (Any one) and Device drivers, Boot-up sequence. Installation of application software (at least one) · Basic troubleshooting and maintenance · Identification of network components: LAN card, wireless card, switch, hub, router, different types of network cables (straight cables, crossover cables, rollover cables) Basic networking and crimping. NOTE: Hands on experience to be given in a group of not more than four students	08
Trade-3	Welding: Edge preparation for welding jobs. Arc welding for different job like, Lap welding of two plates, butt welding of plates with simple cover, arc welding to join plates at right angles.	06
Trade-4	Plumbing: Use of plumbing tools, spanners, wrenches, threading dies, demonstration of preparation of a domestic line involving fixing of a water tap and use of coupling, elbow, tee, and union etc.	06
Trade-5	Machine Shop: At least one turning job is to be demonstrated and simple job to be made for Term Work in a group of 4 students.	06

Lab Assessment:

1. Term work Assessment:

Term work shall consist of respective reports and jobs of the trades selected the distribution of marks for term work shall be as follows.

Laboratory work (Job and Journal) : 40 marks

Attendance (Practical and Theory) : 10 marks

Books/References:-

1. Workshop Technology by H K Hajara Choudhary
2. Manufacturing Technology by R C Jain
3. Workshop Technology by R S Khurmi and J S Gupta
4. Workshop Technology by Chapman.

Bachelor of Technology

		Internal assessment			End Sem. Exam				
		1	2	Avg.					
EC 107	Engineering Mathematics II	40	40	40	60	25	-	-	125

Course Objectives:

1. To develop the basic mathematical skills of differential equations of engineering students
2. To understand the linear differential equation with constant coefficients used in mathematical modelling.
3. To acquaint the students with the Beta, Gamma functions and set theory.
4. To learn different techniques to solve double integrations.
5. To learn the applications of integration in solving the complex engineering problems.
6. To provide knowledge of numerical techniques using SCILAB software to handle Mathematical modelling.

Course Outcomes:

On successful completion of course learner/student will be able to:

1. Apply the basic concept of linear differential equations to solve problems in engineering.
2. Apply the basic concept of applications of higher order differential equations in mathematical Modelling to solve real life problems.
3. Apply the basic concepts of beta, gamma and set theory to solve engineering problems.
4. Apply the concept of double integration in solving problems of engineering and technology.
5. Apply the concept of double integrations to find length, area and volume.
6. Apply the concept of differentiation and integration numerically for solving the engineering problems with the help of SCILAB software.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs
1	Differential Equations of First Order and First Degree 1.1 Exact differential Equations, Equations reducible to exact form by using integrating factors. 1.2 Linear differential equations, equation reducible to linear form. 1.3 Application of differential equation of first order and first Degree in engineering.	02 02 02
2	Linear Differential Equations With Constant Coefficients and Variable coefficients of higher order:- 2.1. Linear Differential Equation with constant coefficient- complementary function, particular integrals of differential equation of the type $f(D)y = X$ where X is e^{ax} , $\sin(ax + b)$, $\cos(ax + b)$, x^n , $e^{ax}V$, xV . 2.2. Cauchy Differential equation, Method of variation of parameters two variables	03 03
3	Beta and Gamma Function, Set theory 3.1 Beta and Gamma functions and its properties. 3.2 Basics of set theory and set operations, law of set, partition of set, Power set, cartesian product, Inclusion-Exclusion Principle	03 03
4	Double Integration:- Prerequisite: Tracing of curves 4.1. Double integration- Evaluation of Double Integrals.(Cartesian & Polar), Change of order of Integration and evaluation 4.2. Evaluation of integrals over the given region.(Cartesian & Polar) 4.3. Evaluation of double integrals by changing to polar coordinates.	04 02
5	Applications of integration :- 5.1 Rectification of plane curves.(Cartesian and polar) 5.2. Application of double integrals to compute Area 5.3. Triple integration: Evaluation (Cartesian, cylindrical and spherical polar coordinates)	02 02 02
6	Numerical Techniques: - 6.1. Numerical solution of ordinary differential equation (a) Euler's method (b) Modified Euler method, (c) Runge-Kutta fourth order method 6.2. Numerical integration - (a) Trapezoidal (b) Simpson's 1/3rd (c) Simpson's 3/8th rule	03 03

Theory Assessment:**Internal Assessment Test:**

Assessment consists of two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed.

End Semester Theory Examination:

1. Question paper will comprise of total 05 questions, each carrying 20 marks.
2. Total 03 questions need to be solved.
3. Question No: 01 will be compulsory and based on the entire syllabus wherein 4 sub-questions of 5 marks each will be asked.
4. Remaining questions will be randomly selected from all the modules.
5. Weightage of each module will be proportional to number of respective lecture mentioned in the syllabus.

Term Work:

General Instructions:

1. Batch wise practical's are to be conducted. The number of students per batch should be as per norms.
2. Students must be encouraged to write SCILAB Programs in the laboratory. Each Student has to perform at least 4 SCILAB practical's and at least 6 assignments on the entire syllabus.
3. SCILAB Practical's will be based on (i) Euler's method (ii) Modified Euler method, (iii) Runge-Kutta fourth order method (iv) Trapezoidal (v) Simpson's 1/3rd (vi) Simpson's 3/8th rule (vii) Differential equations (viii) Integration. (At least four)

The distribution of Term Work marks will be as follows

Attendance (Theory, Tutorial and Practical's)	:	05 marks
Class assignments on entire syllabus	:	10 marks
SCILAB Practical's	:	10 marks

		Theory					Term Work	Pract /oral	Total
		Internal Assessment			End Sem Exam.	Exam. Duration (in Hrs)			
		1	2	Avg.					
EC 108	Engineering Physics II	30	30	30	45	2	25	-	100

Course Objectives:

1. To impart knowledge of basic concepts in engineering physics and founding principles of technology.
2. To provide the knowledge and methodology necessary for solving problems in the field of engineering.
3. To develop scientific temperament for scientific observations, recording, and inference drawing essential for technology studies.

Course Outcomes:

Upon successful completion of this course, the learner will be able to

1. Explain the functioning of lasers and their various applications.
2. Able to explain the working principle of optical fibres and their applications especially in the field of communication.
3. To comprehend the basic concepts of semiconductor physics and apply the same to electronic devices.
4. Able to explain working principles of various semiconductor devices and their use in various applications.
5. Interpret and explore basic sensing techniques for physical measurements in modern instrumentations.
6. To analyse digital logic processes and implement logical operations using various combinational logic circuits.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs
1.	Lasers : Laser: spontaneous emission and stimulated emission; metastable state, population inversion, types of pumping, resonant cavity, Einstein's equations; Helium Neon laser; Nd:YAG laser; Semiconductor laser Applications of laser- Holography (construction and reconstruction of holograms) and industrial applications (cutting, welding etc), Applications in the medical field.	04

2.	Optical Fibres: Working Principle and structure Numerical Aperture for step index fibre; critical angle; angle of acceptance; V number; number of modes of propagation; types of optical fibres;(Applications) Fibre optic communication system; sensors (Pressure, temperature, smoke, water level), applications in the medical field.	04
3.	Semiconductor Physics Splitting of energy levels for band formation; Classification of semiconductors(direct & indirect band gap, elemental and compound); Conductivity, mobility, current density (drift & diffusion) in semiconductors(n type and p type); Fermi Dirac distribution function; Fermi energy level in intrinsic & extrinsic semiconductors; effect of impurity concentration and temperature on fermi level; Fermi Level diagram for p-n junction(unbiased, forward bias, reverse bias); Breakdown mechanism (zener avalanche), Hall Effect and its applications.	05
4.	Semiconductor Devices and its Applications: P-n junction diode, Light Emitting Diode (LED), Zener diode, Photo diode, Photovoltaic cell (Solar Cell), BJT.	03
5.	Physics of Sensors: Temperature Sensor- Resistance Temperature Detectors(RTDs) (PT-100) Pressure Transducers- Capacitive pressure transducer, Inductive pressure transducer. Piezoelectric transducers: Concept of piezoelectricity, use of piezoelectric transducer as ultrasonic generator and application of ultrasonic transducer for distance measurement, liquid and air velocity measurement.	03
6.	Logic gates and combinational Logic circuits: Review of Binary,Octal and Hexadecimal Number systems and their interconversion, Difference between analog and digital signal, Logic levels, Digital logic gates,, Universal gates, Realization using NAND and NOR gates, Minimization techniques K Map , Half adder and Full adder circuit, MUX - DEMUX, ENCODERS and DECODERS.	05

Detailed Lab Syllabus:

Suggested Experiments: (Any five)

Sr. No.	List of Experiments
1	Determination of number of lines on the grating surface using LASER Source.
2	Determination of Numerical Aperture of an optical fibre.
3	Determination of wavelength using Diffraction grating. (Laser source)
4	Determination of angular divergence of laser beam.
5	Study of Hall Effect.
6	Determination of energy band gap of semiconductor.
7	Study of I-V characteristics of LED.
8	Determination of 'h' using Photocell.
9	Study of I-V characteristics of semiconductor photodiode and determination of its spectral response.
10	Study of I-V characteristics of a photovoltaic solar cell and finding the efficiency.
11	Design AND, OR, NOT, EXOR, EXNOR gates using Universal gates: NAND and NOR
12	Implement Half adder, Full adder, Halfsubtractor and Full subtractor circuits.

Theory Assessment:**1. Internal Assessment Test**

Assessment consists of two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

2. End Semester Examination:

In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

- Question paper will comprises of 4 questions, each carrying 15 marks.
- Question number 1 will be compulsory and based on maximum contents of the syllabus
- Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
- Total three questions need to be solved.

Lab Assessment:

1.Term work: Term Work shall consist of minimum five experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments and Journal)	: 10 marks
Project GroupWise or Topic Presentation	: 10 marks
Attendance (Theory and Practical)	: 05 marks

The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Avg.						
EC 109	Engineering Chemistry II	30	30	30	45	25	-	-	100	

Course objectives:

1. With the knowledge of the basic chemistry, the student will be able to understand and explain scientifically the various chemistry related problems in the industry/engineering field.
2. The student will be able to understand the new developments and breakthroughs efficiently in engineering and technology.

Course outcomes:

Upon successful completion of the course students will be able to

1. To recognize the electrochemical processes and apply the concepts in electrochemistry.
2. To develop knowledge on electrochemical energy storage systems considering the operation and design of various battery technologies.
3. To identify various polymeric materials and their applications in engineering.
4. To acquire theoretical background of types of nanomaterial's and their applications.
5. To acquire basic knowledge of the materials used in electronics
6. To describe the theoretical background of spectroscopic techniques such as NMR, IR, UV spectroscopy.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1	Engineering Electrochemistry Pre-requisite: redox reaction, cell reaction, electrode and its type, salt bridge 1.1. Electrode potential, electrode reaction, derivation of Nernst equation for single electrode potential, numerical problems. 1.2 Electrochemical cell - Weston standard Cadmium cell 1.3 Reference electrodes - Introduction, Construction, working of SHE, Calomel electrode. 1.4 Ion selective electrodes: Introduction, Construction and working of glass electrode, 1.5 Electrochemical Sensors	05

2	<p>Battery Technology Pre- requisite : Electrochemical Reactions, Cell potential, Electrochemical series 2.1 Introduction, classification – primary, secondary and reserve batteries. Characteristics – Capacity, Electricity storage density, energy efficiency, cycle life and shelf life. 2.2 Construction, working and applications of Ni – Cd rechargeable batteries 2.3 Lithium batteries - Introduction, construction, working and applications of Li-MnO₂ 2.4 Fuel Cells: Introduction, classification of fuel cells, limitations & advantages of fuel cells, Construction of Hydrogen oxygen alkaline fuel cells.</p>	05
3	<p>Polymeric Materials Pre-requisite: Polymer, Monomer, Polymerization, Degree of polymerisation, Classification of polymers, Mechanism of polymerisation. 3.1 Molecular weight of polymers: number average and weight average, numerical problems. , Polydispersity Index 3.2 Polymer crystallinity - glass transition temperature and its significance 3.3 Thermoplastic & Thermosetting polymers- Characteristics 3.4 Preparation , properties and uses of PMMA, Urea- Formaldehyde, Phenol - formaldehyde 3.5 Conducting polymers – Types, Mechanism of conduction in polymers, Examples, and applications. 3.6. Polymers for electronics – Polymer resists for integrated circuit fabrications, lithography and photolithography, 3.7. Polymer films in sensor applications</p>	05
4	<p>Nanochemistry Pre-requisite: Concept of nano scale, definition of nanoparticles 4.1. Importance of nano size, Properties of nanomaterials – Size, optical properties, magnetic properties, electrical properties. 4.2 Nanoscale materials- carbon nanotubes, nano wires, fullerenes. 4.3 Synthesis of Nano particles by Chemical vapor deposition (CVD) method and Laser Ablation Method 4.4 Nano electronics 4.5 Applications of nano materials</p>	04
5	<p>Materials For Electronics 6.1. Introduction, Electronic properties of materials, classification based on conductivity of materials , Specific conducting materials (graphite, Au, Pt, Ag, Al, Cu and steel) 6.2. Factors influencing the conductivity of materials, Applications of Optoelectronic and Dielectric materials.</p>	02
6	<p>Spectroscopic Techniques Pre-requisites: Electromagnetic radiation, characteristics of electromagnetic radiation, electromagnetic spectrum. 5.1. Spectroscopy - Principle, Interaction of radiation with matter, Selection rules. 5.2 Types of spectroscopy,: IR, UV, NMR, Emission Spectroscopy, (Flame Photometry), 5.3 Fluorescence and Phosphorescence, Jablonski diagram</p>	03

DETAILED LAB SYLLABUS:

Sr. No.	List of Experiments
1	Determination of Cell potential of Zn- Cu system

2	Molecular weight determination of polymers by Oswald Viscometer
3	Preparation of Urea Formaldehyde
4	Preparation of biodegradable polymer using corn starch or potato starch.
5	Preparation of Magnetic Nanoparticles.
6	Synthesis of Biodiesel
7	Determination of electrical conductivity of unknown solution.
8	Preparation of Hand Sanitizer using ethyl alcohol
9	Determination of Caffeine in Tea
10	Determination of pH using glass electrode.

Theory Assessment :

1.Internal Assessment Test

Assessment consists of two class tests of 30 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.

2.End Semester Examination

In question paper, weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

1. Question paper will comprise of 5 questions, each carrying 15 marks.
2. Question number 1 will be compulsory and based on maximum contents of the syllabus
3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3).
4. Total three questions need to be solved.

Lab Assessment:

Term work:

Term Work shall consist of minimum five experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments and Journal)	: 10 marks
Assignments and Viva on modules	: 10 marks
Attendance (Theory and Tutorial)	: 05 marks

The final certification and acceptance of TW ensures the satisfactory performance of laboratory work and minimum passing in the TW.

		Internal assessment			End Sem. Exam				
		1	2	Avg.					
EC 110	Engineering Mechanics and Graphics	40	40	40	60	25	25	--	150

Course Objectives:

1. To develop the capacity to predict the effects of force and motion and to acquaint the concept of static and dynamic equilibrium.
2. Ability to visualize physical configurations in terms of actual systems and its constraints, and able to formulate the mathematical function of the system.
3. To study, analyses and formulate the motion of moving particles/bodies.
4. To impart and inculcate proper understanding of the theory of projection.
5. To impart the knowledge of reading a drawing
6. To improve the visualization skill.

Course Outcomes:

On successful completion of course learner/student will be able to

1. The ability to verify the law of moments and draw Free Body Diagram and label the reactions on it.
2. Determine the centroid and MI of plane lamina.
3. Makes the students able to apply equilibrium equations in statics.
4. Apply the basic principles of projections in Projection of Lines
5. Apply the basic principles of projections in reading and converting 3D view to 2D drawing.
6. Visualize an object from the given two views.

Prerequisite:

10 + 2 Physics, Mathematics and Drawing skills

DETAILED THEORY SYLLABUS:

Module	Detailed Content	Hrs
1	<p>Coplanar and Non-Coplanar Force System and Resultant:</p> <p>System of Coplanar Forces: Classification of force systems, Principle of transmissibility, composition and resolution of forces.</p> <p>Resultant: Resultant of coplanar and non-coplanar force system (Concurrent forces, parallel forces and non-concurrent Non-parallel</p>	06

	system of forces). Moment of force about a point, Couples, Varignon's Theorem. Force couple system. Distributed Forces in plane.	
2	Equilibrium of System of Coplanar Forces and Beams: Conditions of equilibrium for concurrent forces, parallel forces and non-concurrent non-parallel general forces and Couples. Equilibrium of rigid bodies free body diagrams. Types of beams, simple and compound beams, type of supports and reaction. Determination of reactions at supports for various types of loads on beams. (Excluding problems on internal hinges)	06
3	Kinematics of Particle: Motion of particle with variable acceleration. General curvilinear motion. Tangential & Normal component of acceleration, Application of concepts of projectile motion and related numerical.	06
4	Projection of Points and Lines: Lines inclined to both the Reference Planes (Excluding Traces of lines) and simple application-based problems on Projection of lines.	06
5	Orthographic and Sectional Orthographic Projections: Fundamentals of orthographic projections. Different views of a simple machine part as per the first angle projection method recommended by I.S. Full or Half Sectional views of the Simple Machine parts.	06
6	Isometric Views: Principles of Isometric projection – Isometric Scale, Isometric Views, Conversion of Orthographic Views to Isometric Views (Excluding Sphere).	06

DETAILED LAB SYLLABUS:

Software Requirements: AutoCAD

Hardware Requirements: Pentium / Windows

Minimum three experiments from the following list (1-4) of which minimum one should be from dynamics.

Sr. No.	Detailed Lab/Tutorial Description
1	Verification of Polygon law of coplanar forces.
2	Verification of Principle of Moments (Bell crank lever).
3	Determination of support reactions of a Simply Supported Beam.
4	Kinematics of particles. (Uniform motion of a particle, Projectile motion, motion under gravity)
5	One sheet on Orthographic projection. (minimum 2 problem)
6	One sheet on Sectional Orthographic projection. (minimum 2 problem)
7	One sheet on Isometric drawing. (minimum 2 problems)

Theory Assessment:

1. Internal Assessment Test:

Assessment consists of two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed.

2. End Semester Theory Examination:

1. Question paper will comprise of total 05 questions, each carrying 20 marks.
2. Total 03 questions need to be solved.

3. Question No: 01 will be compulsory and based on the entire syllabus wherein 4 sub-questions of 5 marks each will be asked.
4. Remaining questions will be randomly selected from all the modules.
5. Weightage of each module will be proportional to number of respective lecture mentioned in the syllabus.

Lab Assessment:

1. Term Work marks will be as follows

Attendance (Theory, Practical's)	:	05 marks
Assignments on entire syllabus	:	10 marks
Practical's	:	10 marks

2. Oral/Practical: Oral/Practical Exams should be conducted based on syllabus and practical's conducted.

EC 111	Programming with Python	40	40	40	60	25	-	25	150	

Course Objectives:

1. Basics of python including data types, operator, conditional statements, looping statements, input and output functions in Python
2. List, tuple, set, dictionary, string, array and functions
3. Object Oriented Programming concepts in python
4. Concepts of modules, packages, multithreading and exception handling
5. File handling

Course Outcomes:

Upon completion of the course students will be able

1. To understand the structure, syntax of the Python language
2. To interpret varied data types in python
3. To implement arrays and functions
4. To illustrate the concepts of object-oriented programming as used in Python
5. To create Python applications using modules, packages, multithreading and exception handling
6. To gain proficiency in writing File Handling programs

Prerequisite Subjects: C programming

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Description	Hrs
	Prerequisite	Python IDE installation and environment setup.	
1	Basics of Python	Introduction, Features, Python building blocks – Identifiers, Keywords, Indention, Variables and Comments, Basic data types (Numeric, Boolean, Compound) Operators: Arithmetic, comparison, relational, assignment, logical, bitwise, membership, identity operators, operator precedence	06

		Control flow statements: Conditional statements (if, if...else, nested if) Looping in Python (while loop, for loop, nested loops) Loop manipulation using continue, pass, break. Input/output Functions, Decorators, Iterators and Generators.	
2	Advanced data types & Functions	Lists: a) Defining lists, accessing values in list, deleting values in list, updating lists b) Basic list operations c) Built-in list functions Tuples: a) Accessing values in Tuples, deleting values in Tuples, and updating Tuples b) Basic Tuple operations c) Built-in Tuple functions Dictionaries: a) Accessing values in Dictionary, deleting values in Dictionary, and updating Dictionary b) Basic Dictionary operations c) Built-in Dictionary functions Sets: a) Accessing values in Set, deleting values in Set, updating Sets b) Basic Set operations, c) Built-in Set functions Strings: a) String initialization, Indexing, Slicing, Concatenation, Membership & Immutability b) Built-in String functions	08
3	Array and Functions	Arrays: a) Working with Single dimensional Arrays: Creating, importing, Indexing, Slicing, copying and processing array arrays. b) Working with Multi-dimensional Arrays using NumPy: Mathematical operations, Matrix operations, aggregate and other Built-in functions Functions: a) Built-in functions in python b) Defining function, calling function, returning values, passing parameters c) Nested and Recursive functions d) Anonymous Functions (Lambda, Map, Reduce, Filter)	06
4	Object Oriented Programming	Overview of Object-oriented programming, Creating Classes and Objects, Self-Variable, Constructors, Inner class, Static method. Inheritance: Types of Inheritance (Single, Multiple, Multi-level, Hierarchical), super() method, Constructors in inheritance, Method overloading, Method overriding, Abstract class, Abstract method	06
5	Exploring concept of modules, packages, multithreading and exception handling	Modules: Writing modules, importing objects from modules, Python built-in modules (e.g. Numeric and Mathematical module, Functional Programming module, Regular Expression module), Namespace and Scoping. Packages: creating user defined packages and importing packages. Multi-threading: process vs thread, use of threads, types of threads, creating threads in python, thread synchronization, deadlock of threads. Exception handling: Compile time errors, Runtime errors, exceptions, types of exception, try statement, except block, raise statement, Assert statement, User-Defined Exceptions.	06
6	File handling	File Handling: Opening file in different modes, closing a file, Writing to a file, accessing file contents using standard library functions , Reading from a file – read(), readline(), readlines(), Renaming and Deleting a file, File Exceptions, Pickle in Python.	4

DETAILED LAB SYLLABUS:

Minimum Hardware Requirements	Software Requirements	Other Requirements
PC With following Configuration 1. Intel Dual core Processor or higher 2. Minimum 2 GB RAM 3. Minimum 40 GB Hard disk 4. Network interface card	1. Windows or Linux Desktop OS 2. Python 3.6 or higher 3. Notepad ++ 4. Python IDEs like IDLE, Pycharm, Pydev, Netbeans or Eclipse 5. Mysql	1. Internet Connection for installing additional packages

List of suggested Experiments:

1)	Write python programs to understand a) Basic data types, Operators, expressions and Input Output Statements b) Control flow statements: Conditional statements (if, if...else, nested if) c) Looping in Python (while loop, for loop, nested loops)
2)	Write python programs to understand a) Different List and Tuple operations using Built-in functions b) Built-in Set and String functions
3)	Write python programs to understand c) Basic Array operations on 1-D and Multidimensional arrays d) Implementing User defined and Anonymous Functions
4)	Write python programs to understand a) Classes, Objects, Constructors and Static method b) Different types of Inheritance c) Method overloading, Method overriding, Abstract class and Abstract method
5)	Write python programs to understand a) Creating User-defined modules/packages and import them in a program b) Creating user defined multithreaded application to demonstrate simultaneous execution of multiple threads c) Creating a menu driven applications which should cover the built-in exceptions in python
6)	Write python programs to understand a) Different File Handling operations in Python

Theory Assessment:

1. Internal Assessment Test:

Assessment consists of two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed.

2. End Semester Theory Examination:

1. Question paper will comprise of total 05 questions, each carrying 20 marks.
2. Total 03 questions need to be solved.
3. Question No: 01 will be compulsory and based on the entire syllabus wherein 4 sub-questions of 5 marks each will be asked.
4. Remaining questions will be randomly selected from all the modules.
5. Weightage of each module will be proportional to number of respective lecture mentioned in the syllabus.

Lab Assessments:

1. Term work Assessment:

The Term work shall consist of at least 15 practical's based on the above list. The term work Journal must include at least 2 Programming assignments. The Programming assignments should be based on real world applications which cover concepts from more than one module of syllabus.

Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments/tutorial/write up) + 5 Marks (Attendance)

2. Oral/Viva Assessment:

An Oral & Practical exam will be held based on the above syllabus.

Books:

1. Dr. R. Nageswara Rao, "Core Python Programming" , Dreamtech Press, Wiley Publication
2. M. T. Savaliya , R. K. Maurya, "Programming through Python", StarEdu Solutions.
3. E Balagurusamy, "Introduction to computing and problem solving using python", McGraw Hill Publication.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 112	Professional Communication and Ethics I	02	02	-	02	01	-	03

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		1	2	Avg.					
EC 112	Professional Communication and Ethics	20	20	20	30	25	-	-	75

Course Objectives:

1. To understand, compare and demonstrate the importance and relevance of communication with specific emphasis on listening skill.
2. To promote practice in speaking skill and encourage learners to compose on the spot speeches for the purpose of developing and generating ideas.
3. To train learners in reading strategies that will enhance their global understanding of the text and help them to comprehend academic and business correspondence.
4. To illustrate effective writing skills in business, academic and technical areas.
5. To inculcate confident personality traits with grooming and social etiquette.
6. To train learners in producing words on the basis of contextual cues and reflect on errors in sentences.

Course Outcomes:

On successful completion of course learner/student will be able to

1. Listen, comprehend and identify potential barriers in spoken discourse with ease and accuracy.
2. Develop confidence and fluency in speaking at social, academic and business situations as well as make effective professional presentations.
3. Implement reading strategies for systematic, logical understanding that will enhance the skill of comprehension, summarization and evaluation of texts.
4. Understand and demonstrate effective writing skills in drafting academic, business and technical documents.
5. Communicate effectively in academic as well as business settings, displaying refined grooming and social skills.
6. Anticipate the meaning of unfamiliar words with the help of contextual cues and construct grammatically correct sentences.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1	The Importance and Strategies of Effective Listening Prerequisite: Able to listen, read, speak, write and comprehend the target language Introduction to communication 1.1 Importance and relevance of communication 1.2 Listening skill -Ability to discriminate stress and intonation -Comprehend meaning of audio text-graded on the basis of vocabulary, sentence construction and theme. -potential barriers	04
2	Developing Speaking Skills 2.1 Intensive Speaking- on the spot topics 2.2 Responsive speaking-answering a question 2.3 Interactive speaking-conversations 2.4 Extensive speaking-speech, oral presentations-specific emphasis on plagiarism check and generating the report	04
3	Strategies and Techniques to build Reading Skill 3.1 Global understanding of the text- inference, anticipation and deduction 3.2 Detailed understanding of text-scanning for specific information (special emphasis on reading comprehension exercises and summarization)	02
4	Developing Professional Writing Skills 4.1 Effective introduction with emphasis on general statement, opposing statement and thesis statement 4.2 Critical response to a text with special reference to purpose, evaluation of the content, theme and style of a text 4.3 Organization of ideas, sentence construction and word choice, grammar and usage 4.4 Explanation and support of ideas (special reference to writing paragraphs and business letters- Sales and complain letters}	04
5	Etiquette and Grooming for Personality Development 5.1 Social Etiquette 5.2 Corporate etiquette 5.3 Confidence building and Personality development	01
6	Vocabulary and Grammar 6.1 Contextual vocabulary Development- Word Maps 6.2 Identifying errors in a sentence.	01

DETAILED LAB SYLLABUS:**Lab Prerequisite: Basic language skills**

Sr. No.	Detailed Lab/Tutorial Description
1	Written record of listening activities-Listening practice tasks of 3 types (through audio recordings of (1) Monologues (2) Dialogues (3) Formal/Expert Talk or Lecture)
2	Transcription of the public speech along with a plagiarism report-Practice public speech

3	Summarization through graphic organizers (1. Text to graphic organizer 2. Graphic organizer to text)
4	1. Case studies on critical thinking 2. 2 business letters in complete block format
5	Documentation of case studies/Role play based on Module 5
6	1. Contextual Vocabulary Development 2. Aptitude Test

Theory Assessment:

1. Internal Assessment Test

Assessment consists of two class tests of 20 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. (Note: Summarization should be a compulsory question in Test II and not in the End Semester Theory Examination.)

2. End Semester Theory Examination:

- Question paper will consist of 5 questions, each carrying 10 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

Term work:

- Term Work shall consist of 8 Assignments.
- The distribution of marks for term work shall be as follows:

Assignments	: 10 marks
Oral Exam/ Public Speaking	: 10 marks
Attendance (Theory and Tutorial)	: 05 marks

Books/References:

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Avg.						
EC 113	Basic Engineering Workshop II	-	-	-	-	50	-	-	50	

Course Objectives:

1. To impart training to help the students develop engineering skill sets.
2. To inculcate respect for physical work and hard labor.
3. To get exposure to interdisciplinary engineering domain.

Course Outcomes:

On completion of the course students will be able to

1. Develop the necessary skill required to handle/use different carpentry tools.
2. Identify and understand the safe practices to adopt in electrical environment.
3. Demonstrate the wiring practices for the connection of simple electrical load/equipment.
4. Design, fabricate and assemble pcb.
5. Develop the necessary skill required to handle/use different masons tools.
6. Develop the necessary skill required to use different sheet metal and brazing tools.
7. Able to demonstrate the operation, forging with the help of a simple job.

Trade Nos.	Detailed Content	Hrs
<p>Note: Trade 1 and 2 are compulsory. Select any ONE trade topics out of the topic trade 3 to 5. Demonstrations and hands on experience to be provided during the periods allotted for the same. Report on the demonstration including suitable sketches is also to be included in the term work CO-1 is related to Trade-1 CO-2 to CO-4 is related to Trade-2 CO-5 is related to Trade-3 CO-6 is related to Trade-4 CO-7 is related to Trade-5 CO evaluation is to be done according to the opted Trades in addition to Compulsory Trades.</p>		
Trade-1	<p>Carpentry(Compulsory)</p> <ul style="list-style-type: none"> • Use and setting of hand tools like hacksaws, jack planes, chisels and gauges for construction of various joints, wood tuning and modern wood turning methods. • Term work to include one carpentry job involving a joint and report on 	10

	demonstration of a job involving wood turning	
Trade-2	Basic Electrical work shop:(Compulsory): <ul style="list-style-type: none"> • Single phase and three phase wiring. Familiarization. of protection switchgears and their ratings (fuse, MCB, ELCB). Wiring standards, Electrical safety in the work place safe work practices. Protective equipment, measures and tools. • Layout drawing, layout transfer to PCB, etching and drilling and soldering technique 	08
Trade-3	Masonry: <ul style="list-style-type: none"> • Use of masons tools like trowels, hammer, spirit level, square, plumb line and pins etc. demonstration of mortar making, single and one and half brick masonry , English and Flemish bonds, block masonry, pointing and plastering. 	06
Trade-4	Sheet metal working and Brazing: <ul style="list-style-type: none"> • Use of sheet metal, working hand tools, cutting , bending , spot welding 	06
Trade-5	Forging (Smithy): <ul style="list-style-type: none"> • At least one forging job to be demonstrated and a simple job to be made for Term Work in a group of 4 students. 	06

Lab Assessment:

1. Term work Assessment:

Term work shall consist of respective reports and jobs of the trades selected the distribution of marks for term work shall be as follows.

- Laboratory work (Job and Journal) : 40 marks
Attendance (Practical and Theory) : 10 marks

Books/References:

1. Workshop Technology by H K Hajara Choudhary
2. Manufacturing Technology by R C Jain
3. Workshop Technology by R S Khurmi and J S Gupta
4. Workshop Technology by Chapman.

		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 201	Engineering Mathematics-III	40	40	40	60	25	-	-	125	

Prerequisite: Engineering Mathematics-I and Engineering Mathematics-2

Course Objectives:

1. Learn the Laplace Transform, Inverse Laplace Transform of various functions, its applications.
2. Understand the concept of Fourier Series, its complex form and enhance the problem solving skills.
3. Understand Matrix algebra for engineering problems.
4. Understand the concept of complex variables, C-R equations with applications.
5. Understand the concept of Relation and function.
6. Understand the concept of coding theory

Course Outcomes:

After successful completion of the course students will be able to

1. Apply the concept of Laplace transform and its application to solve the real integrals in engineering problems.
2. Expand the periodic function by using the Fourier series for real-life problems and complex engineering problems.
3. Apply the concepts of Eigen values and eigenvectors in engineering problems.
4. Apply complex variable theory, application of harmonic conjugate to get orthogonal trajectories and analytic functions.
5. Apply the concept of relation and function.
6. Use groups and codes in Encoding-Decoding.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Laplace Transform	Definition of Laplace transform and Laplace transform of standard functions, Properties of Laplace Transform: Linearity, First Shifting Theorem, change of scale Property, multiplication by t, Division by	07

		t, (Properties without proof). Inverse of Laplace Transform by partial fraction and convolution theorem.	
2.	Fourier Series , Fourier Transform	Dirichlet's conditions, Fourier series of periodic functions with period 2π and $2L$, Fourier series for even and odd functions, Half range sine and cosine Fourier series, Orthogonal and Ortho-normal functions, Fourier Integral Representation, Fourier Transform and Inverse Fourier transform of constant and exponential function.	06
3.	Linear Algebra Matrix Theory, Quadratic Forms	Eigenvalues and eigenvectors; Diagonalization of matrices; Cayley-Hamilton Theorem, Quadratic forms over real field, Linear Transformation of Quadratic form, Reduction of Quadratic form to diagonal form using congruent transformation. Rank, Index and Signature of quadratic form, Sylvester's law of inertia, Value- class of a quadratic form-Definite, Semidefinite and Indefinite. Reduction of Quadratic form to a canonical form using congruent transformations.	07
4.	Complex Variables and conformal mappings	Function $f(z)$ of complex variable, Introduction to Limit, Continuity and Differentiability of (z) , Analytic function: Necessary and sufficient conditions for $f(z)$ to be analytic, Cauchy-Riemann equations in Cartesian coordinates, Milne-Thomson method: Determine analytic function $f(z)$ when real part(u), imaginary part (v) or its combination ($u+v / u-v$) is given, Conformal mapping, Linear and Bilinear mappings, cross ratio	06
5.	Relation and Function	Partition of A Set, Relation, Diagram of A Relation, Matrix of A Relation, Digraph of A Relation, Types of Relation, Number of Binary Relations, Number of Reflexive Relations, Equivalence Relation, Relation of the Path, Operations on Relations, Closures, Warshall's Algorithm,	07
6.	Algebraic Structures, coding theory	Properties of Binary Operations, Semi-Group. Monoid, Group, Ring, Isomorphism, Homomorphism, Group Code, Decoding and Error Correction, Maximum Likelihood Technique	06

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

Term work should consist of all the work done in tutorials and assignments. The final certification and acceptance of term work ensures satisfactory performance throughout in all the assigned work.

		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 202	Communication Engineering	40	40	40	60	25	--	--	125	

Prerequisite: Basic Electrical Engineering

Course Objectives:

1. Gain the core idea of electromagnetic Spectrum.
2. To introduce students to various Communication Methods and Introduction to Noise and its effect on the Communication System.
3. To analyze different parameters of analog communication techniques.
4. Study the Sampling theorem and Pulse Analog and digital modulation techniques.
5. Learn the concept of multiplexing and digital bandpass modulation techniques.
6. To understand the fundamental concepts of electronic communication and their use in computer applications.

Course Outcomes:

After successful completion of the course students will be able to

1. Use different modulation and demodulation techniques used in analog communication
2. Identify and solve basic communication problems
3. Analyze transmitter and receiver circuits
4. Compare and contrast design issues, advantages, disadvantages and limitations of analog communication systems
5. To understand the fundamental concepts of electronic communication
6. To study basic concepts of information theory.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Basics of Communication System	Block diagram, electromagnetic spectrum, signal bandwidth and power, types of communication channels, Introduction to time and frequency domain. Types of noise, signal to noise ratio, noise figure and noise temperature, Friss transmission formula.	06
2.	Communication Fundamentals: Analog Communication	Block diagram and elements of analog communication systems, Theory of amplitude modulation, mathematical Derivation Of AM and types of AM. Block diagram of AM transmitter (HLM and LLM). Generation of DSB-SC using	09

	(Amplitude Modulation)	diode Ring balanced modulator. Generation of SSB using phase shift method. AM Receivers: Receiver Characteristics (Selectivity, Sensitivity, Fidelity) TRF Receiver and its disadvantages Superheterodyne Receiver. (Numericals on Transmitter and Receiver).	
3.	Communication Fundamentals: Angle Modulation	Frequency modulation (FM): Basic concept, mathematical analysis, spectrum of FM wave, sensitivity, phase deviation and modulation index, deviation ratio, narrowband FM and wideband FM. Varactor diode modulator, Direct FM transmitter, indirect FM Transmitter, pre-emphasis and de-emphasis. FM demodulation: Balance slope detector, Foster-Seely discriminator, ratio detector, comparison between AM, FM and PM Applications of AM, FM and PM	08
4.	Pulse Modulation Techniques	Statement of Sampling Theorem, Generation and detection of PAM, PWM, PPM, PCM, DM and ADM. Quantization process, Pulse code modulation, Delta modulation, Adaptive delta modulation. Introduction to Line Codes and ISI.	06
5.	Multiplexing Techniques	Principles of FDM. FDM Hierarchy. FDM Transmitter and Receiver. Principles of TDM. TDM Transmitter and Receiver. TDM – PCM system. TDM –PAM system. (Numericals)	06
6.	Communication Fundamentals: Information theory	Amount of information, average information, information rate, Statement of Shannon's theorem, channel capacity (Numericals)	04

DETAILED LAB SYLLABUS:

Hardware Requirements: Demonstrative kits

Sr. No.	Detailed Lab/Tutorial Description
1	Study of Electronic Component and measuring instruments
2	Modulation and Demodulation of AM.
3	Modulation and demodulation of FM
4	Study of super heterodyne receiver
5	Modulation and Demodulation PAM.
6	Modulation and Demodulation PWM.
7	Modulation and Demodulation PPM.
8	Modulation and Demodulation PCM.
9	FDM
10	TDM

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment :

Minimum 8 experiments to be performed based on the entire syllabus. Term work of 25 Marks will be based on the assessment on the overall performance of the student in every experiment and assignments graded from time to time.

Books:

1. George Kennedy, Bernard Davis, SRM Prasanna, Electronic Communication Systems, Tata McGraw Hill, 5th Ed

		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 203	Analog Electronics Circuits	40	40	40	60	25	25	--	150	

Prerequisite: Basic Electrical Engineering

Course Objectives:

1. To enhance comprehension capabilities of students through understanding of electronic circuits.
2. To perform DC and AC analysis of BJT and MOSFET amplifier circuits.
3. To teach fundamental principles of operational amplifiers.
4. To develop an overall approach for students from selection of integrated circuit, specification, functionality and applications.

Course Outcomes:

After successful completion of the course students will be able to

1. Understand construction, characteristics and working of semiconductor devices such as BJT, MOSFET.
2. Derive expressions for performance parameters of BJT and MOSFET based Electronic circuits
3. Select and Design electronic circuits (using BJT and MOSFET) for given specifications
4. Derive and determine various performances-based parameters and their significance for Op-Amp.
5. Analyze and identify the closed loop stability considerations, linear and nonlinear applications of operational amplifiers.
6. Design an application with the use of integrated circuits.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Semiconductor devices	1.1 Bipolar Junction Transistor - BJT operations, voltages and current equations, BJT characteristics (CE, CB, CC configurations), early effect. 1.2 Field Effect Devices-	06

		JFET: Construction, operation and characteristics. MOSFET: Construction, operation and characteristics of D-MOSFET and EMOSFET.	
2.	Biassing Circuits of BJTs and MOSFETs	2.1 Concept of DC load line, Q point and regions of operations, Analysis and design of biasing circuits for BJT (Voltage divider Bias ONLY) 2.2 DC load line and region of operation for MOSFETs. Analysis and design of biasing circuits for E-MOSFET (voltage divider bias ONLY).	06
3.	Small Signal Amplifiers	3.1 Concept of AC load line and Amplification, Small signal analysis (Z_i , Z_o , A_v and A_i) of CE amplifiers using hybrid pi model ONLY. 3.2 Small signal analysis (Z_i , Z_o , A_v) of CS (for EMOSFET) amplifiers. Introduction to multistage amplifiers. Cascade and cascode only.(Concept, advantages & disadvantages)	07
4.	Operational Amplifiers	4.1 The ideal operational amplifier (op-amp), internal block diagram of op-amp, characteristics of op-amp, ideal & practical op-amp parameters / specifications (no detailed description or any analysis), mathematical model of op-amp, IC 741 op-amp with pin diagram & description 4.2 Operational amplifier open loop & closed loop configurations (theoretical description only), the concept of virtual ground & virtual short	06
5.	Applications of Operational Amplifier	5.1 The op-amp inverting amplifier & op-amp non-inverting amplifier (mathematical analysis for derivation of output voltage only, numerical examples & designing) 5.2 Adder, summing amplifier, averaging circuit, subtractor, integrator (ideal), differentiator (ideal), op-amp instrumentation amplifier (only mathematical analysis for derivation of output voltage)	07
6.	Special Purpose Integrated Circuits	6.1 IC 555 timer internal block diagram & pin configuration, operation in astable & monostable multivibrator with mathematical analysis & numerical examples, design problems on astable & monostable multivibrator, applications in astable & monostable configuration 6.2 Functional block diagram, working and design of general purpose IC 723 (HVLC and HVHC).(theoretical description only). working of the switching regulator. (theoretical description only)	07

DETAILED LAB SYLLABUS:

Hardware Requirements: Breadboard, Transistors, Resistors, Diodes, Connecting wires, Op-amp IC 741, timer IC555

Software Requirements: LTSpice

Sr. No.	Detailed Lab/Tutorial Description
1	To study input and output characteristics of CE configuration
2	Analyze Integrator using op-amp IC 741
3	Design Monostable Multivibrator using IC 555.
4	To study EMOSFET biasing circuits..

5	To study BJT as CE amplifier and calculate its voltage gain
6	To study frequency response of a multistage amplifier.
7	Design inverting, non-inverting amplifier and buffer using IC 741
8	Design Wein bridge and RC phase shift Oscillator using op-amp IC 741
9	Simulation experiment on drain and transfer characteristics of JFET
10	Simulation experiment on multistage amplifier.
11	Design High Voltage High Current voltage regulator using IC 723.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment :

At least 8 experiments covering the entire syllabus of AEC should be set to have well predefined inference and conclusion. Simulation experiments are also encouraged. Minimum 3 Simulation Experiments covering the entire syllabus must be performed during the "Laboratory session batch wise". The experiments should be student centric and attempt to make experiments more meaningful, interesting and innovative. Term work assessment must be based on the overall performance of the student with every experiment and assignments are graded from time to time.

2. Oral/Viva Assessment:

The oral examination will be based on the entire syllabus.(10 marks for performance and 15 marks for oral)

Books:

1. Donald A. Neamen, "Electronic Circuit Analysis and Design", TATA McGraw Hill, 2nd Edition.
2. Ramakant A. Gayakwad, "Op-Amps and Linear Integrated Circuits", Pearson Prentice Hall, 4th Edition.

		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 204	Digital Circuits & System Design	40	40	40	60	25	--	25	150

Prerequisite: Physics of Std 11th, 12th and FE - Basic Electrical & Electronics Engineering

Course Objectives:

1. To understand various number systems & codes and to introduce students to various logic gates, SOP, POS form and their minimization techniques.
2. To teach the working of combinational circuits, their applications and implementation of combinational logic circuits using MSI chips.
3. To teach the elements of sequential logic design, analysis and design of sequential circuits.
4. To understand various counters and shift registers and its design using MSI chips.
5. To explain and describe various logic families, their interfacing and Programmable Logic Devices.
6. To train students in writing programs with VHDL hardware description languages.

Course Outcomes:

After successful completion of the course students will be able to

1. Perform code conversion and able to apply Boolean algebra for the implementation and minimization of logic functions.
2. Analyze, design and implement Combinational logic circuits.
3. Analyze, design and implement Sequential logic circuits.
4. Design and implement various counter using flip flops and MSI chips.
5. Understand TTL & CMOS logic families, PLDs, CPLD and FPGA.
6. Understand basics of VHDL Hardware Description Language and its programming with combinational and sequential logic circuits.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
---------	--------	------------------	------

1.	Logic Gates and Boolean Algebra	Digital logic gates, Realization using NAND, NOR gates, Boolean Algebra, De Morgan's Theorem, SOP and POS representation, K Map up to four variables.	04
2.	Combinational Circuits using basic gates as well as MSI devices	Arithmetic Circuits: Half adder, Full adder, Ripple carry adder, Carry Look ahead adder, Half Subtractor, Full Subtractor, multiplexer, cascading of Multiplexer, demultiplexer, decoder, Comparator (Multiplexer and demultiplexer gate level upto 4:1). MSI devices: IC7483, IC74151, IC74138, IC7485.	07
3.	Elements of Sequential Logic Design	Sequential Logic: Latches and Flip-Flops. RS, JK, Master slave flip flops, T & D flip flops with various triggering methods, Conversion of flip flops Counters: Asynchronous, Synchronous Counters, Up Down Counters, Mod Counters, Ring Counter, Twisted ring counter, Shift Registers, Universal Shift Register.	07
4.	Sequential Logic Design	Sequential Logic Design: Mealy and Moore Machines, Clocked synchronous state machine analysis, State reduction techniques (inspection, partition and implication chart method) and state assignment, sequence detector, Clocked synchronous state machine design. Sequential logic design practices: MSI counters (7490, 7492, 7493, 74163, 74169) and applications, MSI Shift registers (74194) and their applications.	07
5.	Logic Families and Programmable Logic Devices	Logic Families: Types of logic families (TTL and CMOS), characteristic parameters (propagation delays, power dissipation, Noise Margin, Fan-out and Fan-in), transfer characteristics of TTL NAND (Operation of TTL NAND gate), CMOS Logic: CMOS inverter, CMOS NAND and CMOS NOR, Interfacing CMOS to TTL and TTL to CMOS. Programmable Logic Devices: Concepts of PAL and PLA. Simple logic implementation using PAL and PLA, Introduction to CPLD and FPGA architectures.	07
6.	Introduction to VHDL	Design of Combinational circuits using VHDL: Introduction to Hardware Description Language, Core features of VHDL, data types, concurrent and sequential statements, data flow, behavioral, structural architectures, subprograms, Examples like Adder, subtractor, Multiplexers, De-multiplexers, decoder. Design of Sequential circuits using VHDL: VHDL code for flip flop, counters.	07

DETAILED LAB SYLLABUS:

Hardware Requirements: Hardware Kits

Software Requirements: VHDL simulation software

Sr. No.	Detailed Lab/Tutorial Description
1	Implementation of Asynchronous counter using MSI counter IC and flip flops
2	Implementation of synchronous counter using MSI counter IC and flip flops

3	Conversion of Flip flops.
4	Application of Universal Shift Register.
5	Design and implement Mealy machine
6	Design and implement Moore machine
7	Design sequence detector using Flip Flop
8	VHDL program for Combinational circuits
9	VHDL program for sequential circuits
10	VHDL program for Mealy and Moore machines.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessment:

1.Term work Assessment:

At least 6 experiments covering the entire syllabus of DCSD should be set to have well predefined inference and conclusion. The experiments should be student centric and attempt should be made to make experiments more meaningful, interesting. Simulation experiments are also encouraged. Experiments must be graded from time to time. The grading and term work assessment should be done based on this scheme. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus. Equal weightage should be given to laboratory experiments and while assigning term work marks.

2.Oral/Viva Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Oral exam will be based on the entire syllabus.

Books:

		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 205	Data Structures and Algorithms	40	40	40	60	25	--	25	150

Prerequisite: C Programming

Course Objectives:

1. To teach concept and implementation of linear and nonlinear data structures.
2. To analyze various data structures and select the appropriate one to solve a specific real-world problem.
3. To introduce various techniques for representation of the data in the real world.

Course Outcomes:

After successful completion of the course students will be able to

1. Students will be able to implement linear and Non-Linear data structures.
2. Students will be able to handle various operations like searching, insertion, deletion and traversals on various data structures.
3. Students will be able to explain various data structures, related terminologies and its types.
4. Students will be able to choose appropriate data structure and apply it to solve problems in various domains.
5. Students will be able to analyze and Implement appropriate sorting and searching techniques for a given problem.
6. Students will be able to demonstrate the ability to analyze, design, apply and use data structures to solve engineering problems and evaluate their solutions.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Introduction to Data Structures	Introduction to Data Structures, Types of Data Structures – Linear and Nonlinear, Operations on Data Structures, Concept of array, Static arrays vs Dynamic Arrays, structures, Array Data Type:- Single and Multidimensional Arrays. Introduction to	04

		Analysis of Algorithms, characteristics of algorithms, Time and Space complexities, Asymptotic notations.	
2.	Stack and Queue	Stack: Basic Stack Operations, Representation of a Stack using Array, Applications of Stack – Well form-ness of Parenthesis, Infix to Postfix Conversion and Postfix Evaluation. Queue: Operations on Queue, Array Implementation of Queue, Types of Queue-Circular Queue, Priority Queue, Dequeue, queue-Round Robin Algorithm, Applications of Queue:- Interrupt handling	07
3.	Linked List	Representation of Linked List, Linked List v/s Array, Types of Linked List - Singly Linked List (SLL), Doubly Linked List, Circular Linked List, Operations on Singly Linked List: Insertion, Deletion, reversal of SLL, Print SLL. Implementation of Stack and Queue using Singly Linked List. Singly Linked List Application-Documenting a sequence of heterogeneous records.	08
4.	Tree	Tree Terminologies, Binary Tree, Types of Binary Tree, Binary Tree Representation: Array and Linked Representation of Binary trees, Binary Tree Traversals algorithms: In-order, Pre-order, Post-order, Binary Search Tree Operations on Binary Search Tree, Applications of Binary Tree - Expression Tree, Huffman Encoding.	07
5.	Graph	Graph Terminologies, Representation of graph (Adjacency matrix and adjacency list), Graph Traversals – Depth First Search (DFS) and Breadth First Search (BFS), Connected Component, Spanning Trees, Minimum Cost Spanning Trees: Prims and Kruskal's algorithm, Application of Graph – Topological Sorting.	06
6.	Sorting and Searching	Searching: Linear search, Random search, Binary search, Hashing, Applications:- Finding a root of a general quadratic polynomial over a finite interval. Sorting: Bubble, Insertion, selection, Quick Sort, Merge Sort, Two Way Merge Sort, Counting sort, Comparison of sorting Techniques based on their complexity, A few practical considerations for in-memory sorting	07

DETAILED LAB SYLLABUS:

Software Requirements: Turbo C/Code Blocks, Windows/Linux

Sr. No.	Detailed Lab/Tutorial Description
1	Program to reverse a list of given numbers using stack ADT.
2	Program to Check whether parentheses are balanced or not.
3	Convert an Infix expression to Postfix expression using stack ADT.
4	Program to evaluate Postfix Expression using Stack ADT.
4	Program to implement Linear Queue ADT using array.
5	Program to implement Stack/Queue using linked list.
6	Program to implement Circular Queue ADT using array.
7	Program to implement Priority Queue ADT using array.
8	Program to implement Binary Search Tree ADT using Linked List.

9	Program to implement searching algorithms -Linear search, Binary search.
10	Implement Depth First Search and Breadth First Search Graph Traversal technique.
11	Program to implement sorting algorithms (any 2)- bubble, selection, insertion, merge, quick.
12	Implementation of Prim's and Kruskal's algorithms for finding out Minimum Cost Spanning Tree of a given input graph. For eg. Finding out electricity distribution cable network with minimum overall cable length.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment :

The experiments should be student centric and attempt to make experiments more meaningful, interesting and innovative. Term work assessment must be based on the overall performance of the student with every experiment and assignments are graded from time to time.

2. Oral/Viva Assessment:

The oral examination will be based on the entire syllabus.

		1	2	Average						
EC 206	Human Values and Social Ethics	--	--	--	--	50	--	--	50	

Prerequisite: Should have respect for justice and be able to reflect on one's personal beliefs and values.

Course Objectives:

1. To enable learners to understand the core values that shape the ethical behaviour of a professional.
2. To develop an awareness on the different ethical dilemmas at the work place and society.
3. To inculcate the ethical code of conduct in writing technical article and technology development.
4. To internalize ethical principles and code of conduct of a good human being at home, society and at work place.

Course Outcomes:

After successful completion of the course students will be able to

1. Learners will be able to recognize the relation between ethics and values pertinent for an engineering professional.
2. Learners will be able to exercise the responsibility for establishing fair and just processes for participation and group decision making
3. Learners will be able to demonstrate an awareness of self-held beliefs and values and how they are altered in interactions with others.
4. Learners will be able to acquire the writing skills necessary to analyse data from research and attribute the source with proper citation.
5. Learners will be competent to incorporate values and ethical principles in social and professional situations.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Ethics and Values	Meaning & Concept of Ethics Difference between Ethics and Values Ethical code of conduct	03
2.	Professional Ethics	Professional Ethics vs Personal ethics Components of professional ethics Professional values and its importance	05
3.	Ethics and Society	Relevance of values and ethics in social work Ethical dilemmas Values and ethical principles of social work <ul style="list-style-type: none"> ● Service ● Dignity and worth of a person ● Importance of Human relationships ● Integrity ● Competence ● Social Justice 	04
4.	Ethics in Technical writing	Documenting sources Presentation of Information Ethics & Plagiarism	07
5.	Ethics and Technology Development	Risk management and Individual rights Moral issues in development and application of technology Privacy/confidentiality of information Managing Technology to ensure fair practices	07

Assessments:

Termwork : 50 marks (Continuous evaluation)

EC 291	Mini Project I (Java Programming)		1 [#] +2	--	-	1	--	1

1[#] to be taken class wise

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment (Review)			End Sem. Exam					
		1(10)	2(10)	Average						
EC 291	Mini Project I (Java Programming)	-	-	-	-	25	25	--	50	

Course Objectives:

1. To make students familiar with Methods, Constructors, Arrays, Multithreading and Applet in java
2. To familiarize the students to use a programming language to resolve problems.
3. To familiarize the process of solving the problem in a group.
4. To acquaint with the process of applying basic engineering fundamentals to attempt solutions to the problems.

Course Outcomes:

After successful completion of the course students will be able to

1. Understand Java Programming.
2. Develop a program that efficiently implements the features and packaging concept of java.
3. Implement Exception handling and Applets using Java.
4. Identify problems based on societal /research needs , write code using java and demonstrate capabilities of self-learning in a group, which leads to lifelong learning.
5. Analyse the impact of solutions in societal and environmental context for sustainable development.
6. Use standard norms of engineering practices

DETAILED SYLLABUS:

Sr. No.	Module	Detailed Lab/Tutorial Description	No of Hours
1	Introduction to Java	Java History, Java Features, Java Virtual Machine, Data Types and Size (Signed vs. Unsigned, User Defined vs. Primitive Data Types, Explicit Pointer type)	3

		Installing Java, Java Program Development, Java Source File Structure, Compilation, Executions.	
2	Object-Oriented Programming	Class Fundamentals, Object & Object reference, Creating and Operating Objects, Constructor & initialization code block, Access Control, Modifiers, Abstract Class & Interfaces Defining Methods, Argument Passing Mechanism.	6
3	Classes, and Inheritance	Use and Benefits of Inheritance in OOP, Types of Inheritance in Java, Inheriting Data members and Methods, Role of Constructors in inheritance	6
4	Package	Organizing Classes and Interfaces in Packages, Package as Access Protection, Defining Package, Classpath, Setting for Packages, Making JAR Files for Library Packages Import and Static Import Naming Convention For Packages.	4
5	Exception Handling	The Idea behind Exception, Exceptions & Errors, Types of Exception, Control Flow In Exceptions, JVM reaction to Exceptions, Use of try, catch, finally, throw, throws in Exception Handling, In-built and User Defined Exceptions	3
6	Applet	Applet: Applet Fundamental, Applet Architecture, Applet Life-Cycle, Applet Skeleton, Applet, and Application Program.	4

Guidelines for Mini Project

- Students shall form a group of 3 to 4 students, while forming a group shall not be allowed less than three or more than four students, as it is a group activity.
- Students should do surveys and identify needs, which shall be converted into problem statements for mini projects in consultation with faculty supervisor/head of department/internal committee of faculties.
- Students shall submit an implementation plan in the form of Gantt/PERT/CPM chart, which will cover weekly activity of mini projects.
- A log book to be prepared by each group, wherein the group can record weekly work progress, guide/supervisor can verify and record notes/comments.
- Faculty supervisor may give inputs to students during mini project activity; however, focus shall be on self-learning.
- Students in a group shall understand the problem effectively, propose multiple solutions and select the best possible solution in consultation with the guide/supervisor. Students shall convert the best solution into a working model using various components of their domain areas and demonstrate. The solution to be validated with proper justification and report to be compiled in standard format.

Lab Assessment:

1.Term work Assessment:

Marks awarded by guide/supervisor based on log book	: 10
Marks awarded by review committee	: 10
Quality of Project report	: 05

2.Oral/Practical Assessment:

Practical and Oral exam will be based on the project implemented in the semester.

Software Requirements:

Netbeans:<https://netbeans.org/downloads/>

Adm. Y. 21-22

Bachelor of Technology
In
Electronics & Computer
Science
(Semester IV)

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 208	Engineering Mathematics IV	03	--	01	03	--	01	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 208	Engineering Mathematics IV	40	40	40	60	25	--	--	125	

Prerequisite: Engineering Mathematics I, Engineering Mathematics II and Engineering Mathematics III.

Course Objectives:

1. Understand the basic techniques of statistics like correlation, regression, and curve fitting for data analysis, Machine learning, and AI.
2. Acquaint with the concepts of probability, random variables with their distributions and expectations.
3. Understand the concepts of vector spaces used in the field of machine learning and engineering problems.
4. Introduce students to equivalence relations, recurrence relations, Introduce students to graphs, and trees.
5. Understand the concepts of complex integration.
6. Use concepts of vector calculus to analyze and model engineering problems.

Course Outcomes:

After successful completion of the course students will be able to

1. Apply the concept of Correlation and Regression to the engineering problems in data science, machine learning, and AI.
2. Illustrate understanding of the concepts of probability and expectation for getting the spread of the data and distribution of probabilities.
3. Apply the concept of vector spaces and orthogonalization process in Engineering Problems.
4. Express recursive functions of other subjects like Data Structures as recurrence relation, Ability to understand use of functions, graphs and trees in programming applications.
5. Use the concepts of Complex Integration for evaluating integrals, computing residues & evaluate various contour integrals
6. Apply the concepts of vector calculus in real life problems.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Correlation, Regression and Curve Fitting,	Karl Pearson's Coefficient of correlation (r), Spearman's Rank correlation coefficient (R), Lines of regression, Fitting of first and second degree curves.	06
2.	Probability, Probability Distributions	Conditional probability, Total Probability and Baye's Theorem, Discrete and Continuous random variables, Probability mass and density function, Probability distribution for random variables, Expectation, Variance, Binomial distribution, Poisson distribution, Normal distribution	06
3.	Linear Algebra : Vector Spaces	Vectors in n-dimensional vector space, norm, dot product, The Cauchy Schwarz inequality, Unit vector ; Linear combinations, linear Dependence and Independence, QR decomposition ; Orthogonal projection, Orthonormal basis, Gram-Schmidt process for vectors ; Vector spaces over real field, subspaces.	06
4.	Graphs and Trees	Types of Graphs, Homomorphism And Isomorphism Of Graphs, Subgraphs, Types of Graphs, Complement of Graph, Connected Graphs, Eulerian And Hamiltonian Graphs, Trees, Binary Trees, Minimum Spanning Tree, Kruskal's Algorithm	08
5.	Lattice Theory & Recurrence relation	Poset, Hasse Digram, Isomorphism, Extremal Elements of Posets, Lattices, Special Types of Lattices, Solving Recurrence relation, Linear Homogenous Recurrence relation with constant coefficients, Non-Homogenous Recurrence relation	06
6.	Complex Integration and Vector Integration	Line Integral, Cauchy's Integral theorem for simple connected and multiply connected regions (without proof), Cauchy's Integral formula (without proof). Taylor's and Laurent's series (without proof). Definition of Singularity, Zeroes, poles of $f(z)$, Residues, Cauchy's Residue Theorem (without proof) Vector integral: Line Integral, Green's theorem in a plane (Without Proof), Stokes' theorem (Without Proof) only evaluation. Gauss' divergence	07

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.

- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.

Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessment:

Term work Assessment:

Term work should consist of all the work done in tutorials and assignments. The final certification and acceptance of term work ensures satisfactory performance throughout in all the assigned work.

		1	2	Average					
EC 209	Instrumentation & Control System	40	40	40	60	--	---	----	100

Prerequisite: Applied Mathematics(Laplace Transform, Ordinary differential equations), Applied Physics, Basic Electrical Engineering

Course Objectives:

1. To develop the ability to model control systems and determine their time response and frequency response.
2. To develop the ability to analyze stability of control systems.
3. To develop the ability to understand various types of sensors, transducers and data acquisition systems.

Course Outcomes: After successful completion of the course students will be able to

1. Derive the transfer functions for any given control systems.
2. Analyze the performance of control systems based on the time domain and frequency domain specifications.
3. Evaluate the stability of the control systems in time domain and frequency domain.
4. Understand the working principle of sensors and transducers.
5. Explain various parameters of data acquisition systems.
6. Describe instrument communication standards.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Introduction to Control System	Examples of control systems; open and closed loop systems; Servomechanism. Mathematical modeling of Electrical & Mechanical Systems; Transfer function model. Block diagram and Signal Flow Graph (SFG) representation of control systems; Block diagram reductions; Mason's gain formula.	08

2.	Time Response Analysis	Standard test input signals; time response of first and second order systems for standard test inputs; Transient response specification for second order system; Error constants and type of the system. Concept of stability; Routh-Hurwitz Criteria; Relative stability analysis; Root-Locus technique and construction of root-loci.	08
3.	Frequency Response Analysis	Introduction to frequency response; Frequency response plots: Polar plot and Bode plot; Stability margins in frequency domain, Nyquist stability criterion and stability analysis using Nyquist plot (Numericals not expected).	06
4.	Sensor and Transducers	Introduction to sensors and transducers. Various types of sensors. Various types of transducers and their principle of operation. Selection criteria of transducers. Displacement and pressure transducers: potentiometers, pressure gauges, Linear variable differential transducer (LVDT), strain gauges. Temperature transducers: working principle, ranges and applications of resistance temperature detectors (RTD), thermocouple and thermistor temperature transducers.	07
5.	Signal conditioning DAS and SCADA	Introduction to instrumentation systems, data acquisition system (DAS), use of DAS in Intelligent instrumentation system. Data logger, its types and applications. SCADA communication architecture, types, applications, open SCADA protocols. Introduction to Distributed Control system [D.C.S] and fibre optic instrumentation.	06
6.	Telemetry and Instrument communication standards	Introduction to telemetry, landline telemetry, radio telemetry and types of multiplexing. Instrument interfacing, Current loop, RS232/485, Field bus, Modbus GPIB, USB Protocol, and HART communication Protocol.	04

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.

Weightage of marks should be proportional to the number of hours assigned to each module.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 210	Database Management System	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 210	Database Management System	40	40	40	60	25	25	--	150	

Prerequisite: Data Structures

Course Objectives:

1. Develop entity relationship data model and its mapping to relational model
2. Learn relational algebra and Formulate SQL queries
3. Apply normalization techniques to normalize the database
4. Understand the concept of transaction, concurrency control and recovery techniques.

Course Outcomes:

After successful completion of the course students will be able to

1. Recognize the need of database management system
2. Design ER and EER diagram for real life applications
3. Construct relational models and write relational algebra queries.
4. Formulate SQL queries.
5. Apply the concept of normalization to relational database design.
6. Describe the concept of transaction, concurrency and recovery.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Introduction Database Concepts	Introduction, Characteristics of databases, File system v/s Database system, Data abstraction and data Independence, DBMS system architecture, Database Administrator	04
2.	Entity-Relationship Data Model	The Entity-Relationship (ER) Model: Entity types: Weak and strong entity sets, Entity sets, Types of Attributes, Relationship constraints: Cardinality and Participation,	06

3.	Relational Model and relational Algebra	Introduction to the Relational Model, relational schema and concept of keys. Relational Algebra-operators, Relational Algebra Queries.	07
4.	Structured Query Language (SQL)	Overview of SQL, Data Definition Commands, Integrity constraints: key constraints, Domain Constraints, Referential integrity , check constraints, Data Manipulation commands, Data Control commands, Set and string operations, aggregate functions, group by, having, Views in SQL, joins, Nested and complex queries, Triggers.	08
5.	Relational-Database Design	Concept of normalization, Function Dependencies, First Normal Form, 2NF, 3NF, BCNF.	06
6.	Transactions Management and Concurrency and Recovery	Transaction concept, Transaction states, ACID properties, Transaction Control Commands, Concurrent Executions, Serializability-Conflict and View, Concurrency Control: Lock-based, Timestamp-based protocols, Recovery System: Log based recovery, Deadlock handling.	07

DETAILED LAB SYLLABUS:

Hardware Requirements: 2GB RAM

Software Requirements: SQL server (Oracle/MySQL/PostgreSQL)

Sr. No.	Detailed Lab/Tutorial Description
1	Identify the case study and detail statement of the problem. Design an Entity-Relationship(ER) / Extended Entity-Relationship (EER) Model.
2	Mapping ER/EER to Relational schema model.
3	Create a database using Data Definition Language (DDL) and apply integrity constraints for the specified System.
4	Apply DML Commands for the specified system.
5	Perform Simple queries, string manipulation operations and aggregate functions.
6	Implement Views and Join operations.
7	Perform Nested and Complex queries
8	Perform DCL and TCL commands.
9	Implement function and trigger.
10	Demonstrate Database connectivity
11	Implementation and demonstration of Transaction and Concurrency control techniques using locks.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.

Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1.Term work Assessment:

Term work should have min. 8 experiments. Journal must include at least 2 assignments on content of theory and practical of “Database Management System”. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Total 25 Marks (Experiments: 15-marks, Attendance Theory & Practical: 05-marks, Assignments: 05-marks).

2.Oral/ Practical Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus.

Books:

1. Korth, Silberchatz, Sudarshan, Database System Concepts, 6thEdition, McGraw Hill.
2. Elmasri and Navathe, Fundamentals of Database Systems, 5thEdition, Pearson Education.
3. Raghu Ramkrishnan and Johannes Gehrke, Database Management Systems, TMH.

		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 211	Microprocessor & Microcontroller	40	40	40	60	25	--	--	125	

Prerequisite: Digital System Design

Course Objectives:

1. To understand the basic concepts of Microcomputer systems.
2. To understand the architecture of the 16-bit Microprocessor 8086.
3. To understand the architecture and instruction set of 8-bit Microcontroller 8051.
4. To write assembly and C programs for 8051 Microcontroller.
5. To understand peripheral devices and their interfacing with Microcontroller.
6. To understand various applications of microcontroller.

Course Outcomes:

After successful completion of the course students will be able to

1. Understand the architecture and aspects of 8086 microprocessor and 8051 microcontroller.
2. Identify the features of various microcontroller
3. Interface microcontroller with hardware for given application
4. Write and execute assembly and C language programs(software) for given application
5. Explain the Interrupt system, operation of Timers/Counters and Serial port of 8051
6. Develop small microcontroller based applications.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Introduction to Microprocessor System.	1.1 Microprocessor based system: CPU, I/O Devices, Clock, Memory, Concept of Address, Data and Control Bus, 1.2 Introduction to 8086 Microprocessor: 8086 architecture & 8086 pin description in detail(with Minimum and Maximum mode pins). 1.3 Major features of 8086 microprocessor. 1.4	07

		pipelined operation 1.5 Programmer's Model & Memory Segmentation. 1.6 Read and Write bus cycle of 8086.	
2	8051 Microcontroller Architecture	2.1 Concept of Harvard & Von Neumann Architecture 2.2 Comparison between Microprocessor and Microcontroller 2.3 8051 Features, its architecture (ALU, PC, DPTR, PSW, Internal RAM, Internal ROM, Latch, SFRs, General purpose registers, Timer/Counter, Interrupt, Ports) and Functions of each pin of 8051 2.4 Memory organization (Program and Data memory Map)	05
2.	8051 Microcontroller Hardware	3.1 Stack, Stack Pointer and Stack operation, 3.2 Timers/Counters logic diagram and its operation in various modes, 3.3 I/O Ports structure: Port 0, Port 1, Port2, Port 3. 3.4 Serial Communication in various modes 3.5 Interrupt structure with vector address, priority and operation 3.6 Modes of operation: Power down and idle mode	07
3.	8051 Microcontroller programming	4.1 Addressing modes (Immediate, Register, Direct, Indirect, Indexed, Relative and bit addressing.) 4.2 Assembler directives of 8051. 4.3 Instruction Set: Data Transfer, Arithmetic, Logical, Branching, and Machine Control 4.4 Programming concepts: Looping , Counting, sorting and Indexing, Data manipulation, Masking 4.5 Basic Programs related to: arithmetic, logical, Branch	08
4.	8051 Microcontroller hardware configuration and Programming	5.1 Configuration and programming of I/O Port 5.2 Configuration and programming of interrupts using SFRs: IE,IP 5.3 Configuration and programming of Timer/Counter using SFRs: TMOD, TCON, THx, TLx 5.4 Serial port configuration and programming	06
5.	8051 Interfacing & Applications	6.1 Display interfacing: 7-segment LED display, 16x2 generic alphanumeric LCD display. 6.2 Analog devices interfacing: 8-bit ADC and DAC 6.3 Motor interfacing: dc motor, stepper motor 6.4 Waveform generation	06

DETAILED LAB SYLLABUS:

Lab Prerequisite: Digital System Design

Hardware Requirements: Experiments can be conducted on Assembler, Emulator

Software Requirements: Hardware kits

Sr. No.	Detailed Lab/Tutorial Description
1	Introduction to 8086 microprocessor kit and assembler.
2	To write an assembly language program to perform Arithmetic and Logical Operations using 8051 microcontroller.
3	To write an assembly language program to transfer of data bytes between Internal and External Memory using 8051 microcontroller.
4	To write an assembly language program to perform experiments based on General Purpose Input-Output & Timers.
5	Program for Serial communication of 8051 using UART.

6	Programs for Interfacing of Stepper Motor/DC motor with 8051 microcontroller.
7	Programs for generating waveform (Square, Trinagular,Sine wave) with 8051 microcontroller.
8	Programs for Interfacing of LCD with 8051
9	Mini project based on any application related to 8051 microcontroller.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessment:

1.Term work Assessment:

08 Experiments covering the entire syllabus must be given during the “Laboratory session batch wise”. Computation/simulation based experiments are also encouraged. The experiments should be student centric and attempts should be made to make experiments more meaningful, interesting and innovative. Application oriented one mini-project can be conducted for a maximum batch of at least 04 students.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 212	Analysis of Algorithms	03	02	-	03	01	-	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 212	Analysis of Algorithms	40	40	40	60	25	25	--	150

Prerequisite: Data Structure

Course Objectives:

1. To conceptualize learners with mathematical models for analysis of algorithm
2. To understand and solve problems using various algorithmic design strategies
3. To apply algorithm strategies to real life problems

Course Outcomes:

After successful completion of the course students will be able to

1. Analyse space and time complexity of various algorithms
2. Describe, Apply and Analyse design strategy and complexity for optimization problems
3. Describe, Apply and Analyse design and complexity of Backtracking
4. Describe, Apply and Analyse design and complexity of Branch and Bound
5. Describe, Apply and Analyse divide and conquer approach
6. Define and give examples complexity classes P and NP

DETAILED THEORY SYLLABUS:

Sr. No	Module	Detailed Content	Hrs.
1.	Introduction to algorithms and analysis of algorithm	Notion of an Algorithm, Brief introduction:-algorithm design paradigms, Algorithm analysis :- Asymptotic notations $O, \Omega, \theta, \omega, o$ and their properties, notions of time and space complexity, best case, worst case and average case analysis of algorithms, Brief introduction:- randomized algorithms and notion of expected time complexity	07
2.	Divide and Conquer Approach	Recurrence equations, Solution of recurrence equations:-Recurrence Tree method, Master Theorem, General structure of a Divide and Conquer algorithm, Finding closest pair of points in 2D plane, Merge/Quick sort.	06

3.	Dynamic Programming Approach	General method, applications-Matrix chain multiplication, Optimal binary search trees, Single Source Shortest Path:- Bellman-Ford algorithm, All pairs shortest path problem:-Floyd-Warshall, Travelling salesperson problem.	08
4.	Greedy Method Approach	General method, Applications-Job sequencing with deadlines, fractional knapsack problem, Minimum cost spanning trees, Single source shortest path problem:- Dijkstra's algorithm	08
5.	Backtracking and Branch-and-bound	Backtracking: General method, graph coloring Branch and Bound: General method, applications - 0/1 knapsack problem- LC Branch and Bound solution, FIFO Branch and Bound solution.	05
6.	Selected algorithms and Non-deterministic polynomial time algorithms	Number Theoretic:- Euclid's algorithm for GCD and its time complexity analysis, Graph Theoretic:- Johnson's algorithm for All pair Shortest Path problem Computational Complexity classification of problem: Brief introduction:- non deterministic algorithms, Complexity classes:- P, NP.	05

DETAILED LAB SYLLABUS:

Lab Prerequisite:

Hardware Requirements:

Software Requirements: C/Python/C++

Sr. No.	Detailed Lab/Tutorial Description
1	Implement Merge and Quick sort algorithms.
2	Implement Bellman-Ford algorithm.
3	Implement Floyd-Warshall algorithm.
4	Implement Dijkstra's algorithm for the single source shortest path problem on a given weighted graph.
5	Implement Prim/Kruskal algorithm for finding a minimum cost spanning tree of a given input graph.
6	Implement a backtracking based algorithm for vertex coloring of a given graph.
7	Implement Johnson's algorithm for shortest paths, for a given graph.
8	Implement a randomized algorithm for searching an element in an unsorted array and derive its expected time complexity.
9	Implement Euclid's algorithm to calculate GCD of a given set of $n > 2$ natural numbers.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.

- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Termwork Assessment:

Term work should consist of all the work done in tutorials and assignments. The final certification and acceptance of term work ensures satisfactory performance throughout all the assigned work.

2. Oral/Practical Assessment: Practical & Oral Exams should be conducted based on syllabus and practicals conducted.

Text Books:

1. Ellis Horowitz, Satraj Sahni and Rajasekharam, Fundamentals of Computer Algorithms, Galgotia publications pvt. Ltd.
2. Parag Himanshu Dave, Himanshu Bhalchandra Dave, Design and Analysis Algorithms - Publisher: Pearson

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 213	System Software & Operating Systems	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 213	System Software & Operating Systems	40	40	40	60	25	--	--	125	

Prerequisite: Basic knowledge of Data structures and Computer architecture, Any programming language

Course Objectives:

1. To understand the role and functioning of various system programs over application programs.
2. To understand basic concepts and designing of assembler and Macro processor
3. To understand the role of loaders, linkers and Compilers.
4. To introduce basic concepts and functions of operating systems.
5. To understand the concepts and implementation of Process Management, IPC, memory management policies, File and I/O Management.

Course Outcomes:

After successful completion of the course students will be able to

1. Identify the relevance of different system programs.
2. Identify the need of assembler and macro processor design.
3. Understand the functions of linkers, loaders and compilers.
4. Understand the role of Operating System in terms of process, memory, file and I/O management.
5. Apply and analyse the concept of a process, process scheduling and synchronization
6. Apply and analyze different techniques of memory management, file and I/O management.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs.
1.	Introduction to System Software	Concept of System Software, Introduction to various system programs such as Assembler, Macro processor, Loader, Linker, Compiler, Interpreter, Device Drivers, Operating system, Editors, Debuggers.	03
2.	Assemblers and Macro Processors	Elements of Assembly Language programming, Assembler Design: Introduction to single pass Assembler Design for Hypothetical machines, data structures used. Macro definition and call, parameterized, conditional Macro, Design of Two pass macro processor for Hypothetical machines, data structures used.	08
3.	Linkers, Loaders and Compilers	Functions of loaders, Absolute loader/Compile and Go loader, Phases of compilers: Lexical Analysis, Syntax analysis, SR Parser, Introduction to semantic analysis, Intermediate Code Generation: Types of Intermediate codes, Code optimization techniques, Introduction to Code Generation.	08
4.	Overview of operating System	Introduction, Objectives, Functions and Types of Operating System, Operating System Services and Interface; Operating system structures: Layered, Monolithic and Microkernel.	04
5.	Process Management	Concept of a Process, Process States, Operation on Process Uniprocessor Scheduling-Types: Preemptive and Non-preemptive, scheduling algorithms Threads: Definition and Types, Concept of Multithreading, Inter-Process Communication, Process Synchronization, Mutual Exclusion: ,Semaphores, Producer Consumer problem, Principles of Deadlock: Conditions Deadlock Handling Mechanism.	08
6.	Memory Management and I/O Management	Basic Concepts of Memory Management; Memory Allocation Techniques, Paging, TLB, Segmentation, Virtual Memory; Demand Paging, Page Replacement Algorithms, I/O Devices, Disk Scheduling algorithm: FCFS, SSTF, SCAN, CSCAN, LOOK, C- LOOK, Linux I/O.	08

DETAILED LAB SYLLABUS:

Lab Prerequisite: Any programming language, Knowledge on Operating system principles

Hardware Requirements: 2GB RAM, PC i3 processor and above

Software Requirements: C, IDE/Compiler (Geany). Linux Operating System

Sr. No.	Detailed Lab/Tutorial Description
1	Implementation of File handling program to check whether entered input is Mnemonic or Pseudo opcode or symbol.
2	Design and Development of Simple Macro Processor
3	Implementation of Lexical analysis phase of compilers
4	Implementation of Intermediate code generation phase of compilers

5	Implementation of code generation phase of compilers
6	Explore usage of basic and advanced Linux Commands
7	Explore the file and process management system calls.
8	Create a child process in Linux using the fork system call. From the child process obtain the process ID of both child and parent by using getpid and getppid system call.
9	Write a program to demonstrate the concept of non-preemptive and preemptive scheduling algorithms.
10	Write a program in C demonstrate the concept of page replacement policies

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

Term work should consist of 10 experiments. Journal must include at least 2 assignments on content of theory and practical of “System Software & Operating Systems”. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Total 25 Marks (Experiments: 15-marks, Attendance Theory & Practical: 05-marks, Assignments: 05-marks).

Text Books:

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 292	Mini Project II (Python Programming)	--	1#+2	--	--	01	--	01

1# to be taken class wise

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment(Review)			End Sem. Exam				
		1(10)	2(10)	Avg					
EC 292	Mini Project II (Python Programming)	--	--	--	--	25	25	--	50

Course prerequisite:

Basics of Python Programming, Skill Lab: C++ and Java Programming.

Course Objectives:

1. Infer the Object-oriented Programming concepts in Python.
2. Formulate GUI Programming and Database operations in Python.
3. Explore file and database handling in Python.
4. Identify problems based on societal /research needs.
5. Develop applications based on machine learning, deep learning using Python.
6. Examine methodology in detail about impact of solutions in societal and environmental context for sustainable development.

Course Outcomes:

After successful completion of the course student will be able to:

1. Interpret object-oriented programming in Python
2. Design GUI Applications in Python.
3. Handle Database operations in Python .
4. Identify problems based on societal /research needs , write code using Python and demonstrate capabilities of self-learning in a group, which leads to lifelong learning.
5. Develop machine learning applications using Python.
6. Analyze the impact of solutions in societal and environmental context for sustainable development.

DETAILED SYLLABUS:

Module No.	Unit No.	Topics	Hrs.
1.0		Introduction to Python - a recap	3
	1.1	Introduction to Python, strings, Lists, Tuples, Strings, Lists, Tuples, Dictionaries, Sets	
	1.2	Functions and file handling , Object oriented programming	
2.0		Basic databases using Python	4
	2.1	Introduction to Pandas, Pandas data structures – Series and DataFrame , Data wrangling using pandas, Loading a dataset into a dataframe	
	2.2	Selecting Columns from a dataframe, Selecting Rows from a dataframe, Adding new data in a dataframe, Deleting data from a dataframe	
3.0		Numpy, Matplotlib, Seaborn, Scipy,	5
	3.1	Introduction to Numpy, Creating and Printing Narray, Class and Attributes of Narray, Basic operation, Copy and view, Mathematical Functions of Numpy.	
	3.2	Introduction to Matplotlib, Scatter plot, Line plot, Bar chart, Histogram, Introduction to seaborn and scipy	
4.0		GUI and web Framework in Python	5
	4.1	Introduction to GUI building libraries, Tkinter Programming, Flask Framework, Web application using Flask, working with Postman, Debugging Calculator application	
5.0		Basic image processing using Python	5
	5.1	Introduction to digital image processing, Basic operations on an image, Crop, Scale, Rotate, Flip, Changing contrast, brightness and color, Edge detection, blur, sharpening	
6.0		Demo Projects	4
	6.1	Face detection, Helmet detection, Image scraping and creating a own dataset from web, any two Flask End-to-End Projects

Suggested list of sample course projects:

1. Human Activity Recognition with Video Classification
2. Instagram filters using Python

3. Drowsiness detection
4. Image caption generator
5. Speed typing Test using Python
6. Train announcement system using python
7. Develop classification model using freely available datasets
8. Develop python application for sentiment analysis
9. Build an app that will track the number of calories that you eat every day.
10. Create a currency convertor using python
11. Create an alarm clock
12. Create a mail sending program
13. Review Scraper
14. Image Scraper and deployment on Heroku, AWS and Azure
15. Content aggregator
16. Face mask detection
17. Music player
18. Plagiarism Checker
19. Tic Tac Toe project.
20. Fake News Detection project.
21. Parkinson's Disease Detection project.
22. Color Detection project
23. Speech Emotion Recognition project.
24. Breast Cancer Classification project.
25. Age and Gender Detection project.
26. Calender GUI

Guidelines for Mini Project

1. Students shall form a group of 3 to 4 students, while forming a group shall not be allowed less than three or more than four students, as it is a group activity.
2. Students should do surveys and identify needs, which shall be converted into problem statements for mini projects in consultation with faculty supervisor/head of department/internal committee of faculties.
3. Students shall submit an implementation plan in the form of Gantt/PERT/CPM chart, which will cover weekly activity of mini projects.
4. A log book to be prepared by each group, wherein the group can record weekly work progress, guide/supervisor can verify and record notes/comments.
5. Distribution of Term work marks for both semesters shall be as below;
6. Marks awarded by guide/supervisor based on log book : 10
7. Marks awarded by review committee : 10
8. Quality of Project report : 05
9. Faculty supervisor may give inputs to students during mini project activity; however, focus shall be on self-learning.

10. Students in a group shall understand the problem effectively, propose multiple solutions and select the best possible solution in consultation with the guide/ supervisor. Students shall convert the best solution into a working model using various components of their domain areas and demonstrate. The solution to be validated with proper justification and report to be compiled in standard format.

Lab Assessment:

1.Term work Assessment:

- Marks awarded by guide/supervisor based on log book : 10
- Marks awarded by review committee : 10
- Quality of Project report : 05

2.Oral/Practical Assessment:

Practical and Oral exam will be based on the project implemented in the semester.

Software Requirements:

Python IDE: <https://www.python.org/downloads/>
<https://docs.anaconda.com/anaconda/navigator/>

Bachelor of Technology
In
Electronics & Computer
Science
(Semester V)

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 301	Signals and Systems	03	--	01	03	--	01	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 301	Signals and Systems	40	40	40	60	25	--	--	125	

Course Objectives:

1. To identify, classify and analyze various types of signals and systems.
2. To analyze time Domain analysis of continuous and discrete time signals and systems.
3. To Analyze the continuous and discrete time LTI signals and systems in frequency domain using Fourier Transform.
4. To analyze, formulate and solve problems on frequency domain analysis of continuous time systems using Laplace Transform.
5. To analyze, formulate and solve problems on frequency domain analysis of discrete time systems using Z- Transform.
6. To provide foundation of signal and system concepts to areas like communication, control and comprehend applications of signal processing in communication systems.

Course Outcomes: Upon successful completion students will be able to

1. Classify and analyze various types of signals and systems.
2. Determine convolution integral and convolution sum.
3. Analyze the continuous and discrete time signals and systems in frequency domain using Fourier Transform.
4. Analyze, formulate and solve problems on frequency domain analysis of continuous time systems using Laplace Transform.
5. Analyze, formulate and solve problems on frequency domain analysis of discrete time systems using Z- Transform.
6. Understand the concept of FIR and IIR system.

Prerequisite: Engineering Mathematics III

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction of Continuous and Discrete Time Signals and systems:	Introduction to Signals: Definition of Signals , Representation of continuous time signals and discrete time signals, Sampling theorem, sampling of continuous time signals Basic Elementary signals , Arithmetic	07

		operations on the signals- Time Shifting, Time scaling, Time Reversal of signals Classification of Continuous time signals and Discrete time signal Introduction to Systems: Definition of Systems , Classification of Continuous time systems and Discrete time systems, Applications of Signals and Systems	
2.	Time domain analysis of continuous time and discrete time systems	Linear Time Invariant (LTI) systems; impulse response, step response, Convolution integral and Convolution sum for analysis of LTI systems, properties of convolution integral/sum, Correlation of Signals: Auto-correlation and Cross correlation of Continuous time signals (Numericals not expected) and Discrete time signal.	06
3.	Fourier Analysis of Continuous and Discrete Time Signals and Systems	Fourier transform of periodic and non-periodic functions, Properties of Fourier Transform, Inverse Fourier Transform, Frequency Response: computation of Magnitude and Phase Response, Limitations of Fourier Transform	07
4.	Frequency domain analysis of continuous time system using Laplace transform	Definition of Laplace Transform (LT), Region of Convergence (ROC), Properties of Laplace transform, Inverse Laplace transform. Analysis of continuous time LTI systems using Laplace Transform: Causality and stability of systems in s-domain, Total Response of the system, Relation between LT and FT	07
5.	Frequency domain analysis of discrete time system using Z-transform	Definition of unilateral and bilateral Z Transform, Region of Convergence (ROC), Properties of Z-Transform, Inverse Z-Transform. Analysis and characterization of the LTI system using Z transform: Transfer Function and difference equation, plotting Poles and Zeros of a transfer function, impulse and step response, causality, stability, Total response of a system. Relation between Laplace Transform and Z-Transform, Relation between ZT and FT	08
6.	FIR and IIR systems	Concept of finite impulse response systems and infinite impulse response systems, Linear Phase FIR systems. IIR Realization structures of LTI Discrete time system: Direct form –I and direct form II.	04

SR NO	List of Tutorials
01	Tutorial No 1 : Mathematical Operations on Continuous and Discrete time signals
02	Tutorial No 2 : Classifications of Continuous and Discrete time signals and systems
03	Tutorial No 3 : Convolution and Correlation of Continuous and Discrete time signals
04	Tutorial No 4 : Sums on properties of Continuous time and Discrete time Fourier Transform
05	Tutorial No 5 : Magnitude and Phase Response Sums of Fourier transform
06	Tutorial No 6 : ROC , properties of Laplace transform

07	Tutorial No 7 : Inverse Laplace transform and total response
08	Tutorial No 8 : ROC and properties of Z transform
09	Tutorial No 9 : Inverse Z transform and total response
10	Tutorial No 10 : FIR Realization structures 1. Direct form –I 2. Direct form II

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

Term Work Assessment:

- At least 08 tutorials covering the entire syllabus must be conducted.
- The tutorials should include easy, medium and high level thinking questions. Term work assessment must be based on the overall performance of the student with every tutorial graded from time to time. The grades should be converted into marks as per the Credit and Grading System manual and should be added and averaged. The grading and term work assessment should be done based on this scheme.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 302	Computer Networks	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 302	Computer Networks	40	40	40	60	25	--	25	150	

Course Objectives:

1. To introduce networking architecture and protocols.
2. To understand the various layers and protocols in the TCP/IP model.
3. To recognize different addressing schemes, connecting devices and routing protocols.
4. To select the required protocol from the application layer protocols.

Course Outcomes: Upon successful completion students will be able to

1. Demonstrate understanding of networking concepts and required protocols.
2. Analyze the various layers and protocols of the layered architecture.
3. Evaluate different addressing schemes, connecting devices and routing protocols.
4. Appreciate the application layer protocols.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction to Network Architectures, Protocol Layers, and Service models	Uses of computer networks. Topologies, LAN, MAN, WAN, Network topologies, Addressing : Physical / Logical /Port addressing, Protocols and Standards. Protocol Architecture: Need of layered protocol architecture, Layers details of OSI, , Protocol Layers and Their Service Models TCP/IP Model: Protocol suite, Comparison of OSI and TCP/IP	06

2.	Physical Layer	<p>Transmission Media: Guided media like Coaxial, fiber, twisted pair, and Wireless media, Transmission Impairments. Interconnecting Devices: Hub, Bridges, Switches, Router, Gateway</p> <p>Data communication model : DTE, DCE, RS-232D Interface , Null Modem , Multiplexing : FDM , Synchronous TDM , Statistical TDM, ADSL , xDSL, Cable modem</p>	09
3.	Data Link Control	<p>Data link services: Framing, Flow control, Error control, ARQ methods, Piggybacking</p> <p>High Level Data Link Control (HDLC): HDLC configurations, Frame formats, Typical frame exchanges.</p> <p>Medium Access Control Protocols: ALOHA, Slotted ALOHA, CSMA, CSMA/CD</p>	08
4.	Network Layer	<p>Switching: Switched Communication networks, Circuit switching Networks, , Circuit switching Concepts, Packet switching Principles: Virtual circuit switching and Datagram switching</p> <p>Routing in Packet Switching Networks: Characteristics, Routing strategies, Link state Routing versus Distance vector Routing. Least-Cost Routing Algorithms: Dijkstra's Algorithm, Bellman Ford Algorithm.</p> <p>Internet Protocol: Principles of Internetworking: Requirements, Connectionless Operation Internet Protocol Operation: IP packet, IP addressing, subnet addressing , IPv4, ICMP, ARP, RARP IPv6 (IPv6 Datagram format, comparison with IPv4, and transition from IPv4 to IPv6)</p>	04
5.	Transport Layer	<p>Connection –oriented Transport Protocol Mechanisms: Transmission Control Protocol (TCP): TCP Services, TCP Header format, TCP three way handshake, TCP state transition diagram. User datagram Protocol (UDP)</p> <p>Congestion: Effects of congestion, Congestion control methods, Traffic management, Congestion control in Packet switching Networks</p>	08
6.	Application Layer	Application layer Protocols : HTTP, FTP, DNS,SMTP, SSH	04

DETAILED LAB SYLLABUS:

Hardware Requirements: Switches Routers, Cables Crimping Tools

Software Requirements: Cisco PacketTracer, NS 2

Sr. No.	Detailed Lab Description
1	To study basic networking commands.
2	To perform crimping and set up a LAN connection.
3	To configure a network using Distance Vector Routing Protocol-RIP using Cisco Packet Tracer.
4	Configure a network using Path Vector Routing Protocol- BGP using Cisco Packet Tracer
5	To perform subnetting using Cisco Packet Tracer.
6	To study about NS2 simulator in detail.
7	Creating two nodes and set up a LAN connection using NSG 2.1
8	To Simulate and to study stop and Wait protocol using NS 2.1
9	To Simulate Sliding Window protocol using NS 2.1

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

1. Term Work Assessment:

- At least 08 experiments covering entire syllabus and one mini project should be set to have well predefined inference and conclusion.
- The experiments should be students' centric and attempt should be made to make experiments more meaningful, interesting and innovative. Term work assessment must be based on the overall performance of the student with every experiment graded from time to time. The grades should be converted into marks as per the Credit and Grading System

manual and should be added and averaged. The grading and term work assessment should be done based on this scheme.

2. Oral/Viva Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus. Students are encouraged to share their experiments/mini project codes on online repository.

3. Computer and Communication Networks, Nader F. Mir, Pearson Education.
4. Computer Networking: A Top-Down Approach Featuring the Internet, James F.Kurose,K.W.Ross,3rd Edition, Pearson Education.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 303	Computer Organization & Architecture	03	--	--	03	--	--	03

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 303	Computer Organization & Architecture	40	40	40	60	--	--	--	100	

Course Objectives:

1. To conceptualize the basics of organizational and architectural issues of a digital computer.
2. To analyze performance issues in processor and memory design of a digital computer.
3. To understand various data transfer techniques in digital computers.
4. To analyze processor performance improvement using instruction level parallelism

Course Outcomes: Upon successful completion of the course students will be able to

1. Explain the basic structure of a computer.
2. Do computer arithmetic operations.
3. Elaborate control unit operations.
4. Able to perform the concept of cache mapping techniques.
5. Explain the concept of I/O organization and conceptualize instruction level parallelism.
6. Able to explain the advance computer architectures

Prerequisite: Microprocessor and Microcontroller

DETAILED THEORY SYLLABUS:

Sr. No	Module	Detailed Content	Hrs
1.	Introduction to Computer Organization	1.1 Introduction to Computer Organization & Architecture, Basic functional blocks of a computer: CPU, memory, input-output subsystems, control unit.	06

		1.2 Instruction set architecture of a CPU - registers, instruction execution cycle, RTL interpretation of instructions, addressing modes, instruction set. 1.3 Evolution of computers, Von Neumann model, 1.4 Performance measure of computer architecture.	
2.	Data presentation and Arithmetic algorithm	2.1 Signed number representation, fixed and floating point representations, character representation. 2.2 Computer arithmetic - integer addition and subtraction, ripple carry adder, carry look-ahead adder. 2.3 Multiplication - shift-and-add, Booth multiplier, carry save multiplier. 2.4 Division - non-restoring and restoring techniques. 2.5 Floating point arithmetic : Addition, Subtraction	08
3.	Processor Organization and Architecture	3.1 CPU Architecture, register organization, instruction formats, basic instruction cycle, instruction interpretation and sequencing 3.2 Control unit: soft wired (micro-programmed) and hardwired control unit design methods 3.3 Introduction to RISC and CISC architectures	06
4.	Memory Organization	4.1 Semiconductor memory technologies : SRAM, DRAM. Interleaved and associative memory, 4.2 Cache memory concept, mapping techniques, cache coherency, cache performance. 4.3 Virtual memory concept, segmentation and paging-	08
5.	Input / Output Organization	5.1 IO fundamentals: handshaking, buffering, programmed controlled IO, interrupt driven IO; Interrupt handling mechanism, 5.2 Buses: protocols, arbitration, direct memory access (DMA).	04
6.	Fundamentals of Advanced Computer Architecture	6.1 Parallel Architecture: Classification of Parallel Systems, Flynn's Taxonomy, Array Processors, Clusters, and NUMA Computers. 6.2 Multiprocessor Systems : Structure & interconnection Networks 6.3 Multi-Core Computers: Introduction, Organization and Performance.	07

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Text Books:

		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 304	Software Engineering	40	40	40	60	--	--	--	100	

Course Objectives:

1. To demonstrate and evaluate real time projects with respect to software engineering principles.
2. To provide the knowledge of software engineering discipline.
3. To apply analysis, design and testing principles to software project development.
4. To design and develop different software projects.
5. To provide knowledge about gathering requirements, analysing them and to develop prototypes.

Course Outcomes: Upon successful completion of the course students will be able to

1. Understand and demonstrate basic knowledge in software engineering.
2. Identify requirements, analyze and prepare models.
3. Plan, schedule and track the progress of the projects.
4. Design & develop the software projects.
5. Identify risks, manage the change to assure quality in software projects.
6. Apply testing principles on software project and understand the maintenance concepts.

Prerequisite:

1. Concepts of Object Oriented Programming & Methodology
2. Knowledge of developing applications with front end & back end connectivity.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction to software Engineering process paradigms and Agile methodology	<ul style="list-style-type: none"> • "Generic view of Process, Software Process, Capability Maturity Model (CMM)" • Prescriptive Models: Waterfall Model, Incremental-RAD Model 	06

		<ul style="list-style-type: none"> ● "Evolutionary Process Model Prototyping, Spiral and Concurrent Development Model" ● Specialized Models: Component based, Aspect Oriented Development ● Agile Methodology, Agility Principles, Scrum and Extreme Programming & Kanban model 	
2.	Requirement Elicitation and Software Project estimation.	<ul style="list-style-type: none"> ● Requirement, Types of Requirements, Requirement gathering, Requirement Engineering Task ● Identifying Stakeholders, Multiple viewpoints, SRS (Software Requirement Specification) ● Project Estimation, LOC based, FP based and Use case based estimation ● Management Spectrum, 4Ps (people, product and process), Process & Project metrics. 	08
3.	Project Scheduling ,Monitoring & Risk Management	<ul style="list-style-type: none"> ● Project scheduling: Defining a Task Set for the Software Project ● Timeline charts, Tracking the Schedule, Earned Value Analysis ● Risk Identification, Risk Assessment, ● Risk Projection, RMMM 	06
4.	Software Analysis and design	<ul style="list-style-type: none"> ● "Introduction of Analysis elements, Scenario based, Flow based, ● behavior and class based Design Concepts" ● Classification of UML ● Developing UML Diagrams ● Requirement Model – Scenario-based model, Class-based model, Behavioral model. ● Principles, Architecture Design, .Coupling vs. Cohesion ● Post Development models- Component Level Design, System Level Design, ● Types of User Interface Design & develop an UI Design 	07
5.	Software Configuration management and quality Assurance	<ul style="list-style-type: none"> ● SCM Process ● Version control management ● Re- engineering & Reverse Engineering ● SCM repositories ● Software Quality Assurance Task and Plan, ● Software Reliability, Formal Technical Review (FTR), Walkthrough ● McCall's Quality Factor 	05
6.	Software testing and Web Engineering	<ul style="list-style-type: none"> ● Purpose of STLC ● Strategic Approach of Testing , White-Box, Grey-Box and Black Box testing and their types, Boundary-value Analysis, Path Testing- Calculate 	07

		<p>Cyclomatic Complexity, Equivalence class partitioning</p> <ul style="list-style-type: none"> ● Types of Software Testing – Manual Testing, Automated Testing, Object-oriented Testing approach, Derive a Test case ● Importance of Web Engineering ● Web project planning and management ● Web-based System ,Major Differences between Web Applications and Conventional Software ● Elements of Web Site Construction 	
--	--	---	--

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 305	Professional Communication & Ethics II	--	--	--	--	50	--	--	50

Course Objectives:

1. To enable learners to formulate professional documents in a structured manner that meets the corporate requirements.
2. To provide an appropriate environment, opportunity and scope to the learners to acquire skills such as collaboration, leadership qualities, assertiveness etc. necessary for group discussion and team building.
3. Train learners in effective presentation, research, organisational, creative and critical thinking skills necessary for global and industrial set up.
4. To promote the importance of having an impressive personality that will enhance self-esteem, build self-confidence and sensitize the learners in appropriate behaviour.
5. To prepare the learners for campus placement, employability and competitive examination required for lifelong learning.
6. Fostering skills in technology-mediated social and professional communications and collaborative learning.

Course Outcomes: Upon successful completion of the course students will be able to

1. Acquire the writing skills necessary for professional documents to meet the corporate requirement.
2. Demonstrate the skills required for self-improvement and effective communication.
3. Develop self-confidence and behave professionally.
4. Perform successfully in competitive exams like GRE, CET and TOEFL
5. Illustrate effective presentation, research, organisational, creative and critical skills necessary for lifelong learning.
6. Acquire the skills necessary to communicate using blogs, LinkedIn, You Tube, Facebook and Twitter.

Prerequisite: Possess the necessary language skills.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Structure, Style and Language of Report Writing	1.1 Introducing the purpose, aim, objective and format of report 1.2 Literature review-ability to gather and analyse information from different sources and summarize. Specific emphasis on plagiarism, use of quotation marks appropriately. 1.3 Research Methodology 1.4 Presenting data-figures, diagrams and labelling 1.5 How and why to write discussion 1.6 Citing and referencing- IEEE format 1.7 Writing an abstract	06
2.	Practicing Critical Thinking	2.1 Framing the situation 2.2 Gathering information from different sources and comparing them 2.3 Create/write an autonomous research paper	04
3.	Oral Skills for Employability	3.1 Group Discussion- with special reference to leadership qualities, assertiveness, analysing the topic, developing different perspectives, introducing and concluding the discussion. 3.2 Interview-with special reference to introducing oneself and answering questions with confidence. 3.3 Presentation Skills-with special reference to preparing slides, dress code, non-verbal communication including paralinguistic features, introduction and conclusion.	06
4.	Personality Development And Social Etiquettes	4.1. Personality Development <ul style="list-style-type: none"> ● Improving self-awareness- analysing our own experiences, looking at ourselves through the eyes of others ● Knowing and Building our own identity ● Discovering and Developing our talents ● Teamwork/collaboration 4.2. Social Etiquettes <ul style="list-style-type: none"> ● Formal Dining Etiquettes ● Cubicle Etiquettes ● Learning Accountability and Accepting Criticism ● Demonstrating Flexibility and Cooperation ● Selecting Effective Communication Channels 	03
5.	Content writing	5.1 Writing Resume and statement of purpose 5.2 Research Skills 5.3 Organisational skills 5.4 Creative Writing- Blog posts, Web pages etc.	04

6.	Communication through Social Media	6.1 Introduction to Social Media and its relevance in communication 6.2 Benefits of social media in communication 6.3 Impact of social media in human communication (positive and negative) 6.4 Responsibility in Using Social Media Showing Empathy and Respect	03
----	---	---	----

DETAILED LAB SYLLABUS:

Sr. No.	Details of Assignments	Details of Activities	Hrs
I	Written assignment on Literature Review 20 page report on technical topic-(to be included as part of term work)	Sample IEEE papers to be shared with students and train them to identify contributions of each author. These contributions can then be written in the format required in journals.	4
II	Written assignment on summarizing a technical proposal 4 page technical proposal (to be included as part of term work)	Example of summarizing techniques to be demonstrated.	4
III	Oral Skills for Employability to be included in term work.	Role play and mock interviews Mock group discussion Mock presentation	2 2 2
IV	Written Assignment on Documentation of Business Meeting	Mock meetings	2
V	Written Assignment on Resume writing/Statement of Purpose.	NA	2
VI	Written Assignment on Blog Posts	NA	2

Term work Assessment:

Term work will consist of-

1. Assignments-10 marks
2. Group Discussion-10 marks

3. Interviews-5marks
4. Report- 5 marks
5. Technical Proposal- 5 marks
6. Attendance -5 marks
7. Presentation- 10 mark
8. The final certification and acceptance of term work ensures that satisfactory performance in class activities and assignments is met by the student.

Text Books:

1. Virendra Singh Nirban, Krishna Mohan, RC Sharma, Business Correspondence and Report Writing.
2. Raman Meenakshi & Sharma Sangeeta, Technical Communication Principles and Practice, Second edition, Oxford University Press.
3. Ann Handley Everybody Writes: Your Go-To Guide to Creating Ridiculously Good Content, Wiley.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 306	Computer Graphics and Virtual Reality	03	--	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 306	Computer Graphics and Virtual Reality	40	40	40	60	25	--	25	150	

Course Objectives:

1. To introduce the use of the components of a graphics system and become familiar with the building approach of graphics system components and algorithms related to them.
2. Provide an understanding of how to scan convert the basic geometrical primitives, how to transform the shapes to fit them as per the picture definition.
3. To be able to discuss the application of computer graphics concepts in the development of computer games, information visualization, and business applications.
4. To comprehend and analyze the fundamentals of animation, virtual reality, underlying technologies, principles, and applications.

Course Outcomes: Upon successful completion of the course students will be able to

1. List the basic concepts used in computer graphics.
2. Implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.
3. Describe the importance of viewing and projections.
4. Define the fundamentals of animation, virtual reality and its related technologies.
5. Understand a typical graphics pipeline
6. Design an application with the principles of virtual reality

Prerequisite: Basic Mathematics (knowledge of Matrices)

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction to Computer	Introduction: Display Devices, Bitmap and Vector based graphics, Overview of Coordinate System. Scan Conversion of: point, line using Digital differential analyzer & Bresenham's	07

	graphics and Output primitives	algorithm, circle using midpoint approach, Curve Generation: Bezier and B-Spline curves. Introduction to fractals: generation procedure, classification, dimension and Koch Curve.	
2.	Area Filling, Transformations (2D and 3D)	Area filling: Inside/Outside Test, Scan line Polygon Fill Algorithm, Boundary Fill and Flood Fill algorithm. Basic Geometrical 2D Transformations: Translation, Rotation, Scaling, Reflection, Shear, their homogeneous Matrix representation and Composite transformation. Three Dimensional transformations: Translation, Scaling, Rotations, Composite.	06
3.	Viewing (2D and 3D) and Clipping, Projection	Viewing: Introduction, Viewing Pipeline, View Coordinate reference frame, Window to viewport transformation. Three-Dimensional Viewing: 3D Pipeline, Viewing transformation, Clipping: Point clipping, Line clipping: Cohen Sutherland Algorithm, Liang Barsky algorithms, Polygon clipping: Sutherland Hodgeman polygon clipping and Weiler Atherton. Text Clipping. Projections: Parallel (Oblique and orthographic), perspective (one, two and three Point) with matrix representation.	09
4.	Introduction To Animation	Animation: Key Frame Animation, Animation Sequence, Motion Control Methods. Morphing, Warping- Mesh Warping.	06
5.	Introduction to Virtual Reality	Virtual Reality: Basic Concepts, Overview and perspective on virtual reality, Human sensation and perception. Classical Components of VR System, Types of VR Systems, Three-Dimensional Position Trackers, Navigation and Manipulation Interfaces, Gesture Interfaces, Input Devices, Graphical Display, Sound displays, and Haptic Feedback. Graphical Rendering Pipeline, Haptic Rendering Pipeline, Open GL rendering pipeline. Applications of Virtual Reality.	06
6.	VR Modeling and Programming	Geometric Modeling: Virtual Object Shape, Object Visual Appearance. Kinematics Modeling: Object Position, Transformation Invariants, Object Hierarchies, Physical Modeling: Collision Detection, Surface Deformation, Force Computation. Behavior Modeling. Programming through VRML/X3D: Defining and Using Nodes and Shapes, VRML Browsers, Java 3D, OpenCV for augmented reality.	05

DETAILED LAB SYLLABUS:

Prerequisite: Knowledge of C/C++ programming language

Software Requirements: C compiler.

SN	Detailed Lab Description
1	Implement DDA Line Drawing algorithm
2	Implement midpoint Circle algorithm.
3	Implement Area Filling Algorithm: Boundary Fill, Flood Fill.
4	Implement Curve: Bezier for n control points

5	Character Generation: Bit Map method or Stroke Method
6	Implement 2D Transformations: Translation, Scaling, Rotation
7	Implement Line Clipping Algorithm: Cohen Sutherland
8	Implement polygon clipping algorithm : Sutherland Hodgeman
9	Perform projection of a 3D object on Projection Plane
10	Perform Animation (Use multiple objects)
11	Create interactive application(games)
12	Design VR system for real time requirement (e.g. car driving simulator for driving learners)

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessments:

1. Term work Assessment:

- Term work should consist of 10 experiments.
- Journal must include at least 2 assignments
- Mini Project to be performed using C /C++/OpenGL/Blender/ any other tool (2/3 students per group). Possible Ideas: Game development with audio, Graphics editor: Like Paint brush, Text editor etc.

Total 25 Marks (Experiments: 10-marks, Attendance Theory & Practical: 05-marks, Assignments: 05-marks, Mini Project: 5-marks)

2. Oral/Viva Assessment:

Based on the above contents and entire syllabus.

Text Books:

1. Donald Hearn and M. Pauline Baker, “Computer Graphics”, Pearson Education.
2. R. K Maurya, “Computer Graphics with Virtual Reality”, Wiley India.

References:

1. Grigore Burdea, Philippe Coiffet, “Virtual Reality Technology”, Wiley.
2. Steven Harrington, “Computer Graphics”, McGraw Hill.
3. Rogers, “Procedural Elements of Computer Graphics”, Tata McGraw Hill.
4. Vince, “Virtual Reality Systems”, Pearson Education.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 307	Advance Database Management System + Data Warehousing & Mining	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 307	Advance Database Management System + Data Warehousing & Mining	40	40	40	60	25	--	25	150	

Course Objectives:

1. To provide insights into distributed database designing.
2. To specify the various approaches used for using XML and JSON technologies.
3. To apply the concepts behind the various types of NoSQL databases and utilize it for MongoDB.
4. To identify the significance of Data Warehousing and Mining.
5. To develop research interest towards advances in data mining.

Course Outcomes: Upon successful completion students will be able to

1. Design distributed database using the various techniques for query processing.
2. Organize the data using XML and JSON database for better interoperability.
3. Compare different types of NoSQL databases.
4. Formulate NoSQL queries using MongoDB.
5. Understand data warehouse fundamentals and design data warehouse with dimensional modelling and apply OLAP operations.
6. Understand data mining principles and perform Data preprocessing and Visualization.

Prerequisite: Database Management System (DBMS)

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Distributed Databases	Introduction, Distributed DBMS Architecture, Data Fragmentation, Replication and Allocation Techniques for Distributed Database Design, Distributed Transaction	08

		Management – Definition, properties, types, architecture. Distributed Query Processing - Characterization of Query Processors, Layers/ phases of query processing. Distributed Concurrency Control- Taxonomy, Locking based, Basic TO algorithm, Recovery in Distributed Databases: Failures in distributed database, 2PC and 3PC protocol.	
2.	Data interoperability – XML and JSON	XML Databases: Document Type Definition, XML Schema, Querying and Transformation: XPath and XQuery. Basic JSON syntax, (Java Script Object Notation),JSON data types, Stringifying and parsing the JSON for sending & receiving, JSON Object retrieval using key-value pair and JQuery, XML Vs JSON.	05
3.	NoSQL Distribution Model	NoSQL database concepts: NoSQL data modeling, Benefits of NoSQL, comparison between SQL and NoSQL database system. Replication and sharding, Distribution Models Consistency in distributed data, CAP theorem, Notion of ACID Vs BASE, handling Transactions, consistency and eventual consistency. Types of NoSQL databases: Key-value data store, Document database and Column Family Data store, Comparison of NoSQL databases w.r.t CAP theorem and ACID properties.	07
4.	NoSQL using MongoDB	NoSQL using MongoDB: Introduction to MongoDB Shell, Running the MongoDB shell, MongoDB client, Basic operations with MongoDB shell, Basic Data Types, Arrays, Embedded Documents. Querying MongoDB using find() functions, advanced queries using logical operators and sorting, simple aggregate functions, saving and updating document. MongoDB Distributed environment: Concepts of replication and horizontal scaling through sharding in MongoDB.	05
5.	Data Warehousing Fundamentals	Introduction to Data Warehouse, Data warehouse architecture, Data warehouse versus Data Marts, E-R Modeling versus Dimensional Modeling, Information Package Diagram, Data Warehouse Schemas; Star Schema, Snowflake Schema, Factless Fact Table, Fact Constellation Schema. Update to the dimension tables. Major steps in ETL process, OLTP versus OLAP, OLAP operations: Slice, Dice, Rollup, Drilldown and Pivot.	07
6.	Introduction to Data Mining, Data Exploration and Data Pre-processing	Data Mining Task Primitives, Architecture, KDD process, Issues in Data Mining, Applications of Data Mining, Data Exploration: Types of Attributes, Statistical Description of Data, Data Visualization, Data Preprocessing: Descriptive data summarization, Cleaning, Integration & transformation, Data reduction, Data Discretization and Concept hierarchy generation.	07

DETAILED LAB SYLLABUS:

Software Requirements: SQL, Java/Python, WEKA

Sr. No.	Detailed Lab Description
1	Design of a distributed database for a real life application - Fragmentation, Query Processing.
2	Simulation of Recovery methods in distributed DB.
3	Design XML schema for real life application and write queries using XPath & XQuery.

4	Implement data transfer using JSON.
5	Design a database using NoSQL model and query it.
6	Implement different operations in MongoDB.
7	One case study on building Data warehouse/Data Mart -Write Detailed Problem statement and design dimensional modelling (creation of star and snowflake schema).
8	Implementation of all dimension table and fact table based on the case study.
9	Implementation of OLAP operations: Slice, Dice, Rollup, Drilldown and Pivot based on the case study.
10	Perform data Pre-processing task and demonstrate Classification, Clustering, Association algorithm on data sets using data mining tool (WEKA/R tool).

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

1.Term work Assessment:

Term work should consist of minimum 8-10 experiments. Journal must include at least 2 assignments on content of theory and practical. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Total 25 Marks (Experiments: 15-marks, Attendance (Theory & Practical): 05-marks, Assignments: 05-marks).

2. Oral/Viva Assessment: Oral exam to be conducted by Internal & External examiners.

Text Books:

1. Korth, Siberchatz,Sudarshan, “Database System Concepts”, 6thEdition, McGraw Hill.
2. Elmasri and Navathe, “Fundamentals of Database Systems”, 5thEdition, Pearson Education.
3. Ozsu, M. Tamer, Valduriez, Patrick, “Principles of distributed database systems”,3rd Edition, Pearson Education, Inc.
4. PramodSadalge, Martin Fowler, NoSQL Distilled: A Brief Guide to the Emerging World of Polyglot Persistence, Addison Wesley/ Pearson.
5. Jeff Friesen , Java XML and JSON,Second Edition, 2019, après Inc.
6. Paulraj Ponniah, “ Data Warehousing: Fundamentals for IT Professionals”, Wiley India.
7. Han, Kamber, “Data Mining Concepts and Techniques”, Morgan Kaufmann 2nd edition.

2. Adam Fowler, NoSQL for dummies, John Wiley & Sons, Inc.
3. Shashank Tiwari, Professional NOSQL, John Willy & Sons. Inc
4. MongoDB Manual : <https://docs.mongodb.com/manual>.
5. Reema Theraja, "Data warehousing", Oxford University Press 2009.
6. Pang-Ning Tan, Michael Steinbach and Vipin Kumar, "Introduction to Data Mining", Pearson Publisher 2nd edition.
7. Ian H. Witten, Eibe Frank and Mark A. Hall, "Data Mining", Morgan Kaufmann 3rd edition.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 308	Advanced Operating System	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 308	Advanced Operating System	40	40	40	60	25	--	25	150

Course Objectives:

1. To learn the architectural differences and issues related to Advanced Operating System.
2. To learn the Unix Operating System.
3. To get a comprehensive knowledge of the distributed systems.
4. To get a comprehensive knowledge of Real time operating system.
5. To get a thorough knowledge of database operating systems.
6. To get thorough knowledge of Mobile Os and cloud operating System.

Course Outcomes: Upon successful completion of the course students will be able to

1. Apply the principles and concepts in analyzing and designing Advance Operating System.
2. To be able to learn the Unix Operating System.
3. Demonstrate the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system
4. To understand a comprehensive knowledge of Real time operating system.
5. To be able to learn knowledge of database operating systems
6. Analyze the performance and reliability of different Advanced Operating Systems.

Prerequisite: Knowledge of Operating System

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction to Advanced operating System	Functions of operating systems, Design approaches: layered, kernel based and virtual machine approach, types of advanced operating systems (NOS, DOS, Multiprocessor OS, Mobile OS,RTOS, Cloud OS)	07

2.	Unix Kernel and File Management	System Structure, User Perspective, Architecture of Unix Operating System, Buffer cache: Header, Buffer Pool, Retrieving, Reading and Writing Buffer, File Representation: inodes: Structure of file Directories, Path conversion to inode, superblock, inode assignment, allocation of disk blocks	07
3.	Distributed Operating system concepts	Goals, Distributed Computing Models, Hardware Concepts, Software Concepts, Architecture of DOS. Design Issues: Transparency, Flexibility, Scalability, Reliability, Performance, fault tolerance, Distributed Mutual Exclusion: Introduction, Classification of Mutual Exclusion algorithms, Mutual Exclusion Algorithms, Distributed Deadlock: Introduction, deadlock handling strategies, Deadlock detection: Issues and resolution	07
4.	Real Time Operating Systems and Mobile OS	Characteristics of Real Time operating Systems, Classification of Real Time Operating Systems, Scheduling in RTOS: Clock driven: cyclic, Event driven: EDF and rate monotonic scheduling, Resource Handling: Resource Sharing, Priority Inversion, PIP, PCP, HLP. Scheduling real time tasks in distributed systems	08
5.	Database Operating systems	Concurrency control : Database systems, Concurrency control model of database systems, Problem of Concurrency Control, serializability theory, Distributed Database Systems. Concurrency Control Algorithms : asic synchronization Algorithms, Lock based, Timestamp based and Optimistic Algorithms, Concurrency Control Algorithms : Data Replication	06
6.	Mobile OS	Architecture, Android OS, iOS, Virtual OS, Cloud OS and their design issues	04

DETAILED LAB SYLLABUS:

Software Requirements: Windows/linux

Sr. No.	Detailed Lab Description
1	Design and developed shell script that support Following Command ls, date, time, echo, cat, pwd, cp,
2	Write a multi-class multithreaded program that simulates multiple sleeping barbers, all in one barbershop that has a finite number of chairs in the waiting room. Each customer is instantiated from a single customer class; each barber is instantiated from a single Barber class
3	Implement the program for EDF
4	Implement the Program for Rate Monotonic algorithm
5	Implement a distributed share list among a group of mobile device users which is similar to Google document.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.

Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

- Term work should consist of 10 experiments.
- Journal must include at least 2 assignments.
 1. **Term work Assessment:** Total 25 Marks (Experiments: 10-marks, Attendance Theory& Practical: 05-marks, Assignments: 10-marks)
 2. **Oral/Viva Assessment:**
Based on the above contents and entire syllabus.

Text Books:

1. Mukesh Singhal and Niranjana G. Shivaratri, "Advanced concepts in operating systems: Distributed, Database and multiprocessor operating systems" .MC Graw Hill education.
2. Rajib Mall, "Real-Time Systems: Theory and Practice", Pearson education.

4. Jane W. S. Liu, "Real Time Systems", Pearson education.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 309	Basics of VLSI	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 309	Basics of VLSI	40	40	40	60	25	--	25	150

Course Objectives:

1. To teach fundamental principles of VLSI circuit design and layout techniques.
2. To highlight the circuit design issues in the context of VLSI technology
3. To design different scaling effects.
4. To design semiconductor memories and its importance.
5. To teach different clocking techniques and data paths.
6. To highlight different interconnects and delay models.

Course Outcomes: Upon successful completion of the course students will be able to

1. Apply the knowledge to demonstrate a clear understanding of choice of technology and technology scaling.
2. Understand the design of MOSFET Inverters.
3. Analyze and design MOS based circuits design styles.
4. Understand the design of Semiconductor Memories.
5. Develop different Data path design
6. Demonstrate a clear understanding of system level design issues such as protection, timing and power dissipation

Prerequisite: Analog Electronics Circuits, Digital Circuits and System Design(DCSD)

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Technology Comparison, MOSFET Scaling	Comparison of BJT, NMOS and CMOS technology Types of scaling, Level 1 and Level 2 MOSFET Models, MOSFET capacitances	07

2.	MOSFET Inverters	<p>Circuit Analysis: Static and dynamic analysis (Noise, propagation delay and power dissipation) of resistive load and CMOS inverter, comparison of all types of MOS inverters, design of CMOS inverters</p> <p>Logic Circuit Design: Analysis and design of 2-I/P NAND and NOR using equivalent CMOS inverter, W/L ratio, Complex circuits</p>	08
3.	MOS Circuit Design Styles	<p>Design Styles: Static CMOS, pass transistor logic, transmission gate, Pseudo NMOS, Domino, NORA, Zipper, C2MOS, sizing using logical effort</p> <p>Circuit Realization: SR Latch, JK FF, D FF, 1 Bit Shift Register, MUX, decoder using above design styles</p>	07
4.	Semiconductor Memories	<p>SRAM: ROM Array, SRAM (operation, design strategy, leakage currents, read/write circuits), DRAM (Operation 3T, 1T, operation modes, leakage currents, refresh operation), Flash (mechanism, NOR flash, NAND flash)</p> <p>Peripheral Circuits: Sense amplifier, decoder</p>	06
5.	Data Path Design	<p>Adder: Bit adder circuits, ripple carry adder, CLA adder</p> <p>Multipliers and shifter: Partial-product generation, partial-product accumulation, final addition, barrel shifter</p>	05
6.	VLSI Clocking and System Design	<p>Clocking: CMOS clocking styles, Clock generation, stabilization and distribution</p> <p>Low Power CMOS Circuits: Various components of power dissipation in CMOS, Limits on low power design, low power design through voltage scaling</p> <p>IO pads and Power Distribution: ESD protection, input circuits, output circuits, simultaneous switching noise, power distribution scheme</p> <p>Interconnect: Interconnect delay model, interconnect scaling and crosstalk</p>	06

DETAILED LAB SYLLABUS:

Software Requirements: NGSpice, Microwind

Sr. No.	Detailed Lab Description
1	Effect of parasitic capacitance and threshold voltage on output of NMOS inverter with resistive load.
2	Circuit characteristics and performance estimation of NMOS inverter with resistive load. 1) Verification of V_{OH} level for different values of load resistance. 2) Find rise time for different values of load resistance.
3	Circuit characteristics and performance estimation of NMOS inverter with Enhancement mode MOSFET load.

4	Circuit characteristics and performance estimation of NMOS inverter with Depletion mode N channel MOSFET as a load.
5	Circuit characteristics and performance estimation of CMOS inverter. 1) Verification of VOH and VOL levels. 2) Comparison of rise and fall times for different values of W/L ratio of pull up and pull down devices.
6	Circuit characteristics and performance estimation of CMOS Dynamic 2 Input NAND Gate. 1) Verification of VOH and VOL levels for various input possibilities. 2) Verification of precharge and evaluate condition for different inputs. 3) Verification of charge leakage problem.
7	Design of 4:1 MUX using pass transistor logic and transmission gates.
8	Design of 6T SRAM using microwind dsch3.1.
9	Case Study.
10	Case Study.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

- Term work should consist of 10 experiments.
- Journal must include at least 2 assignments.
- Mini Project to be performed.

1. Term work Assessment:

Total 25 Marks (Experiments: 10-marks, Attendance Theory & Practical: 05-marks, Assignments: 05-marks, Mini Project: 5-marks)

2. Oral/Viva Assessment:

Based on the above contents and entire syllabus.

Text Books:

1. Sung-Mo Kang and Yusuf Leblebici, "CMOS Digital Integrated Circuits Analysis and Design", Tata McGraw Hill, 3rd Edition.
2. Jan M. Rabaey, Anantha Chandrakasan and Borivoje Nikolic, "Digital Integrated Circuits: A Design Perspective", Pearson Education, 2nd Edition.

EC 391	Mini Project III (Web Programming)	-	1#+2	--	-	--	--	01

1# to be taken class wise

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment (Review)			End Sem. Exam				
		1(10)	2(10)	Average					
EC 391	Mini Project III (Web Programming)	-	-	-	-	25	--	25	50

Course Objectives:

1. To make students familiar with Web Fundamentals, Programming Languages for the Web.
2. To make students familiar with HTML Basics, the working environment.
3. To develop the ability to logically plan and develop web pages.
4. To learn to write, test, and debug web pages using HTML and JavaScript.

Course Outcomes: Upon successful completion of the course students will be able to

1. Understand Basics of JavaScript.
2. Support the development of web pages.
3. Programming the browser and forms with JavaScript.
4. Create forms and check for data accuracy.
5. Use JavaScript system objects.
6. Analyse the impact of solutions in societal and environmental context for sustainable development.
7. Use standard norms of engineering practices.

DETAILED SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
I	HTML, CSS and JavaScript	Basic of HTML: Web System architecture-1,2,3 and n tier architecture, URL, domain name system, overview of HTTP	8

		<p>and FTP, Cross browser compatibility issues, W3C Validators. Formatting and Fonts, Anchors, images, lists, tables, frames and forms.</p> <p>Introduction to CSS: Evolution of CSS, Syntax of CSS, Exploring CSS Selectors, Inserting CSS in an HTML Document, Defining Inheritance in CSS.</p> <p>Introduction to JavaScript: JavaScript language constructs, Objects in JavaScript- Built in, Browser objects and DOM objects, event handling, form validation and cookies.</p>	
II	Responsive Web Design with CSS3	Native Audio and Video, Geo-location, CSS3 and Responsive Web Design: Media Queries, Selectors, Typography and color Modes, CSS3 Transitions, Transformations and Animations.	4
III	Rich Internet Application (RIA)	<p>Characteristics of RIA, Introduction to AJAX :AJAX design basics, AJAX vs Traditional Approach, , Rich User Interface using Ajax.</p> <p>Working with JavaScript Object Notation(JSON): Create data in JSON format, JSON Parser .</p>	4
IV	Server Side Programming: PHP	<p>Introduction to PHP- Data types, control structures, built in functions, Building web applications using PHP- tracking users, PHP and Mysql database connectivity with example.</p> <p>Introduction to PHP Framework: Laravel.</p>	5
V	Python Web Framework: Flask	Introduction, Web Frameworks, Introduction to Flask, Creating flask application, “Hello World” Application.	2
VI	Web Extensions	Introduction to XML, Introducing XSL, XSLT.	3

Text Books:

1. HTML 5 Black Book: Kogent Learning solutions
2. “Learning PHP 5”, David Sklar, O’Reilly Publication
3. Rich Internet Application AJAX and Beyond WROX press
4. Responsive Web Design with HTML5 and CSS3, Ben Frain, PACKT Publication

References:

Detailed Lab Syllabus:

Prerequisite: Basic programming skills.

Hardware Requirements:

PC With following Configuration

1. Intel Core i3/i5/i7 Processor
2. 4 GB RAM
3. 500 GB Hard Disk

Software Requirements:

1. Windows or Linux Desktop OS
2. HTML5 compatible web browsers(Chrome, Opera, Firefox, Safari etc)
3. HTML, CSS editors like Dreamweaver, Notepad++ etc.
4. Netbeans or Eclipse IDE
5. XAMPP

Suggested list of experiments for practice		
I	HTML	Write five HTML programs showing use of: Links, images, table, lists, forms.
II	CSS and JavaScript	Create a HTML document and style it using three ways of applying CSS. Create a HTML document applying following CSS styles: color, background, border, margins, padding, text alignment, font, Write a program for form validation using JavaScript.
III	Responsive web design and RIA	Create a HTML document to display audio and video files. Create a HTML showing use of canvas. Create a HTML showing use of media queries. Write a program using geolocation api. Write a program showing use of AJAX.

IV	PHP	Write five PHP programs showing use of: server side form validation, session tracking, MySQL connection.
V	Flask	Any two programs creating basic flask applications.
VI	XML	Write a program to create any XML document. Write a program to display a XML document using XSLT.

Text Books:

3. Flask Web Development: Developing Web Applications with Python, O'Reilly; 2nd edition (16 March 2018).

Guidelines for Mini Project

- Students shall form a group of 3 to 4 students, while forming a group shall not be allowed less than three or more than four students, as it is a group activity.
- Students should do surveys and identify needs, which shall be converted into problem statements for mini projects in consultation with faculty supervisor/head of department/internal committee of faculties.
- Students shall submit an implementation plan in the form of Gantt/PERT/CPM chart, which will cover weekly activity of mini projects.
- A log book to be prepared by each group, wherein the group can record weekly work progress, guide/supervisor can verify and record notes/comments.
- Faculty supervisor may give inputs to students during mini project activity; however, focus shall be on self-learning.
- Students in a group shall understand the problem effectively, propose multiple solutions and select the best possible solution in consultation with the guide/ supervisor. Students shall convert the best solution into a working model using various components of their domain areas and demonstrate. The solution to be validated with proper justification and report to be compiled in standard format.

Distribution of Term work marks shall be as below;

- Marks awarded by guide/supervisor based on log book : 10
- Marks awarded by review committee : 10
- Quality of Project report : 05

Bachelor of Technology
In
Electronics & Computer
Science
(Semester VI)

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 310	Image Processing & Machine Vision	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 310	Image Processing & Machine Vision	40	40	40	60	25	--	25	150	

Course Objectives:

1. To cover the fundamentals and mathematical models in digital image processing and Machine Vision
2. To understand basic image segmentation techniques.
3. To develop time and frequency domain techniques for image enhancement.
4. To expose the students to classification techniques in Machine Vision
5. To develop Applications using image processing and Machine Vision

Course Outcomes: Upon successful completion of the course students will be able to

1. Understand theory and models in image processing.
2. Interpret and analyze 2D signals in Spatial and frequency domain through image transforms.
3. Apply quantitative models of image processing for segmentation and restoration for various applications
4. Find shape using various representation techniques and classify the object using different classification methods
5. Develop innovative design for practical applications in various fields.

Prerequisite:

- Signals and Systems
- Discrete Time Signal Processing

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1	Digital Image Fundamentals	Introduction – Origin – Steps in Digital Image Processing , Components, Elements of Visual	04

		Perception – Image Sensing and Acquisition, Image Sampling and Quantization – Relationships between pixels, Transformation: Orthogonal, Euclidean, Affine Color Image Processing: Color Fundamentals Color models.	
2	Image Transforms	1-D DFT, 2-D Discrete Fourier Transform and Its Inverse, Some Properties of 2D DFT ,Walsh –Hadamard Transform, Discrete Cosine Transform, Haar Transform	04
3	Image Enhancement	Digital Negative, contrast stretching, thresholding, graylevel slicing, bit plane slicing, log transform and power law transform. Histogram equalization and Histogram Specification Spatial Domain: Averaging filters, order statistics filters, high pass filters and high boost filters Frequency Domain: The Basics of Filtering in the Frequency Domain, Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters, Laplacian, Unsharp Masking and Homomorphic filters	08
4	Image Segmentation and Representation	Detection of Discontinuities, Edge Linking using Hough Transform, Thresholding, Region based Segmentation, Split and Merge Technique, Image Representation and Description, Chain Code, Polygonal, Representation, Shape Number, Moments.	06
5	Morphology & Image Restoration	Morphology: Erosion and Dilation, Opening and Closing, The Hit- or-Miss Transformation. Restoration: Degradation model, noise models, estimation of degradation function by modeling, restoration using Weiner filters and Inverse filters	08
6	Boundary Description & Object Recognition	Texture: Statistical Texture Description Methods- Methods based on spatial frequencies, co-occurrence matrices, edge frequency, primitive length, Law’s texture energy measures Object Recognition Knowledge representation, Classification Principles, Classifier setting, Classifier Learning, Support vector machine, cluster analysis	09

DETAILED LAB SYLLABUS:

Sr. No.	Detailed Lab/Tutorial Description
1	Point Processing Methods - Negative, Log, Power law, Contrast stretching, Bit plane slicing

2	Histogram calculation and equalization
3	Spatial Domain Filtering: 1. Smoothing filters 2. Sharpening with Laplacian 3. Unsharp masking & high boost filtering 4. Edge detection using 1st and 2nd order derivatives
4	Frequency Domain Filtering : Ideal, Butterworth and Gaussian
5	Image segmentation using global Thresholding Algorithm
6	Canny edge detection
7	Shape representation using chain code
8	Morphological operation – Erosion, dilation, opening, closing, hit-miss transform, Boundary extraction
9	Feature extraction using co-occurrence matrix
10	Classification using k-means algorithm
11	Classification using Basiyan classifier
12	Basic binary classification of any data or pattern using Support Vector Machine.
13	Case Study : 1. Face recognition 2. Finger print identification 3. License plate recognition

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Equal weightage should be given to laboratory experiments and while assigning term work marks.

2. Oral/Viva Assessment:

Practical and Oral exam will be based on the entire syllabus.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 311	Advanced Microprocessors	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		Test1	Test 2	Avg.					
EC 311	Advanced Microprocessors	40	40	40	60	25	--	--	125

Course Objectives:

1. To understand the basic concepts of microcomputer systems.
2. To understand the architecture of 32-bit Microprocessor 80386.
3. To understand THE architecture of 32-bit Microcontroller ARM Cortex M3.
4. To write programs for ARM Cortex M3 Microcontroller and their applications in C Language.
5. To understand the basics of Embedded system.

Course Outcomes: Upon successful completion of this course, the learner will be able to

1. Understand the architecture and aspects of 80386 microprocessor
2. Understand the operating modes, address modes of 80386 microprocessor
3. Understand the architecture and aspects of ARM Cortex M3 microcontroller.
4. Study the in-depth working of the Cortex M3 microcontroller and their Instruction set.
5. Write programs for Cortex M3 microcontroller.
6. Study basics of embedded systems.

Prerequisite: Microprocessor & Microcontroller.

DETAILED THEORY SYLLABUS:

Module No.	Unit No.	Details	Hrs
1.	Introduction to Intel 80386DX Processor		06
	1.1	Salient Features of 80386.	
	1.2	Architecture of 80386.	
	1.3	Pin Description of 80386.	
	1.4	Programming Model of 80386.	
2.	Intel 80386DX Processor: - 06 hours		06
	2.1	Operating Modes (Real mode of 80386, Protected mode of 80386, Virtual 8086 mode).	

	2.2	Address Translation Mechanism in Protected Mode.	
	2.3	Memory Management.	
	2.4	Protection Mechanism.	
3.	ARM CORTEX-M3 Architecture		10
	3.1	Comparison of CISC & RISC architectures, overview of ARM family.	
	3.2	ARM Cortex-M3 architecture, Programmer's model: Operation Modes and States, registers, special registers, Application Program Status Register- Integer status flags, Q status flag, GE bits.	
	3.3	Memory system: Features and memory map	
	3.4	Exceptions and Interrupts-Nested vectored interrupt controller	
4.	ARM Instruction Set		07
	4.1	Data Processing Instructions	
	4.1	Conditional and Branching Instructions	
	4.2	ARM-THUMB Interworking	
	4.4	Single-Register Load-Store Instructions	
	4.5	Stack Instructions	
5.	ARM Programming with Embedded C		05
	5.1	General Purpose Input Output	
	5.2	Timer Mode	
	5.3	Pulse –Width Modulator Configuration	
6.	Introduction to Embedded Systems.		05
	6.1	Characteristics and Design metrics of Embedded system.	
	6.2	Real time systems: Need for Real-time systems, Hard-Soft Real-time systems.	
	6.3	Challenges in Embedded system Design: Power, Speed and Code density.	

Theory Assessments:

1.Internal Assessment:

Assessment consists of two class tests of 40 marks each. The first class test is to be conducted when approximately 40% syllabus is completed and second class test when additional 40% syllabus is completed. The average marks of both the test will be considered for final Internal Assessment. Duration of each test shall be of one hour.

2.End Semester Examination:

- Question paper will comprise of 4 questions, each carrying 20 marks.
- The students need to solve a total of 3 questions.
- Question No.1 will be compulsory and based on the entire syllabus.
- Remaining question (Q.2 to Q.5) will be selected from all the modules.

Text Books:

1. The 80386DX Microprocessor: Hardware, Software and Interfacing: Walter A Triebel, Prentice Hall.
2. Intel 80386 Datasheets

DETAILED LABORATORY SYLLABUS:

Lab Prerequisite: Digital System Design, MPMC

Hardware Requirements: Processor hardware kits

Software Requirements: Processor IDE

Sr. No.	Detailed Lab/Tutorial Description
1	Display "Hello world" using UART
2	Speed Control of the DC Motor
3	Stepper Motor Interface and rotate clockwise and anticlockwise
4	Display digital output for given analog input using internal ADC
5	Interface DAC and generate Triangular and Square Waveform
6	Interface 4X4 Matrix Keypad and display in LCD
7	Generate PWM waveform and vary its duty cycle
8	Using external interrupt switches toggle the led's

9	Display 0-F in 7 segment display
10	Interface a switch and display status in LED, Relay and Buzzer
11	Interface a switch and display status in LED, Relay and Buzzer
12	Interface SPI ADC and display Ambient temperature

Lab Assessment:

Term work Assessment:

08 Experiments covering the entire syllabus must be given during the “Laboratory session batch wise”. Computation/simulation based experiments are also encouraged. The experiments should be student centric and attempts should be made to make experiments more meaningful, interesting and innovative.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 312	Skill Lab on R-Programming	--	02	--	--	01	--	01

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 312	Skill Lab on R-Programming	--	--	--	--	25	--	25	50	

Lab Prerequisite:

Basic statistics

Lab Objectives:

1. To provide an overview of a new language R used for data science.
2. To introduce students to the R programming environment and related ecosystem and thus provide them with an in-demand skill-set, in both the research and business environments.
3. To introduce the extended R ecosystem of libraries and packages
4. To demonstrate usage of as standard Programming Language.
5. To familiarize students with how various statistics like mean median etc. can be collected for data exploration in R
6. To enable students to use R to conduct analytics on large real

Lab Outcomes:

- 1: Install and use R for simple programming tasks.
2. Extend the functionality of R by using add-on packages
3. Extract data from files and other sources and perform various data manipulation tasks on them.
4. Code statistical functions in R.
5. Use R Graphics and Tables to visualize results of various statistical operations on data .
6. Apply the knowledge of R gained to data Analytics for real life applications.

SN	Detailed Lab/Tutorial Description	Hrs.
1	Introduction: Installing R on personal machines. installing R and RStudio. The basic functionality of R will be demonstrated , Variable types in R. Numeric variables, strings and factors.,Accessing the help system. Retrieving R packages.,Basic data types and operations: numbers, characters and composites.Data entry and exporting dat	3
2	Data structures: vectors, matrices, lists and data frames	4
3	R as a programming language: Grouping, loops and conditional execution, Functions Exploratory data analysisRange, summary, mean, variance, median, standard deviation, histogram, box plot, scatterplot	5
4	Graphics in R: Graphics and tables Working with larger datasets Introduction to ggplot2 graphics	5
5	Regression and correlation: Simple regression and correlation, Multiple regression , Tabular data and analysis of Categorical data	5
6	R for Data Science (Mini Project) Implementing a mini project using any data mining or big data analytics algorithm in R Extracting data from a large Dataset, Exploratory analysis, Visualizations and interpretation of results	4

Laboratory Assessment:

Term Work:

Term Work shall consist of experiments on above guidelines/syllabus. Also Term work Journal must include at least 2 assignments.

25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5Marks (Attendance)

End Semester Practical/Oral Examination:

Pair of Internal and External Examiner should conduct practical/viva based on contents.

Distribution of marks for practical/viva examination shall be as follows:

Practical Examination: 15 Marks Oral Examination: 10 Mark

Text Books:

1. URL: <https://cran.r-project.org/doc/manuals/r-release/R-intro.pdf> (Online Resources)
2. R Cookbook Paperback – 2011 by Teetor Paul O Reilly Publications
3. Beginning R: The Statistical Programming Language by Dr. Mark Gardener, Wiley Publications
4. R Programming For Dummies by Joris Meys Andrie De Vries, Wiley Publications

		Internal assessment			End Sem. Exam				
		1	2	Average					
EC 313	Artificial Intelligence and Machine Learning	40	40	40	60	25	--	25	150

Course Objectives:

1. To conceptualize the basic ideas and techniques of AI
2. To distinguish various search techniques and to make student understand knowledge representation and planning
3. To introduce students to the basic concepts and techniques of Machine Learning
4. To become familiar with regression methods, classification methods, clustering methods

Course Outcomes: Upon completion of the course students will be able to

1. Identify the various characteristics of Artificial Intelligence.
2. Choose an appropriate problem solving method for an agent to find a sequence of actions to reach the goal state.
3. Analyze the strength and weakness of AI approaches to knowledge representation, reasoning and planning.
4. Gain knowledge about basic concepts of Machine Learning.
5. Identify machine learning techniques suitable for a given problem.
6. Solve the problems using various machine learning techniques.

Prerequisite:

Basic Mathematics, Algorithms, Data Structures, Basic Probability and Statistics

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction to Artificial Intelligence(AI)	Introduction and Definition of Artificial Intelligence. Intelligent Agents : Agents and Environments ,Rationality, Nature of Environment, Structure of Agent, types of Agent	05
2.	Problem Solving	Problem Solving Agent, Problem formulation, Solving Problems by Searching. Uninformed Search Methods: Depth First Search, Breadth First Search, Depth Limited Search, Informed Search Method: Heuristic Function, Greedy Best First Search, A* Search Local Search: Hill Climbing Search, Optimization: Genetic Algorithm, Game Playing-Adversarial search, mini-max algorithm	08
3.	Knowledge, Reasoning and Planning	Knowledge based agents First order logic: syntax and Semantic, Knowledge Engineering in FOL Inference in FOL : Unification, Forward Chaining, Backward Chaining and Resolution in FOPL, Planning Agent, Types of Planning: Partial Order, Hierarchical Order, Conditional Order. Expert Systems, Components of Expert System	07
4.	Introduction to Machine Learning	Machine Learning, Types of Machine Learning, Issues in Machine Learning, Application of Machine Learning, Steps in developing a Machine Learning Application. Basics of Neural Networks: Fundamental concepts, Evolution	06
5.	Learning with Regression and trees:	Learning with Regression : Linear Regression, Logistic Regression. Learning with Trees: Decision Trees, Constructing Decision Trees using Gini Index, Classification and Regression Trees (CART),	06
6.	Learning with Classification and clustering	Classification: Rule based classification, classification by Bayesian Belief networks, Naive Bay's classifier, Hidden Markov Models. Support Vector Machine: Maximum Margin Linear Separators, Quadratic Programming solution to finding maximum margin separators, Kernels for learning non-linear functions. Clustering: K-means Clustering, Expectation Maximization Algorithm.	07

DETAILED LAB SYLLABUS: .

Software Requirements: The programs can be implemented in either JAVA or Python and prolog.

Hardware Requirements: Any basic computational platform is sufficient.

Sr. No.	Detailed Lab Description
1	Provide the PEAS description and TASK Environment for a given AI problem.
2	Write simple programs using PROLOG as an AI programming Language
3	Start Implementation · Knowledge Representation and Create Knowledge Base
4	Implement any one of the Uninformed search techniques
5	Implement any one of the Informed search techniques e.g. A-Star algorithm for 8 puzzle problem
6	Implement adversarial search using min-max algorithm.
7	To implement Logistic Regression
8	To implement Linear Regression
9	Write a program to demonstrate the working of the decision tree based algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample
10	To implement clustering.
11	Write a program to demonstrate Support Vector Machine
12	For a given set of training data examples stored in a .CSV file, implement and demonstrate the different machine learning algorithms and compare the result

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessments:

Termwork Assessment: At least 8-10 experiments covering the entire syllabus should be set to have well predefined inference and conclusion. The experiments should be student centric and attempts should be made to make experiments more meaningful, interesting. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.

1. The distribution of marks for term work shall be as follows:
 - Lab Performance (Experiments /case studies): 15
 - Assignments: 05
 - Attendance (Theory & Practical): 05
2. Oral examination will be based on the entire Artificial intelligence and Machine Learning Syllabus.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 314	Big Data Analytics	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Average						
EC 314	Big Data Analytics	40	40	40	60	25	--	25	150	

Course Objectives:

1. To provide an overview of an exciting growing field of Big Data analytics.
2. To discuss the challenges traditional data mining algorithms face when analyzing Big Data.
3. To introduce the tools required to manage and analyze big data like Hadoop, NoSql MapReduce.
4. To teach the fundamental techniques and principles in achieving big data analytics with scalability and streaming capability.
5. To introduce to the students several types of big data like social media, web graphs and data streams.
6. To enable students to have skills that will help them to solve complex real-world problems in decision support.

Course Outcomes: Upon successful completion of the course students will be able to

1. Explain the motivation for big data systems and identify the main sources of Big Data in the real world.
2. Demonstrate an ability to use frameworks like Hadoop, NOSQL to efficiently store, retrieve and process Big Data for Analytics.
3. Implement several Data Intensive tasks using the Map Reduce Paradigm
4. Apply several newer algorithms for Clustering Classifying and finding associations in Big Data
5. Design algorithms to analyze Big data like streams, Web Graphs and Social Media data.
6. Design and implement successful Recommendation engines for enterprises.

Prerequisite: Database Management System.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction to Big Data	Data Introduction to Big Data, Big Data characteristics, types of Big Data, Traditional vs. Big Data business approach, Big Data Challenges, Examples of Big Data in Real Life, Big Data Applications	03
2.	Introduction to Big Data Frameworks: Hadoop, NOSQL	What is Hadoop? Core Hadoop Components; Hadoop Ecosystem; Overview of : Apache Spark, Pig, Hive, Hbase, Sqoop What is NoSQL? NoSQL data architecture patterns: Key-value stores, Graph stores, Column family (Bigtable) stores, Document stores, MongoDB	07
3.	MapReduce Paradigm	MapReduce: The Map Tasks, Grouping by Key, The Reduce Tasks, Combiners, Details of MapReduce Execution, Coping With Node Failures. Algorithms Using MapReduce: Matrix-Vector Multiplication by MapReduce , Relational-Algebra Operations, Computing Selections by MapReduce, Computing Projections by MapReduce, Union, Intersection, and Difference by MapReduce, Computing Natural Join by MapReduce, Grouping and Aggregation by MapReduce, Matrix Multiplication, Matrix Multiplication with One MapReduce Step . Illustrating use of MapReduce with use of real life databases and applications.	06
4.	Mining Big Data Streams	The Stream Data Model: A DataStream-Management System, Examples of Stream Sources, Stream Queries, Issues in Stream Processing. Sampling Data in a Stream : Sampling Techniques. Filtering Streams: The Bloom Filter Counting Distinct Elements in a Stream : The Count-Distinct Problem, The Flajolet-Martin Algorithm, Combining Estimates, Space Requirements . Counting Ones in a Window: The Cost of Exact Counts, The Datar-Gionis-IndykMotwani Algorithm, Query	06
5.	Big Data Mining Algorithms	Frequent Pattern Mining : Handling Larger Datasets in Main Memory Basic Algorithm of Park, Chen, and Yu. The SON Algorithm and MapReduce. Clustering Algorithms: CURE Algorithm. Canopy Clustering, Clustering with MapReduce Classification Algorithms: Parallel Decision trees, Overview SVM classifiers, Parallel SVM, KNearest Neighbor classifications for Big Data, One Nearest Neighbour.	08
6.	Big Data Analytics Applications	Link Analysis : PageRank Definition, Structure of the web, dead ends, Using Page rank in a search engine, Efficient computation of Page Rank: PageRank Iteration Using MapReduce, Topic sensitive Page Rank, link Spam, Hubs and Authorities, HITS Algorithm. Mining Social- Network Graphs : Social Networks as Graphs, Types , Clustering of	09

		Social Network Graphs, Direct Discovery of Communities, Counting triangles using Map-Reduce. Recommendation Engines: A Model for Recommendation Systems, Content-Based Recommendations, Collaborative Filtering.	
--	--	--	--

DETAILED LAB SYLLABUS:

Software Requirements: Virtual Machine, Hadoop Frame work, NOSQL and MongoDB Compilers

Hardware Requirements: PC i3 or above, 8 GB RAM

Sr. No.	Detailed Lab Description
1	Assignment on Study of Hadoop ecosystem
2	Programming exercises on Hadoop Using Hive, Pig, Hbase Sqoop NOSQL, MongoDB
3	Implementing simple algorithms in MapReduce Matrix multiplication, Aggregates, joins, sorting, searching etc.
4	<ul style="list-style-type: none"> ● Implementing Algorithms using MapReduce (Any 2) ● Implementing Frequent Item set Mining Implementing Clustering algorithms Implementing Classification Algorithms
5	Big Data Applications (Any 2) <ul style="list-style-type: none"> ● Implementing Analytics on data streams ● Implementing Social Network Analysis Algorithms Implementing Web Graph Algorithms Implementing recommendation Engines
6	Mini Project: One real life large data application to be implemented (Use standard Datasets available on the web) a) Twitter data analysis b) Fraud Detection c) Text Mining d) Recommendation Engines (list of datasets also given in the text book)

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

1. **Termwork Assessment:** Term Work shall consist of at least 10 to 12 practical's based on the above list. Also Term work Journal must include at least 2 assignments. Journal must

include at least 2 assignments. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance) Oral Examination will be based on the above syllabus.

2. **Oral/Viva Assessment:** An oral exam will be held based on the above syllabus.

Text Books:

		Internal assessment			End Sem. Exam				
		Test1	Test 2	Avg. of 2 Tests					
EC 315	Parallel Computing Architecture	40	40	40	60	25	--	25	150

Course Objectives:

1. To understand the principles of parallel computer architecture.
2. To understand the design of parallel computer systems including modern parallel architectures.
3. To assess the communication and computing possibilities of parallel system architecture and to predict the performance of parallel applications.

Course Outcomes: Upon successful completion of the course students will be able to

1. Students get accustomed with the representation of data, addressing modes, and instruction sets.
2. Students are able to understand parallelism both in terms of a single processor and multiple processors.
3. Technical knowhow of parallel hardware constructs to include instruction-level parallelism for multi core processor design.

Prerequisite: Computer Organization & Architecture

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Fundamentals of Computer Design	Defining Computer Architecture – Trends in Technology – Trends in Power in Integrated Circuits – Trends in Cost – Dependability – Measuring, Reporting and Summarizing Performance – Quantitative Principles of Computer Design – Basic and Intermediate concepts of pipelining – Pipeline Hazards.	04

2.	Introduction to Parallel Processing	Parallel computing structure, scope of parallel computing, architectures classification schemes, applications of parallel processing.	06
3.	Memory and Input output subsystems	Memory structure Hierarchy, Addressing scheme for main memory, Virtual Memory systems, Memory allocation and management strategies, Virtual Memory, Cache Memory, Management and Design criteria, I/O subsystems, Interrupt mechanisms, Vector processing requirements.	08
4.	Pipelining	Principles of pipelining, vector processing: Pipelining, Instruction and Arithmetic pipelines, principles of designing pipelined processors, vector processing requirements Pipeline computers and Vectorization methods: Vectorization and Optimization methods.	07
5.	SIMD and MIMD	SIMD computers and Performance enhancement: Study of SIMD array processor and associative processor, Scientific attached processor. MIMD: Architecture and memory organization of MIMD and Interconnection N/W. Data Driven computing, Data Flow Computer Architecture.	08
6.	Parallel Software Environment	Parallel Algorithm, features of Parallel Languages, Parallel compiler and OS.	06

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.

EC 316	Integrated Circuit Technology	40	40	40	60	25	--	25	150	

Course Objectives:

1. To provide knowledge of Wafer preparation and fabrication for VLSI Technology
2. To provide knowledge of IC fabrication processes and advanced IC technologies.
3. To provide knowledge of IC fabrication processes and design rules.
4. To disseminate knowledge about novel semiconductor measurement.
5. To provide knowledge about different VLSI Technology.
6. To disseminate knowledge about novel VLSI devices and materials.

Course Outcomes: Upon successful completion of the course students will be able to

1. Analyze and demonstrate a clear understanding of various MOS fabrication processes & CMOS fabrication flow.
2. Analyze and design layout of MOS based Circuits.
3. Demonstrate a clear understanding of Semiconductor Measurements & Testing.
4. Analyze SOI and GaAs technology.
5. Develop different fabrication process.
6. Understand advanced technologies, Novel Devices and materials in Modern VLSI Technology.

Prerequisite: Electronic Devices and Circuits I, Digital Circuit Design, VLSI Design

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Crystal Growth, Wafer preparation and fabrication for VLSI Technology	Semiconductor Manufacturing: Semiconductor technology trend, Clean rooms, Wafer cleaning and Gettering. Semiconductor Substrate: Crystal structure, Crystal defects, Czochralski growth, Float Zone growth, Bridgman growth of GaAs, Wafer Preparation and specifications	08

Fabrication Processes Part 1	<p>Epitaxy: Classification, Molecular Beam Epitaxy</p> <p>Silicon Oxidation: Thermal oxidation process, Kinetics of growth, Properties of Silicon Dioxide, Oxide Quality.</p> <p>Device Isolation: LOCOS, Shallow Trench Isolation (STI).</p> <p>Deposition: Physical Vapor Deposition-Evaporation and Sputtering,</p> <p>Chemical Vapor Deposition: APCVD, LPCVD, PECVD</p> <p>Diffusion: Nature of diffusion, Diffusion in a concentration gradient, diffusion Equation, diffusion systems, problems in diffusion.</p> <p>Ion Implantation: Penetration range-Nuclear & Electronic stopping and Range, implantation damage, Annealing-Rapid thermal annealing, ion implantation systems.</p>	07
3.	Fabrication Process Part 2	<p>Etching & Lithography:</p> <p>Etching: Basic concepts and Classification</p> <p>Lithography: Introduction to Lithography process, Types of Photoresist,</p> <p>Types of Lithography: Electron beam, Ion beam and X-ray lithography.</p> <p>Metallization and Contacts: Introduction to Metallization, Schottky contacts and Ohmic contacts.</p> <p>CMOS Process Flow: N well, P-well and Twin tub, CMOS Latch Up</p> <p>Design rules, Layout of MOS based circuits (gates and combinational logic), Buried and Butting Contact.</p>	07
4.	Measurement and Testing	<p>Semiconductor Measurements: Conductivity type, Resistivity, Hall Effect Measurements, Drift Mobility.</p> <p>Testing: Technology trends affecting testing, VLSI testing process and test equipment, test economics and product quality.</p>	06
5.	VLSI Technologies	<p>SOI Technology: SOI fabrication using SIMOX, Bonded SOI and Smart Cut, PD, SOI and FD SOI Device structure and their features.</p> <p>Advanced Technologies: low κ and high κ, BiCMOS, HκMG Stack, Strained Silicon.</p> <p>GaAs Technologies: MESFET Technology, MMIC technologies, MODFET</p>	06
6.	Novel Devices and Materials	<p>Multigate Devices: Various multigate device configurations-double gate, triple gate (FinFET) and Gate All Around (Nanowire).</p> <p>Nanowire: Concept, VLS method of fabrication, Nanowire FET, Types: Horizontal and Vertical Nanowires, III-V compound Materials in Nanowires.</p> <p>2-D Materials and FET: Graphene & CNT FET, MOS₂ and Black Phosphorous.</p>	05

DETAILED LAB SYLLABUS:

Software Requirements: NANOHUB, MICROWIND

Sr. No.	Detailed Lab Description
1	To study the CZ process for Silicon Crystallization.
2	Implement NMOS inverter with resistive load using NANOHUB and study its characteristics.
3	Various effects of Temperature on Thermal Oxidation using NANOHUB.
4	Design of CMOS Inverter using Microwind.
5	Design of CMOS NAND using Microwind.
6	Design of CMOS NOR using Microwind.
7	Design of CMOS EXOR using Microwind.
8	To implement the given function $Y=A+BC$ using Microwind.
9	Design of 6T SRAM using Microwind.
10	Case Study IEEE paper.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

1. Term work Assessment:

- Term work should consist of 10 experiments.
- Journal must include at least 2 assignments
- Mini Project to be performed

Total 25 Marks (Experiments: 10-marks, Attendance Theory& Practical: 05-marks, Assignments: 05-marks, Mini Project: 5-marks)

2. Oral/Viva Assessment:

Based on the above contents and entire syllabus.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 317	Digital Signal Processing	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 317	Digital Signal Processing	40	40	40	60	25	--	25	150	

Course Objectives:

1. To introduce students with Discrete fourier transform and Fast fourier transforms for analysis of Discrete time signals and systems.
2. To use and design techniques for implementation of IIR digital filters.
3. To use and design techniques for implementation of FIR digital filters.
4. To introduce Finite Word Length effects in Digital Filters.
5. To introduce the students to digital signal processors and its applications.
6. To use and understand multirate digital signal processing.

Course Outcomes: Upon successful completion of the course students will be able to

1. Analyze the discrete time signals and system using different transform domain techniques.
2. Apply the knowledge of design of IIR digital filters to meet arbitrary specifications.
3. Apply the knowledge of design of FIR digital filters to meet arbitrary specifications.
4. Understand the effect of hardware limitations on performance of digital filters.
5. Develop different signal processing applications using DSP processors.
6. Analyze discrete-time filter banks and multirate signal processing.

Prerequisite: Signals and systems

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Discrete Fourier Transform and Fast Fourier Transform	Definition and Properties of DFT, IDFT, Circular convolution, Computation of linear convolution using circular convolution, Filtering of long data sequences: Overlap-Save and Overlap-Add Method	08

		FFT: Fast Fourier Transforms (FFT), Radix-2 decimation in time and decimation in frequency FFT algorithms, inverse FFT	
2.	IIR Digital Filters	Analog filter design -Butterworth filters, Chebyshev Type I filters, Elliptic ,Mapping of S-plane to Z-plane, IIR filter design by impulse invariance method and Bilinear transformation method, Design of IIR digital Butterworth filters and Chebyshev Type I filters. Analog and Digital frequency transformations with design examples	07
3.	FIR Digital Filters	Introduction of FIR digital filters, Minimum Phase, Maximum Phase, Mixed Phase and linear phase FIR filters,location of the zeros of linear phase FIR filters, Gibbs phenomenon, Design of FIR filters using Window techniques (Rectangular, Hamming, Hanning, Blackmann, Kaiser), Design of FIR filters using Frequency Sampling technique,Comparison of FIR & IIR	07
4.	Finite Word Length effects in Digital Filters	Quantization, truncation and rounding,Input quantization error, Product quantization error, Coefficient quantization error, Zero-input limit cycle oscillations, Overflow limit cycle oscillations, Scaling. Quantization in Floating Point realization of IIR digital filters, Finite word length effects in FIR digital filters	06
5.	DSP Processors	Introduction to General Purpose and Special Purpose DSP processors, fixed point and floating point DSP processor, digital signal processor architecture , Pipelining, multiplier and accumulator (MAC) ,Very long instruction word Architecture (VLIW) Architecture of TMS320C6X fixed and floating DSP processors. Applications of digital signal processing-Speech processing,Radar Signal Processing, Biomedical Applications in DSP	06
6.	Multirate DSP and Filter Bank	Introduction and concept of Multirate Processing, Decimator and Interpolator, Decimation and Interpolation by Integer numbers, Multistage Approach to Sampling rate converters Sample rate conversion using Polyphase filter structure, Polyphase Decomposition,Filter Banks	05

DETAILED LAB SYLLABUS:

Hardware Requirements: DSP Processor Kit

Software Requirements: Scilab, Matlab

Sr. No.	Detailed Lab Description
1	To perform DFT and IDFT of the discrete time sequence and sketch the magnitude and phase spectrum.

2	To perform circular convolution of discrete time sequences using DFT and IDFT method and compute linear convolution using circular convolution.
3	To Design an analog low pass Butterworth and Chebyshev filter
4	To Design IIR butterworth low pass filter using impulse in-variance method .
5	To Design IIR butterworth low pass filter using bilinear transformation method .
6	To Design IIR Chebyshev low pass filter using bilinear transformation method.
7	To Design FIR low pass, high pass filter using various windowing methods and plot their frequency response.
8	To plot magnitude and phase response of low pass ,high pass & all Pass filter
9	To plot magnitude and phase response of comb filter & notch filter.
10	To perform interpolation and decimation on a given discrete signal.
11	To perform the Circular Convolution of two given discrete sequences using TMS320C6745 Kit.
12	To perform the Linear Convolution of two given discrete sequences using TMS320C6745 Kit.
13	One Course Project

Theory Assessments:

- 1. Internal Assessment:** Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.
- 2. End Sem Theory Examination:**
 - Question paper will consist of 4 questions, each carrying 20 marks.
 - Total 3 questions need to be solved.
 - Q.1 will be compulsory, based on the entire syllabus.
 - Remaining questions will be randomly selected from all the modules.
 - Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

1.Term work Assessment:

At least 08 Experiments and 3 Assignments based on the entire syllabus and **one course project/seminar** must be submitted by a maximum batch of 2 to 3 students. Term work assessment must be based on the overall performance of the student with every experiment and Course-project is graded from time to time.

2.Oral/Viva Assessment: Based on the above contents and entire syllabus.

Text Books:

		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 318	Advanced Network Theory	40	40	40	60	25	--	25	150	

Course Objectives:

1. To get familiar with emerging wireless technologies.
2. To understand basic concept of optical networking.
3. To study various WAN technologies like Frame relay and ATM.
4. To explore basics of network design.
5. To study basic fundamental of network security.
6. To discuss about network management and control.

Course Outcomes: Upon successful completion of the course students will be able to

1. Get familiar with emerging wireless technologies.
2. Understand basic concept of optical networking.
3. Study various WAN technologies like Frame relay and ATM.
4. Explore basics of network design.
5. Study basic fundamental of network security.
6. Discuss about network management and control

Prerequisite: Computer Networks

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Emerging Wireless Technologies	Wireless Personal Area Network – Bluetooth Bluetooth (IEEE 802.15.1), Definitions of the Terms Used in Bluetooth, Bluetooth Protocol Stack, Bluetooth Link Types, Bluetooth Security, Network Connection Establishment in Bluetooth, Network Topology in Bluetooth, Bluetooth Usage Models Bluetooth Applications, WAP and Bluetooth Wireless Personal Area Networks (WPAN): Low Rate (LR) and High Rate (HR) Wireless Sensor Network, Usage of Wireless Sensor	05

		Networks, Wireless Sensor Network Model, Sensor Network Protocol Stack, ZigBee Technology, IEEE 802.15.4 LR-WPAN Device Architecture, IEEE 802.15.3a Ultra WideBand, Radio Frequency Identification.	
2.	Optical Networking	SONET/SDH Standards, devices, DWDM, frame format, DWDM, Performance and design considerations	09
3.	WAN Technologies	Frame: FR concept, FR specifications, FR design and VoFR and Performance and design considerations ATM: The WAN Protocol: Faces of ATM, ATM Protocol operations. (ATM cell and Transmission) ATM Networking basics, Theory of Operations, B-ISDN reference model, PHY layer, ATM Layer (Protocol model), ATM layer and cell Traffic Descriptor and parameters, Traffic Congestion control defined, AAL Protocol model, Traffic contract and QoS, User Plane overview, Control Plane AAL, Management Plane, Sub S3 ATM, ATM public services	08
4.	Network Design	Network layer design, access layer design, access network capacity, network topology and Hardware and completing the access network design	04
5.	Network Security	Security threats, safeguards and design for network security Enterprise Network Security: DMZ, NAT, SNAT, DNAT, Port Forwarding, Proxy, Transparent Proxy, Packet Filtering and Layer 7 Filtering	09
6.	Network Management and Control	Network management definitions, functional areas (FCAPS), SNMP, RMON, Designing a network management solutions, Monitoring and control of network activity and network project management	04

DETAILED LAB SYLLABUS:

Software Requirements:

1. Cisco PacketTracer, ns 2
2. Ns-2: <http://www.isi.edu/nsnam/ns/>
3. Virtual Lab : <http://vlab.amrita.edu/index.php?sub=78&brch=256>
4. Scilab Experiments Book:
https://www.google.co.in/url?sa=t&rct=j&q=&esrc=s&source=web&cd=1&ved=0ahUK Ewjgwc elodTTAhVJrI8KHTQUC9AQFggqMAA&url=http%3A%2F%2Fscilab.in%2Fte xtbook_companion%2Fenerate_book%2F3446&usg=AFQjCNGDs2a6AHGKL9313_j8R a1UN-5SQQ&sig2=yT9ep5_ZlhfrDVsv-GmsWw&cad=rja

Online Repository Sites:

1. Google Drive
2. GitHub
3. Code Guru

Sr. No.	Detailed Lab Description
1	Study of Hardware and Software aspects of Wireless Network.
2	Study, discussion and installation of different network simulation tools such as NS2/NS3, Netstumbler, Wireshark etc.
3	Analysis of Zigbee Network to compute the energy efficiency of the network.
4	Simulation of Wireless Sensor Network (IEEE802.15.4)in NS2 or any other simulator.

5	To analyze the performance of DWDM.
6	To study the performance of SONET.
7	To study the performance of Frame relay.
8	To analyze the performance of ATM.
9	To configure a Network topology using packet tracer software.
10	To study Eavesdropping Attacks and its prevention using SSH.

Theory Assessments:

- 1. Internal Assessment:** Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.
- 2. End Sem Theory Examination:**
 - Question paper will consist of 4 questions, each carrying 20 marks.
 - Total 3 questions need to be solved.
 - Q.1 will be compulsory, based on the entire syllabus.
 - Remaining questions will be randomly selected from all the modules.
 - Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

- At least 08 experiments covering entire syllabus and one mini project should be set to have well predefined inference and conclusion.
- The experiments should be students' centric and attempt should be made to make experiments more meaningful, interesting and innovative.

1.Term work assessment:

- Term work must be based on the overall performance of the student with every experiment graded from time to time. The grades should be converted into marks as per the Credit and Grading System manual and should be added and averaged. The grading and term work assessment should be done based on this scheme.
- The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus.
- Students are encouraged to share their experiments/mini project codes on online repository.

2.Oral/Viva Assessment:

Based on the above contents and entire syllabus.

Text Books:

1. Vijay K. Garg, "Wireless Communication and Networking", Morgan -Kaufmann
2. Series in Networking—Elsevier
3. ATM and IP Internetworking: Khalid Ahmed, John Wiley and Sons Publication.
4. Network Security and Management: Brijendra Singh, Third Edition, PHI Publication.

		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 319	Mobile Computing	40	40	40	60	25	--	25	150	

Course Objectives:

1. To introduce the basic concepts and principles in mobile computing. This includes major techniques involved, and networks & systems issues for the design and implementation of mobile computing systems and applications
2. To explore both theoretical and practical issues of mobile computing.
3. To provide an opportunity for students to understand the key components and technologies involved and to gain hands-on experiences in building mobile applications.
4. To understand different mobility management concepts.
5. To equip students with skills to analyze and design mobile applications.
6. To study emerging technologies like the long term evolution of 3GPP .

Course Outcomes: Upon successful completion of the course students will be able to

1. To identify basic concepts and principles in mobile communication & computing, cellular architecture.
2. To describe the components and functioning of mobile networking.
3. To classify a variety of security techniques in mobile networks.
4. To apply the concepts of WLAN for local as well as remote applications.
5. To describe and apply the concepts of mobility management .
6. To describe Long Term Evolution (LTE) architecture and its interfaces.

Prerequisite: Computer Networks

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hrs
1.	Introduction to Mobile Computing	Introduction to Mobile Computing, Telecommunication Generations, Electromagnetic Spectrum, Antenna ,Signal Propagation, Signal Characteristics, , Multiplexing, Spread Spectrum: DSSS & FHSS	06

2.	GSM Mobile Services	GSM Mobile services, System Architecture, Protocols , Localization and Calling, Handover GPRS system and protocol architecture UTRAN , UMTS core network	08
3.	Mobile Networking	Mobile IP, IP Packet Delivery, Agent Advertisement and Discovery, Registration, Tunneling and Encapsulation, Optimization, Reverse Tunneling, Mobile TCP, Fast Retransmit/ Fast Recovery, Transmission/Timeout Freezing, Selective Retransmission.	06
4.	Wireless Local Area Networks	Wireless Local Area Networks : Introduction, Infrastructure and ad-hoc network IEEE 802.11: System architecture , Protocol architecture , Physical layer, Medium access control layer, MAC management, 802.11a, 802.11b Bluetooth: Introduction, User Scenario, Architecture, protocol stack HiperLAN 1 & HiperLAN 2	10
5.	Mobility Management	Mobility Management : Introduction, IP Mobility, Optimization, IPv6Macro Mobility : MIPv6 Micro Mobility: Cellular IP	05
6.	Long-Term Evolution(LTE) of 3GPP	LTE System Overview, Voice over LTE (VoLTE)	04

DETAILED LAB SYLLABUS:

Software Requirements: J2ME, Android Studio, NS2

Sr. No.	Detailed Lab Description
1	<ol style="list-style-type: none"> 1) Study of NS2 installation in ubuntu. 2) Mobile node creation in NS2. 3) Implementation of packet transfer using TCP in mobile nodes.
2	<ol style="list-style-type: none"> 1) Explore and install J2ME 2) Implementation of basic calculator/EMI calculator in J2ME. 3) To implement Mobile node discovery using J2ME.
3	<ol style="list-style-type: none"> 1) To implement OBEX protocol using bluetooth.
4	<ol style="list-style-type: none"> 1) Explore and install Android studio 2) Develop an application that uses GUI components in Android. 3) Write an application that draws basic graphical primitives on the screen in Android
5	<ol style="list-style-type: none"> 1) To understand the cellular frequency reuse concept fulfilling the following objectives: <ol style="list-style-type: none"> a) Finding the co-channel cells for a particular cell. b) Finding the cell clusters within a certain geographic area. 2) To understand the handover concept in mobile communication.
6	MINI PROJECT Develop an android application for social needs.

Theory Assessments:

1. **Internal Assessment:** Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.
2. **End Sem Theory Examination:**
 - Question paper will consist of 4 questions, each carrying 20 marks.
 - Total 3 questions need to be solved.
 - Q.1 will be compulsory, based on the entire syllabus.
 - Remaining questions will be randomly selected from all the modules.

Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessments:

EC 320	Wireless Networks	40	40	40	60	25	--	25	150	

Course Objectives:

1. To get familiar with basic of wireless system.
2. To understand planning and design of various mobile and wireless networks.
3. To study various WPAN technologies like Bluetooth, Zigbee etc.
4. To explore basics of WAP.
5. To study basic fundamental of WLAN technologies.
6. To discuss introduction of 5G technology.

Course Outcomes: Upon successful completion of the course students will be able to

1. Get familiar with basic of wireless system.
2. Understand planning and design of various mobile and wireless networks.
3. Study various WPAN technologies like Bluetooth, Zigbee etc..
4. Explore basics of WAP.
5. Study basic fundamental of WLAN technologies.
6. Discuss introduction of 5G technology

Prerequisite: Wireless and mobile communication.

Detailed Theory Syllabus:

Sr. No.	Module	Detailed Content	Hours
1	Overview of Wireless System	Advantages, limitations and application wireless media, Infrared Modulation Techniques, DSSS and FHSS, Frequency Spectrum: Radio and Infrared, Wireless generations: 1G: Cellular, 2G: Mobile Radio, 3G: UMTS- Security related Encryption Algorithm	05
2	Planning and design of WWANs	Basics of fundamental of WWANs, Planning and design of wireless networks, Receiver sensitivity and link budget, Pole capacity of CDMA cell, Uplink and downlink radio link budget for CDMA system	09

3	WPANs (Low rate and high rate)	Introduction to wireless PAN, Need of Wireless PAN, Bluetooth Technology: History & Applications, Technical Overview, Bluetooth Specifications, Piconet Synchronization, master-slave switch, Bluetooth security, Enhancements to Bluetooth: Bluetooth Interface issues, Intra & Inter Piconet Scheduling, Scatternet Formation, QoS Assignment, IEEE 802.15 Working group for WPAN, IEEE 802.15.3 & IEEE 802.15.4, Comparison between WPAN System & Comparison between WLAN & WPAN	08
4	Basics of WAP	Introduction to WAP, WML basics, Forms and user input, Data base driven WAP	04
5	Fundamentals of WLANs	Introduction to wireless LAN, Transmission Techniques, Medium Access Control Protocol Issues: Hidden Terminal Problem, Reliability, Collision Avoidance, Congestion Avoidance, Congestion Control, Energy Efficiency, IEEE 802.11 Standard for Wireless LAN: Network Architecture, Physical Layer, MAC Layer, Security, System design and considerations, Enhancements to IEEE 802.11 MAC: Power Control, Spatial Reusability & QoS Provisioning	09
6	Introduction to 5G	Salient features of 5G , 5G technology, 5G Architecture, Advantages and disadvantages, Applications, 5G Advancements, 5G Challenges, 5G future scope	04

2. GitHub

3. Code Guru

Sr. No.	Detailed Lab Description
1	Study of Hardware and Software aspects of Wireless Network.
2	Study, discussion and installation of different network simulation tools such as NS2/NS3, Netstumbler, Wireshark etc.
3	Analysis of Zigbee Network to compute the energy efficiency of the network.
4	Simulation of a simple wireless network (IEEE802.11) using NS2 or any other simulator.
5	Configuration of WPAN using Xbee S2 series modules and XCTU software.
6	Use of wireshark to capture WiFi or Bluetooth packets.
7	Configuration of WLAN.

8	Analysis of WiFi network to compute average end to end delay and packet delivery ratio.
9	Link budget analysis of a GSM Network using Scilab / Matlab.
10	Link budget analysis of a WCDMA Network using Scilab / Matlab.
11	Simulation of Wireless Sensor Network (IEEE802.15.4)in NS2 or any other simulator.

Theory Assessments:

1. **Internal Assessment:** Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. **End Sem Theory Examination:**

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.

Weightage of marks should be proportional to number of hours assigned to each module

Lab Assessments:

1.Term work Assessment:

- Term work should consist of 10 experiments.
- Journal must include at least 2 assignments

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
IL 360	Entrepreneurship	03	-	-	03	-	-	03

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
IL 360	Entrepreneurship	40	40	40	60	-	-	-	100	

Course Objectives:

1. To understand the basic concepts of entrepreneurship.
2. To understand the role of entrepreneurship in economic development
3. To understand the importance of opportunity recognition and internal and external analyses to the success of a business venture
4. To enable the learners to know the factors contributed in failure of the enterprise

Course Outcomes:

1. Analyse the business environment in order to identify business opportunities
2. Identify the elements of success of entrepreneurial ventures
3. Evaluate the effectiveness of different entrepreneurial strategies,
4. Interpret their own business plan

Detailed Theory Syllabus:

Module No	Detailed Content	Hours
1	Conceptual definition of entrepreneurs and entrepreneurship, Advantages and Disadvantages of Being an Entrepreneur, Entrepreneurial motivation, Entrepreneurial characteristics	8
2	Recognizing, assessment and Exploiting the Opportunity, Conducting Internal and External Analyses, Determining the Feasibility of the Concept, Selecting a Marketing Strategy	6
3	Entrepreneurial Business Types A. Overview of Franchising and Their Advantages and Disadvantages B. Overview of Buyouts & Their Advantages and Disadvantages C. Overview of Family Businesses and Their Advantages and Disadvantages	6

4	The Overall Business Plan, Purpose of the Business Plan, Components of the Business Plan, Presentation of the Business Plan, Matching the Business Plan to the Needs of the Firm	6
5	The Marketing Plan, conducting a Market Analysis, Understanding the Target Market, Reaching the Target Market through Locale and Engagement	8
6	Entrepreneurial failure, early stage failure, late stage failure	6

Assessment:

Internal Assessment: 40 marks

End Semester Examination: 60 Marks

Books and References:

1. Fundamentals of Entrepreneurship by H. Nandan, PHI
2. Entrepreneurship by Robert Hisrich, Michael Peters, Dean Shepherd, Sabyasachi Sinha, Mc Graw Hill
3. Why startups fail: A new roadmap for entrepreneurial success by Tom Eisenmann

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
IL 361	IPR and Patenting	03	-	-	03	-	-	03

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
IL 361	IPR and Patenting	40	40	40	60	-	-	-	100	

Course Objectives:

1. To introduce fundamental aspects of Intellectual property Rights to learners who are going to play a major role in development and management of innovative projects in industries.
2. To get acquainted with Patent search, patent filing and copyright filing procedure and applications, and can make a career as a patent or copyright attorney.
3. To make aware about current trends in IPR and Govt. steps in fostering IPR

Course Outcomes:

1. Understand the importance of IPR, types of Patent type and its importance in industries.
2. Able to search, draft and file the patent and copyright application to the patent office.
3. Learn the recent trends of IPR and can open the way for the students to catch up Intellectual Property (IP) as a career option:
 - a) R&D IP Counsel in research organization
 - b) Government Jobs – Patent Examiner
 - c) Private Jobs
 - d) Patent agent and Trademark agent.

Detailed Theory Syllabus:

Module No	Module	Detailed Content	Hrs.
1	Overview of Intellectual Property	Introduction and the need for intellectual property right (IPR) - Kinds of Intellectual Property Rights: Patent, Copyright, Trade Mark, Design, Geographical Indication, Plant Varieties and Layout Design – Genetic Resources and Traditional Knowledge – Trade Secret - IPR in India : Genesis and development – IPR in abroad - Major International Instruments concerning Intellectual Property Rights: Paris Convention, 1883, the Berne Convention, 1886, the Universal Copyright Convention, 1952, the WIPO Convention, 1967, the Patent Co-operation Treaty, 1970, the TRIPS Agreement, 1994	9
2	Patents	Patents - Elements of Patentability: Novelty, Non-Obviousness (Inventive Steps), Industrial Application - Non - Patentable Subject Matter - Registration Procedure, Rights and Duties of Patentee, Assignment and licence, Restoration of lapsed Patents, Surrender and Revocation of Patents, Infringement, Remedies & Penalties - Patent office and Appellate Board	7
3	Copyright	Nature of Copyright - Subject matter of copyright: original literary, dramatic, musical, artistic works; cinematograph films and sound recordings - Registration Procedure, Term of protection, Ownership of copyright, Assignment and licence of copyright - Infringement, Remedies & Penalties – Related Rights - Distinction between related rights and copyrights	6
4	Trademark	Concept of Trademarks - Different kinds of marks (brand names, logos, signatures, symbols, well known marks, certification marks and service marks) - Non-Registrable Trademarks - Registration of Trademarks - Rights of holder and assignment and licensing of marks - Infringement, Remedies & Penalties - Trademark's registry and appellate board	6

5	Patent Acts	<p>Section 21 of the Indian Patent Act, 1970 (and corresponding Rules and Forms) with specific focus on Definitions, Criteria of Patentability, Non-Patentable Subject Matters, Types of Applications, and Powers of Controllers. Section 25 - Section 66 of the Indian Patent Act, 1970 with specific focus on the Oppositions, Anticipation, Provisions of Secrecy, Revocations, Patent of Addition, and Restoration of Patents.</p> <p>Section 67 - Section 115 of the Indian Patent Act, 1970 with specific focus on Patent Assignments, Compulsory Licensing, Power of Central Government, and Infringement Proceedings. Section 116 - Section 162 of the Indian Patent Act, 1970 with specific focus on Convention/PCT Applications, Functions of Appellate Board and other Provisions. Amendment Rules 2016 with emphasis on important revisions to examination and Hearing procedures; provisions for start-ups and fees</p>	9
6	Indian IP Policy	India`s New National IP Policy, 2016 – Govt. of India step towards promoting IPR – Govt. Schemes in IPR – Career Opportunities in IP – IPR.	3

Assessment:

Internal Assessment: 40 marks

End Semester Examination: 60 Marks

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
IL 362	Introduction to Bioengineering	03	-	-	03	-	-	03

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
IL 362	Introduction to Bioengineering	40	40	40	60	-	-	-	100	

Course Objectives:

1. To understand and analyze the human body as a mechanical assembly of linkages and describe the fundamentals of biomechanics.
2. To Study the deformability, strength, visco elasticity of bone and flexible tissues, modes of loading and failure and describe the types and mechanics of skeletal joints.
3. To describe movement precisely, using well defined terms (kinematics) and also to consider the role of force in movement (kinetics).
4. To teach students the unique features of biological flows, especially constitutive laws and boundaries.
5. To teach students approximation methods in fluid mechanics and their constraints.
6. To consider the mechanics of orthopedic implants and joint replacement , mechanical properties of blood vessels and Alveoli mechanics

Course Outcomes: Upon successful completion of the course students will be able to

1. Apply a broad and coherent knowledge of the underlying principles and concepts of biomechanics, particularly in the fields of kinematics and kinetics as applied to human and projectile motion.
2. Understand and describe the properties of blood , bone and soft tissues like articular cartilage tendons and ligaments.
3. Gain broad knowledge about the mechanics of moving systems and familiarity with human anatomy to competently analyze gross movement of the human body.
4. Be able to computationally analyze the dynamics of human movement from the most commonly used measurement devices in the field, such as motion capture and force platform systems.
5. Use knowledge gained to competently interpret the current understanding of human movement and present recommendations for further study.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs
1	Introduction: Definition of Biomechanics, Selected Historical highlights, The Italian Renaissance, Gait century, Engineering Physiology & Anatomy	06
2	Tissue Biomechanics: Bone structure & composition mechanical properties of bone, cortical and cancellous bones, viscoelastic properties, Maxwell & Voight models – anisotropy. Structure and functions of Soft Tissues: Cartilage, Tendon, Ligament, and Muscle	08
3	Joints Biomechanics: Skeletal joints, forces and stresses in human joints, Analysis of rigid bodies in equilibrium, free body diagrams, types of joint, biomechanical analysis of elbow, shoulder, hip, knee and ankle.	07
4	Biomaterials: Brief Anatomy, Bone, cartilage, ligament, tendon, Muscles, biofluid their physical properties	06
5	Implants: General concepts of Implants, classification of implants, Soft tissues	06
6	Application of advanced engineering techniques to the human body, case studies.	06

Assessment:

		Internal assessment			End Sem. Exam				
		Test1	Test 2	Avg. of 2 Tests					
IL 363	Product Design	40	40	40	60	-	-	-	100

Course Objectives:

1. To familiarize with fundamental product design concepts
2. To acquaint with product design methodologies
3. To understand product design needs and issues in industry

Course Outcomes: Upon successful completion students will be able to

1. Demonstrate product design and development process.
2. Analyze a product in perspective of aesthetic and ergonomic considerations.
3. Illustrate considerations of Design for Manufacturing and Assembly in product development.
4. Apply appropriate tools and techniques in the design of solutions that are usable and functional for various applications.
5. Design the products as per the customer/industry requirements
6. Apply principles of economy and demonstrate legal and social issues pertaining to product development.

DETAILED THEORY SYLLABUS:

Module	Detailed content	Hours
1	Product definition, specification, Phases of product development: conceptual, embodiment and detailed design, product and technology development cycle, Concept generation and evaluation methods, product architecture, Product life cycle Management with case studies, Product analysis. Creativity and Idea generation technique, importance of Quality Dimensions: Performance, Features, aesthetics, Ergonomics, Reliability, Sustainability, Serviceability, Brand value, Value Vs cost, Importance of shape, color, feature & Resemblance.	06

2	Design Factors: Ergonomics, Aesthetics, Anthropometry, Comforts, Economic factors Axiomatic design principles and case studies. Design Thinking, Design by Innovation and collaboration Material and Process selection Methods, Expert systems. Computer Database Approach, performance indices decision matrix, AHP and fuzzy approach, Introduction to material and process selection software.	06
3	Design for Manufacturing (DFM) and Design for Assembly (DFA) Designs for Maintainability and Reliability and some methods for reliability assessment, Designs for Environment, Design for Robustness: Taguchi Designs & Design of Experiments (DOE).	08
4	Product Design Tools and Techniques: Value Engineering / Value Analysis: definition, methodology- FAST, Benchmarking, Supplier involvement robust design, QFD, Design & process FMEA. Reverse Engineering, Concurrent engineering & Sequential engineering, Case studies.	08
5	Product Development Cycle and Importance of Prototyping. Types of prototypes. Principal and advantages & Different Type of Generative Manufacturing process, Viz. Stereo lithography. FDM, SLS etc. Factors Concerning to RP: Consideration for Adoptions, Advantages, Accuracy and Economic Consideration. Introduction to Assembly Modeling, Top-Down and Bottom-Up Approaches of AM, Mating Conditions, representation Schemes. Generation of Assembly Sequences. Case studies	06
6	Economics of Product Development: Product costing, Principals of Economy, Engineering Economy and Design Process, Economic Analysis, Inflation, Time Value of Money, Numerical on Internal Rate of Return and Net Present Value (NPV) method. Legal and social issues, Patents and IP acts.	06

Back to Scheme

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
IL 364	Visual Arts	03	-	-	03	-	-	03

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		Test1	Test 2	Total of 2 Tests					
IL 364	Visual Arts	10	10	20	40	-	40	-	100

Course Objectives:

1. To enable learners to develop aesthetic judgement, visual perception, critical thinking skills in the different forms of art and understand its application.
2. To promote the concept of visual design and understand the different meanings assigned to colours, its impact and problems.
3. To provide the opportunity and scope to use the image editing software for creating images for Web and Video.
4. To inculcate the basic skills required in drawing and painting through exposure in nature and study of still objects.
5. To train students to express their feelings and write imaginatively.
6. To prepare the learners for the use of clay modelling techniques and its industrial applications.

Course Outcomes: Upon successful completion of the course students will be able to

1. Acquire the skills necessary for aesthetic judgement, visual perception and critical thinking required in different forms of art.
2. Demonstrate the understanding of the concept of visual design with respect to the different meanings assigned to colours and the problems associated.
3. Illustrate effective use of image editing software for creating images for the Web and Video.
4. Determine the importance of drawing and painting with respect to nature and still objects.
5. Perform successfully in expressing their feelings creatively.
6. Develop the techniques required for clay modeling and sculpture for industrial use.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs
1	History of Art and Architecture- Changing needs and forms of art from the Palaeolithic period to The Renaissance period with special reference to Roman, Indian and Chinese art	4

2	Introduction and concepts of visual design with special emphasis on the psychological impact of colour	5
3	Introduction to image editing software, tools, application and creating Images for Web and Video. With special reference to Adobe Photoshop	7
4	Fundamentals of Drawing- study of forms in nature, study of objects and study from life, creative painting- basic techniques, tools and equipment, medium of painting.	6
5	Creative writing- Movie critique, book reviews, Poems, short plays and skits, Humorous Essays, Autobiography and short stories.	7
6	Creative sculpture- Introduction to clay modelling techniques, study of natural and man-made objects in clay, Sculpture with various materials - Relief in Metal Sheets – Relief on Wood – Paper Pulp - Thermocol. Sculpture with readymade materials.	7

Assessment:

Internal Assessment: 40 marks

End Semester Examination: 60 Marks

		Test 1	Test 2	Total of 2 Tests						
IL 365	Journalism, Media and Communication Studies	15	15	30	45	25	-	-	100	

Course Objectives:

1. Provide a good grounding in the basic concepts of Journalism, Mass communication and Media.
2. Familiarize learners with reporting and editing practices.
3. Teach students to write editorials, feature articles, interviews, reviews, criticism etc.
4. To inculcate the skills required for writing in online newspapers, blogs, email and cell phone.
5. To prepare the learners for understanding the importance of Press laws and Ethics.
6. To train learners in advertising techniques and Public Relation Communication

Course Outcomes: Upon successful completion of the course students will be able to

1. Acquire conceptual and theoretical knowledge of Journalism, Mass Communication and Media Studies and learn to think critically about issues and topics of the subject.
2. Demonstrate the understanding of reporting and editing from Newspaper and the Organization.
3. Perform successfully in writing effective editorials, featured articles reviews etc.
4. Illustrate the skills required for writing in online newspapers, blogs, emails etc.
5. Determine the importance of Press Laws and Ethics.
6. Develop an understanding of the techniques required for advertising and Public Relation Communication.

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs
1	Introduction to Journalism, Communication, Media and Cultural Studies- Basics of Mass communication, Pioneers of Indian Journalism, Introduction to newspapers, magazines and other publications. Introduction to broadcast journalism with special reference to television	5
2	Reporting and Editing Practices-Reporting different news, stories from Newspaper, and Organization. Principles of editing, rewriting, and translation	7
3	Writing for Print- Newspaper Content Writing Opinion pieces, editorials, feature articles, interviews, profiles, reviews, criticism etc.	7
4	Writing for Media- Introduction to New Media Writing for Online newspapers Blogs Cell phone Communication E-mail	6
5	Press Laws and Ethics- Origin and definition of Law, Law and Morality, Types of Law – Civil and Criminal, Press Legislations, Freedom of the Press Defamation Contempt of Court	4
6	Public Relations and Advertising- Introduction to Public Relations Stages of PR Communication with Public Need and Meaning of Advertising, Advertising strategies and Sales Promotion	7

IL 366	Computational Physics	20	20	20	40	20	20	-	100

Course Objectives:

1. To expose the students to the vast field of computational physics.

Course Outcomes: Upon successful completion of the course students will be able to

1. To understand various approaches of simulating physical systems on a computer.
2. To choose the correct method to solve a computational problem.

DETAILED THEORY SYLLABUS:

Module	Detail Content	Hrs.
1	Introduction to Statistical Mechanics : Thermodynamics and kinetic theory, specification of state of system, Concept of ensemble, phase space, microcanonical ensemble (NVE), statistical concept of temperature, canonical ensemble (NVT), equipartition theorem, Maxwell-Boltzmann velocity distribution, grand canonical ensemble (μ VT), chemical potential	6
2	Molecular Dynamics (MD): Integrating equation of motion of a few variables, role of molecular dynamics (MD), the basic machinery, Lennard-Jones potentials modeling physical system, boundary conditions, time integration algorithm	7
3	Starting a simulation, simulation of microcanonical (NVE) and canonical ensemble (NVT), controlling the system (temperature, pressure), thermostats and barostats, equilibration, running, measuring and analyzing MD simulation data, measurement of statistical quantities, interatomic potentials, force fields.	7
4	Monte Carlo (MC) Method : Random number: Definition, True and Pseudo random number generators (RNG), uniform and non-uniform RNG, Linux RNG, testing a RNG.	6
5	Monte Carlo simulations : Buffon's needles, MC Integration, hit and miss (estimation of pi and e), stochastic processes, sample mean integration, importance sampling,	7

	Markov Chain, Metropolis method, master equation, introduction to 2D-Ising model. Random walk: 1-D and 2-D random walk, calculation of rms displacement.	
6	Introduction to Simulations of quantum systems	3

Assessment:

Internal Assessment: 40 marks

IL 367	Polymers and Polymeric Materials	03	-	-	03	-	-	03

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
IL 367	Polymers and Polymeric Materials	40	40	40	60	-	-	-	100	

Course Objectives:

1. To impart a scientific approach and to familiarize the applications of polymeric materials in the field of engineering.
2. The student with the knowledge of the basic polymer science will understand and explain scientifically the various problems related to polymeric materials in the industry/engineering field.
3. To develop abilities and skills that are relevant to the study and practice of polymer science and engineering.

Course Outcomes: Upon successful completion of the course students will be able to

1. To understand and analyze various polymeric materials and to establish the structure property relationship.
2. To select the proper polymeric material for specific industrial applications.
3. To become familiarized with various characterization techniques related to polymeric materials.

DETAILED THEORY SYLLABUS:

Module	Detail Content	Hrs.
1	Basic understanding of Polymeric aspects: Monomers, functionality, degree of polymerizations, classification of polymers, glass transition, melting transition, criteria for rubberiness, polymerization methods: addition and condensation; metallocene polymers and other newer techniques of polymerization, copolymerization, monomer reactivity ratios and its significance, different copolymers, random, alternating, azeotropic copolymerization, block and graft copolymers, concept of average molecular weight, determination of number average, weight average	9
2	Polymer Technology:	5

	Compounding of plastics, Polymer compounding-need and significance, different compounding ingredients for rubber and plastics, crosslinking and vulcanization	
3	Polymer Processing: Fabrication of plastics by different moulding process, Compression molding, transfer molding, injection molding, blow molding, reaction injection molding, extrusion, pultrusion, calendaring, rotational molding, thermoforming, rubber processing in two-roll mill, internal mixer	6
4	Polymer blends: Thermo- dynamical aspects of polymer blends and its miscibility, Role of compatibilizer, Composition based structure (dispersed and co-continuous), properties and its application, choice of polymers for blending, thermodynamics, phase morphology, polymer alloys, polymer eutectics, plastic-plastic, rubber-plastic and rubber-rubber blends	6
5	Polymer composites: Fundamentals of polymer composites, Advanced polymer nanocomposites, Fillers used for polymer composites, Effect of processing condition and composition, Polymer composites structure, characterisation and design, physical and chemical modification of polymer composites. 1-D and 2-D random walk, calculation of rms displacement.	6
6	Testing of Polymeric Materials: Samples preparation, Mechanical-static and dynamic tensile, flexural, compressive, abrasion, endurance, fatigue, hardness, tear, resilience, impact, toughness. Conductivity-thermal and electrical, dielectric constant, dissipation factor, power factor, electric resistance, surface resistivity, volume resistivity, swelling, aging resistance, establishment of structure property relationship	7

IL 368	Vehicle Safety	40	40	40	60	-	-	-	100

Course Objectives:

1. To familiarize basic concepts of vehicle safety
2. To familiarize accident reconstruction analysis methods
3. To acquaint with different issues related to vehicle safety in India

Course Outcomes: Upon successful completion of the course students will be able to

1. Comprehend Vehicle design from safety point of view.
2. Apply concepts of accident reconstruction analysis in real world.
3. Enumerate interrelationship among occupant, restraint systems and vehicles in accidents
4. Illustrate role and significance of seat in Rear crash safety
5. Demonstrate different active and passive safety systems available in vehicles
6. Contribute to the society by being proactive to the cause of safety on roads and in vehicles

DETAILED THEORY SYLLABUS:

Module	Detailed Contents	Hrs.
1	Introduction to vehicle safety-the integrated approach and its classification SAVE LIVES- by WHO Importance of Risk evaluation and communication, Concepts of Universal design, India's BNVSAP and its outcomes	6
2	Crash and distracted driver, Human error control Crash Testing, Use of Dummies, evolution and built of dummies. Relevance of Star ratings,NCAPs around the world- Accident Data, Biomechanics and Occupant Simulation Vehicle Body Testing, Dynamic Vehicle Simulation Tests Occupant Protection,Compatibility, Interrelationship Among Occupants, Restraint Systems and Vehicle in Accidents	8
3	Significance of Rear Crash Safety Role of seat in Rear crash safety Self aligning head restraints Pedestrian Protection testing and systems Under run Protection Devices	6

4	Introduction to Accident Analysis Reconstruction methods Skid distances and Critical speed from Tire Yaw marks Reconstruction of Vehicular Rollover Accidents Analysis of Collisions Reconstruction Applications Impulse Momentum Theory Crush Energy Photogrammetry for accident constructions	8

Lab Objectives:

1. To demonstrate use of different types of hand tools
2. To understand testing of different active and passive components mounted on PCB
3. To understand functionality TTL and CMOS digital IC tester
4. To demonstrate computer assembling, troubleshooting and software installation
5. To understand/demonstrate concept of circuit diagram of LED/LCD TV, DTH and mobile phone troubleshooting
6. To understand concept of medical equipments

Lab Outcomes:

1. Demonstrate use of different types of hand tools
2. Understand testing of different active and passive components mounted on PCB
3. Understand functionality TTL and CMOS digital IC tester
4. Demonstrate computer assembling, troubleshooting and software installation
5. Understand/demonstrate concept of circuit diagram of LED/LCD TV, DTH and mobile phone troubleshooting
6. Understand concept of medical equipments

SN	Detailed Lab/Tutorial Description	Hrs.
1	Demonstrate use of various hand held tools.	2
2	Test the performance of different passive electronic components (fixed/variable)	2
3	Test the performance of active electronic components like general purpose transistor/FET/MOSFET/SCR/ DIAC/TRIAC with DMM and CRO OR Components Tester	4
4	Verify the functionality of TTL and CMOS Digital IC's using IC tester	4
5	Explore a datasheet of minimum any five electronics components and analog/ Digital IC's.	2
6	Draw the given regulated power supply circuit/ SMPS (from any television/fridge/ computer system/ laboratory etc)	2

7	Identify basic sections of a personal computer/Laptop	2
8	Demonstrate Assembling of Personal Computer/Laptop	4
9	Troubleshoot the booting process of computer system and install different hardware associated with computer (HDD, LAN Card, Audio System etc)	4
10	Study Installation of Software and Configure Internet	4
11	Explore circuit diagram of LED/LCD TV.	2
12	Demonstrate Installation of DTH system	4
13	Demonstrate installation Solar power system	4
14	Practice steps for mobile troubleshooting	4
15	Visit to Medical Equipment Industry/Laboratory	8

Assessment:

Internal Assessment: 40 marks

End Semester Examination: 60 Marks

Books/References:

1. Troubleshooting and Maintenance of Electronics Equipment, Singh K. Sudeep, Katson Book ,New Delhi ,II edition , Reprint 2014
2. Mobile repairing Books, Manohar Lotia, BPB Publication, New Delhi , latest edition
3. Troubleshooting Electronic Equipment: Includes Repair and Maintenance, Second Edition, Khandpur R. S. , Tata McGraw-Hill Education, New Delhi ,India , latest edition.
4. Data Books, National semiconductor.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 392	Project-A	--	04	--	--	02	--	02

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 392	Project-A	--	--	--	--	25	--	25	50	

Lab Objectives:

1. To offer students a glimpse into real world problems and challenges that need Engineering based Solutions
2. To enable students to create very precise specifications of the Engineering solution to be designed.
3. To introduce students to the vast array of literature available of the various research challenges in the field of Electronics and Computer Science Engineering.
4. To create awareness among the students of the characteristics of several domain areas where Electronics and Computer Science Engineering can be effectively used.
5. To enable students to use all concepts in creating a solution for a problem
6. To improve the team building, communication and management skills of the students.

Lab Outcomes: Student will be able to:

1. Discover potential research areas in the field of Electronics and Computer Science Engineering.
2. Conduct a survey of several available literatures in the preferred field of study
3. Compare and contrast the several existing solutions for research challenge.
4. Demonstrate an ability to work in teams and manage the conduct of the research study.
5. Formulate and propose a plan for creating a solution for the research plan identified
6. To report and present the findings of the study conducted in the preferred domain

Guidelines:

1. The project work is to be conducted by a group of two to four students
2. Each group will be associated with a project mentor/guide. The group should meet with the project mentor/guide periodically and record of the meetings and work discussed must be documented.
3. Department has to allocate half day for the project work in VI semester.
4. To encourage project based learning in the curriculum students may identify their technical domain area in semester VI and can perform the Mini-project in the VI semester or students may do literature survey.
5. Each group along with its guide/mentor shall identify a potential research area/problem domain, on which the study is to be conducted.

6. Each team will do a rigorous literature survey of the problem domain by reading and understanding at least 3-5 research papers from current good quality national/international journals/conferences.
7. (Papers selected must be indexed by Scopus/IEEE/Springer/ACM etc.). The list of papers surveyed must be clearly documented.
8. The project assessment for term work will be done at least two times at department level by giving presentation to panel members which consist of at least three (3) members as internal examiners (including the project guide/mentor) appointed by the Head of the department.
9. A report is to be prepared summarizing the findings of the literature survey. A comparative evaluation of the different techniques surveyed is also to be done.
10. Teams must analyze all the results obtained by comparing with other standard techniques.
11. Every team must publish their work in national / international conference/journals if possible (publish in Scopus indexed journals).
12. The team will finally propose a plan for project work to be continued in the final year.

Project Assessment:

1.Evaluation:

1. Each team has to give presentation/demo to the Internal Panel and External examiner.
2. Each team will prepare a report that will summarize the results of the literature survey and the project proposal. The list of papers surveyed must be clearly documented.
3. Each group will be jointly evaluated by a team of Internal and External Examiners approved by the Department of Electronics and Computer Science Engineering.
4. Oral exam will be conducted on the project done by the students.

2.Term Work:

Term Work shall consist of full Literature survey/ Mini-project and Presentation on above guidelines/syllabus.

3.Oral Exam:

An Oral exam will be held based on the Literature survey/ Mini-project and Presentation.

Bachelor of Technology
In
Electronics & Computer
Science

(Semester VII)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
EC 401	Personal Finance Management	Contact Hours	2	-	-	2
		Credits	2	-	-	1

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
EC 401	Personal Finance Management	20	20	20	40	-	-	--	60

Course Objectives: The course or instructor aims

1. To introduce the basic concepts of finance and their practical application .
2. To demonstrate the process of drafting a financial budget.
3. To explain investment avenues and planning of personal finance.
4. To develop portfolio strategies for individual and institutional investor
5. To discuss various components of insurance and tax management.
6. To introduce financial frauds , measures to avoid frauds and resources of frauds .

Course Outcomes: On successful completion of course learner/student will be able:

1. To know basic concepts of finance and interpret current business positions by reading books of accounts .
2. To analyze investment avenues and plan personal finance to develop portfolio strategies for individuals .
3. To Develop skills to interpret current market position.
4. To Create analytical approach for financial decisions.
5. To learn and understand Tax and Insurance management.
6. To identify financial frauds and understand the level of financial aspects .

Detailed Theory Syllabus:

SN	Module	Detailed Contents of Module	Hrs
1	Introduction to Personal Financial Planning	Financial Planning Process: Goal, Vision and mission, Components of Personal Financial Plan, Advantages of developing personal financial plan.	3
2	Financial Budget	Meaning and Process of Drafting Financial Budget, Components of Financial Budget, Drafting Financial Budget.	3
3	Investment Management	Meaning of Investment, Concept of Risk and Return and Time Value of Money, Investment Avenues, Portfolio Creation and Management.	6
4	Insurance and Spending Management	Components of Insurance: Life Insurance, Health Insurance, Property Insurance, Spending Management.	3
5	Tax Management	Introduction to Tax Regime and Tax Returns, Introduction to Income Tax and its impact on Incomes , Tax on property: Revenue and Capital Incomes, Tax Management, Tax Saving, Tax Avoidance	3
6	Financial Frauds	Meaning and Types of Fraud, Investment Frauds, Online Payment Frauds, Identity Theft, Mass Marketing Fraud , Measures to avoid frauds, Recourse from frauds, Cases of Frauds	6

Theory Assessment:**Internal Assessment: 20 marks**

Consisting of Two compulsory internal assessments 20 Marks each. The final marks will be the average score of both the assessments.

End Semester Examination: 40 Marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the curriculum.

Books and References:

1. Financial Management: I M Pandey, Vikas Publishing House.
2. Financial Management: M.Y. Khan, P.K. Jain, Tata McGraw Hill.
3. Financial Management: Prassana Chandra, Prentice Hall.
4. Investment Analysis & Portfolio Management- Prasanna Chandra, Tata McGrawHill
5. Wealth Management- Dun & Bradstreet, Tata McGrawHill
6. Wealth Management- S.K .Bagachi, Jaico publishing house

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 402	Deep Learning	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		Test1	Test 2	Avg. of 2 Tests					
EC 402	Deep Learning	40	40	40	60	25	--	25	150

Course Objectives:

1. To learn the fundamentals of Neural Network.
2. To gain an insight into optimization and regularization of Deep Neural Networks
3. To acquire knowledge of advanced concepts of Convolution Neural Networks, Recurrent Neural Networks and Autoencoders.
4. To understand the applications of DL algorithms in image classification, image captioning, image generation, text summarization and video to Text operation.

Course Outcomes: Upon successful completion of the course students will be able to:

1. Gain a foundational understanding of neural networks and deep learning
2. Perform regularization, optimization and select hyperparameters for deep learning models.
3. Apply concepts of Convolutional Neural Networks for supervised learning applications
4. Demonstrate Recurrent Neural Network model to forecast time-series data and process sequential text data.
5. Apply concepts of Autoencoder for unsupervised learning applications
6. Implement deep learning algorithms and solve real-world problems.

Prerequisite: Probability and Basic Biological Concepts

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction	<p>1.1: Introduction to NN Biological Neuron. McCulloch Pitts NN, Linear Separability, Learning Rule: Perceptron, Delta.</p> <p>1.2: Introduction to Deep Learning ML vs DL approach, Types of DL Algorithms, Hyperparameters, Loss functions, Data augmentation, Activation functions: Sigmoid, Tanh, ReLU, Softmax.</p>	05
2.	Optimization and Regularization	<p>2.1: Optimization Learning with backpropagation, Learning Parameters: Gradient Descent (GD), Stochastic and Mini Batch GD, Momentum Based GD, Nesterov Accelerated GD, AdaGrad, Adam, RMSProp</p> <p>2.2: Regularization Overview of Overfitting, Types of biases, Bias Variance Tradeoff Regularization Methods: L1, L2 regularization, Parameter sharing, Dropout, Weight Decay, Batch normalization, Early stopping, Data Augmentation, Adding noise to input and output</p>	08
3.	Supervised Deep Learning: Convolutional Neural Networks	<p>3.1: Introduction Edge Detection Filters, Filter Size, Convolutions, Padding, Stride, Compare CNN and ANN, Limitations of CNN.</p> <p>3.2: Architecture CNN architecture, Layers: Pooling, Convolutions. Transfer learning, DL architecture: LeNET and AlexNET.</p>	07
4.	Supervised Deep Learning: Recurrent Neural Networks	<p>4.1: Introduction Recurrent neuron, RNN model, RNN types, Gradients in RNN, Back propagation, Compare CNN and RNN.</p> <p>4.2: Long Short Term Memory Selective Read, Selective write, Selective Forget, Gated Recurrent Unit</p>	07
5.	Unsupervised Deep Learning: Autoencoders	<p>5.1: Introduction, Linear Autoencoder, Undercomplete Autoencoder, Overcomplete Autoencoders, Regularization in Autoencoders.</p> <p>5.2: Denoising Autoencoders, Sparse Autoencoders, Contractive Autoencoders.</p>	07
6.	Applications	<p>6.1: Application of Autoencoders: Image Compression</p> <p>6.2: Image classification, Image Captioning, Image generation, Text summarization, Video to Text using LSTM.</p>	05

DETAILED LAB SYLLABUS:

Lab Prerequisite: Knowledge of Machine learning algorithms beneficial, Python Programming.

Suggested List of Experiments:

- Implementation of McCulloch-Pitts artificial neuron.
- Understanding AND, OR, NAND and XOR problem with basic ANN
- Implementation and training NN with 2 inputs to learn AND, OR, NAND and XOR functions
- Implementation and training NN with 3 inputs to learn AND, OR, NAND and XOR functions
- To implement a single layer perceptron learning algorithm.
- To plot various activation functions.
- To implement optimization algorithm
- Implementation of CNN using Keras on MNIST dataset.
- Implementation of CNN using Keras on CIFAR dataset.
- Implementation of LSTM model for Sentiment Analysis
- Implementation LSTM to Predict Stock Prices
- Design and Implementation of Autoencoder for Image Reconstruction
- Model Improvement using Regularization
- Model Improvement using Data Augmentation and Early Stopping
- Implementation of Overcomplete Autoencoder
- Image Captioning

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. **Termwork Assessment:** Term Work shall consist of at least 8 to 10 experiments based on the above list. Also Term work Journal must include at least 2 assignments. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance). The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.
2. **Oral/Viva Assessment:** An oral exam will be held based on the above syllabus.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 403	Data Science	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 403	Data Science	40	40	40	60	25	--	25	150	

Course Objectives:

- 1: Understand fundamental data science concepts, benefits, and applications.
- 2: Acquire skills in data collection, cleaning, preparation, and analysis.
- 3: Master predictive modeling with probability, statistics, and machine learning.
- 4: Gain proficiency in feature engineering, model optimization, and text analytics.
- 5: Create and interpret data visualizations using R, Python, and Tableau.
- 6: Apply ethical principles to real-world data science case studies.

Course Outcomes:

After successful completion of the course students will be able to:

CO1: Demonstrate knowledge of data science concepts, methodologies, and the data scientist's role.

CO2: Manage and prepare high-quality, valid data for analysis.

CO3: Implement and evaluate predictive models with statistical and machine learning techniques.

CO4: Perform feature engineering, optimize models, and conduct text analytics.

CO5: Create data visualizations and dashboards using various tools and techniques.

CO6: Apply ethical considerations and frameworks in diverse data science projects.

Prerequisite: DBMS, Python Language

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction to data science	Definition, working, defining goal, benefits and uses of Data Science, Data science vs BI, The data science process, Role of a Data Scientist.	04
2.	Data management and Predictive modeling	Data management - Create the data set, Data collection methods, Data preparation - importance of data ‘cleaning’, validity and quality. Data analysis Predictive Modeling - Probability and Statistics Basics, Common machine learning models(Machine Learning Algorithms: Linear Regression, Logistic Regression, Multinomial Logistic Regression, Decision Trees, Naive Bays, SVM, Clustering)	09
3.	Feature Extraction and Text Analytics	Feature engineering, Model selection, Performance metrics and hyperparameter optimization, Confusion Matrix, Model Deployment. Introduction to text Analytics, Need of Text Analytics, Understanding Text, Cleaning Text Data Sets	07
4.	Data visualization and Tools	Introduction to Data Visualization, Visualization Tools(Area Plots,Histograms,Bar Charts, Pie Charts, Box Plots, Scatter Plots,Waffle Charts, Word Clouds), Visualizing Geospatial Data, visualizing time series data, Importance of data visualization Dashboards. Data Visualization using R, Python and Tableau.	08
5.	Ethics of data science	Responsibilities of actuaries around data science and AI, Data Science Ethics, Doing good data science, Owners of the data, Valuing different aspects of privacy, Getting informed consent, The Five Cs, Developing ethical and professional safeguards	06
6.	Data Science Applications	1. Case Study on Healthcare/Banking/Finance 2. Case Study on Advertisement,/sports/Tourism	05

Text Books:

4. Practical Tableau by Ryan Sleeper, O'Reilly Media, Inc., April 2018

DETAILED LAB SYLLABUS:

Suggested List of Experiments:

- Python based data preprocessing (02 - 03 experiments)
- ML algorithm based experiments (02 - 03 experiments)
- SQL based programming (02 - 03 experiments)
- Data visualization based experiments (02 - 03 experiments)
- Implementation of case study [Presentation by individual student]

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 4 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. **Termwork Assessment:** Term Work shall consist of at least 8 to 10 experiments based on the above list. Individual student should identify specific application of Data science and implement it and presentation of the same. Also Term work Journal must include at least 2 assignments. Term Work Marks: 25 Marks (Total marks) = 15 Marks (Experiment) + 5 Marks (Assignments) + 5 Marks (Attendance). The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.
2. **Oral/Viva Assessment:** An oral exam will be held based on the above syllabus.

Lab Assessment:

1. Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.

2. Oral/Viva Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus.

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 404	High Performance Computing	03	02	-	03	01	-	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 404	High Performance Computing	40	40	40	60	25	-	25	150	

Course Objectives:

1. To learn fundamental concepts of parallel processing
2. To learn utilization of high performance computing resources using programming Frameworks.

Course Outcomes: Upon successful completion students will be able to

1. Memorize and Understand classes of parallel computer architectures
2. Understand standardized, multi-platform communication methods for parallel programming
3. Understand usage of graphical processing unit hardware as high performance computing
4. Understand parallel computing implementation for a computationally intensive problem
5. Understand practical limitations of technology for high performance computing
6. Understand Power aware techniques

Prerequisite: Computer organization and Architectures, Parallel computing

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Parallel Processing Concepts	Levels of parallelism (instruction, transaction, task, thread, memory, function), Models (SIMD, MIMD, SIMT, SPMD, Dataflow Models, Demand-driven Computation etc), Architectures: N-wide superscalar architectures, multi-core, multi-threaded	06

2.	Parallel Programming with CUDA	Processor Architecture, Interconnect, Communication, Memory Organization, and Programming Models in high performance computing architectures: (Examples: IBM CELL BE, Nvidia Tesla GPU, Intel Larrabee Microarchitecture and Intel Nehalem microarchitecture), Memory hierarchy and transaction specific memory design, Thread Organization	10
3.	Fundamental Design Issues in Parallel Computing	Synchronization, Scheduling, Job Allocation, Job Partitioning, Dependency Analysis, Mapping Parallel Algorithms on Parallel Architectures, Performance Analysis of Parallel Algorithms	06
4.	Fundamental Limitations Facing Parallel Computing	Bandwidth Limitations, Latency Limitations, Latency Hiding/Tolerating Techniques and their limitations	05
5.	Power-Aware Computing and Communication	Power-aware Processing Techniques, Power-aware Memory Design, Power-aware Interconnect Design, Software Power Management	06
6.	Advanced Topics	Petascale Computing, Optics in Parallel Computing, Quantum Computers, Recent developments in Nanotechnology and its impact on HPC	06

DETAILED LAB SYLLABUS:

Software Requirements:

Windows/Linux, Python, Matlab, Tensorflow

High performance Systems

Sr. No.	Detailed Lab/Tutorial Description
1	Study and Write case study on your College network
2	Write program for matrix multiplication using MPI Write program for matrix addition using OpenMP
3	Write program for matrix addition using CUDA
4	Write program for parallel quicksort algorithm
5	Write a program to Send message to parallel computers connected through network and find latency

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:**1. Term work Assessment:**

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.

2. Oral/Viva Assessment:

Oral exam will be based on the entire syllabus.

Text Books:

1. “Highly Parallel Computing”, by George S. Almasi and Alan Gottlieb
2. “Advanced Computer Architecture: Parallelism, Scalability, Programmability”, by Kai Hwang, McGraw Hill 1993
3. “Parallel Computer Architecture: A hardware/Software Approach”, by David Culler Jaswinder Pal Singh, Morgan Kaufmann, 1999.
4. “Scalable Parallel Computing”, by Kai Hwang, McGraw Hill 1998.
5. “Introduction to Parallel Computing”, Ananth Grama, Anshul Gupta, George Karypis, and Vipin Kumar, 2nd edition, Addison-Welsey, © 2003.
6. “Petascale Computing: Algorithms and Applications”, David A. Bader (Ed.), Chapman & Hall/CRC Computational Science Series, © 2007.

EC 405	Analog and Mixed Signal VLSI Design	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 405	Analog and Mixed Signal VLSI Design	40	40	40	60	25	--	25	150	

Course Objectives:

1. To teach analysis and design of building blocks of CMOS Analog VLSI Circuits.
2. To highlight the issues associated with the CMOS analog VLSI circuit design.
3. To emphasize upon the issues related to MOS Amplifier.
4. To emphasize upon the issues related to oscillators and PLL.
5. To emphasize upon the issues related to mixed signal layout design.
6. To highlight the issues associated with data Converter

Course Outcomes: Upon successful completion of the course students will be able to

1. Discuss tradeoffs involved in analog VLSI Circuits.
2. Analyze amplifier fundamentals.
3. Discuss various MOS operational amplifier.
4. Analyze building blocks of CMOS analog VLSI circuits.
5. Design building blocks of CMOS analog VLSI circuits
6. Carry out verifications of issues involved in analog and mixed signal circuits.

Prerequisite: Electronic Devices and Circuits I, Digital Circuit Design, Electronic Devices and Circuits II, Design With Linear Integrated Circuits, VLSI Design, VLSI Design

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Analog building blocks	Need for CMOS analog and mixed signal designs, MOS Transistor as sampling switch, active resistances, current source and sinks, current mirror. Voltage References: Band Gap References, General Considerations, Supply-independent biasing, Temperature independent references, PTAT, current generation and Constant Gm biasing.	08
2.	Amplifier Fundamentals	Single Stage Amplifiers: Basic concepts, Gain Bandwidth (GBW), Common-source stage (with resistive load, diode connected load, current-source load, triode load, source degeneration), source follower, common-gate stage, cascode stage, folded cascode stage. Differential Amplifiers: Single ended and differential operation, Basic differential pair, large signal and small signal behaviours, Common-mode response, Differential pair with MOS loads. Noise: Statistical Characteristics of Noise, Types of Noise, Representation of Noise in circuits, Noise in Single stage amplifiers (CS, CD, CG stages), noise in differential pairs, noise bandwidth, noise figure, noise temperature.	07
3.	MOS Operational Amplifiers	Stability and Frequency Compensation: General Considerations, Multipole systems, Phase margin, Frequency compensation, compensation of two stage op-amps. Op-amp Design: General Considerations, performance parameters, One- stage op- amps, Two-stage op-amps, Gain Boosting, Common-mode feedback, Input range limitations(ICMR), Slew Rate, Power supply rejection, Noise in op-amps. Design of single ended and double ended two stage Op-amps.	07
4.	Mixed Signal Circuits	Basic Concepts: AMS design flow, ASIC, Full custom design, Semi- custom design, System on Chip, System in package, Hardware software co-design, and mixed signal layout issues. Oscillators: General considerations, Ring oscillators, LC oscillators, VCO. Phase-Locked Loop: Simple PLL, Charge pump PLL, Non-ideal effects in PLL, Delay locked loops and applications of PLL in integrated circuits.	06
5.	Data Converter Fundamentals	Switch Capacitor Circuits: MOSFETs as switches, Speed considerations, Precision Considerations, Charge injection cancellation, Unity gain buffer, Non- inverting amplifier and integrator. Basic CMOS comparator Design, Adaptive biasing, Analog multipliers.	06

6.	Data Converter Fundamentals and Architectures	<p>Fundamentals: Analog versus discrete time signals, converting analog signals to data signals, sample and hold characteristics. DAC specifications, ADC specifications.</p> <p>DAC architectures: Digital input code, resistors string, R-2R ladder networks, current steering, charge scaling DACs, Cyclic DAC, pipeline DAC</p> <p>ADC architectures: Flash, Two Step Flash, Pipeline ADC, Integrating ADCs, Successive approximation ADCs.</p>	05
----	--	---	----

DETAILED LAB SYLLABUS:

Software Requirements: LT Spice

Sr. No.	Detailed Lab/Tutorial Description
1	Design and Simulate NMOS Inverter with Resistive load. Plot Drain current and Trans conductance.
2	Design and simulate NMOS current Mirror and plot Iref.
3	Design and simulate CS amplifier. With and without source degeneration .
4	Design and simulate Cascode Current Mirror Circuit.
5	Design and simulate basic Differential Amplifier Circuit.
6	Design and simulate one stage Op-Amp circuit.
7	Design and simulate Sample and Hold circuit.
8	To design of simulate 3 stage ring oscillator.
9	Case study of IEEE papers.
10	Case study of IEEE papers.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 406	Speech Processing	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 406	Speech Processing	40	40	40	60	25	--	25	150	

Course Objectives:

1. To understand basic concepts and methodologies for the analysis and modeling of speech signal.
2. To characterize the speech signal as generated by a speech production model.
3. To understand the mechanism of speech and audio perception.
4. To understand the digital representation of the speech waveform.
5. To perform the analysis of speech signal using STFT.
6. To extract the information of the speech or audio signals.
7. To provide a foundation for developing application in this field.

Course Outcomes:

1. Demonstrate advanced Knowledge in Digital model representation of speech signal.
2. Design and implement algorithms for processing speech and audio signals considering the properties of acoustic signals and human hearing.
3. Analyze speech signal to extract the characteristic of vocal tract (formants) and vocal cords (pitch).
4. Formulate and design a system for speech recognition and speaker recognition.
5. Acquired knowledge about audio and speech signal estimation and detection.

Prerequisite: Signal System

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
---------	--------	------------------	-------

1.	Introduction	Review of digital signal and systems, Transforms representations of signal and systems, Sampling Theorem, Goertzel algorithm, Chirp algorithm.	04
2.	Digital Models for Speech signals	Speech production and acoustic tube modeling, acoustic phonetics, anatomy, and physiology of the vocal tract and ear, hearing and perception.	05
3.	Digital Representations of the Speech Waveform	Sampling speech signals, Instantaneous quantization, Adaptive quantization, Differential quantization, Delta Modulation, Differential PCM, Comparison of systems, Direct digital code conversion.	06
4.	Time Domain Models for Speech Processing	Time dependent processing of speech, Short time energy and average magnitude, Short time average zero crossing rate, Speech V/S silence discrimination using energy & Zero crossings, Pitch period estimation, Short time autocorrelation function, Short time average magnitude difference function, Pitch period estimation using autocorrelation function, Median smoothing.	10
5.	Short time Fourier Transform	Introduction- Definition and Properties, Fourier Transform Interpretation ,Linear Filtering Interpretation ,Sampling rates of $X_n(e^{j\omega})$ in Time and Frequency ,Filter Bank Summation Method of Short -Time Synthesis ,Overlap Addition Method for Short -Time Synthesis.	08
6.	Speech and Audio Processing	Vocoder- Voice excited channel vocoder, Voice excited and error signal excited LPC vocoders. Adaptive predictive coding of speech, Auditory Modeling. Audio signal processing for Music applications. Speech recognition pattern comparison techniques, Artificial Neural Network.	06

DETAILED LAB SYLLABUS:

Sr. No.	Detailed Lab/Tutorial Description
1	Manual Speech Signal-to-Symbol Transformation
2	Sampling Frequency and Bit Resolution for Speech Signal Processing
3	To study the time-varying nature of the speech signal in the time domain as well as frequency domain.
4	To study the effects of sampling (aliasing) and quantization on speech signals by playing them at different sampling rates and bits per sample
5	Short Term Time Domain Processing of Speech
6	To estimate pitch of speech using short term autocorrelation.
7	To compute the excitation parameters like pitch by LP analysis.
8	To compute LP coefficients and LP residual of a given speech signal.

9	To study the characteristics of speech using linear prediction (LP) analysis.
10	To study the effect of order of LP analysis (normalized error), autocorrelation of signal and LP residual for voiced and unvoiced segments.
11	To study the glottal pulse characteristics.
12	Case study- 1.To study different sound units present in majority of Indian languages. 2.To understand significance of telephone bandwidth 3.Estimation of Pitch From Speech Signals

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.

2. Oral/Viva Assessment:

Practical and Oral exam will be based on the entire syllabus.

Text Books:

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 407	Cryptography and System Security	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		Test1	Test 2	Avg. of 2 Tests					
EC 407	Cryptography and System Security	40	40	40	60	25	--	25	150

Course Objectives:

1. To introduce the concepts of modular arithmetic and number theory and their application in Classical Encryption techniques.
2. To explore the working principles and utilities of various cryptographic algorithms including Secret Key Cryptography and Public Key Cryptography.
3. To explore various hashing and Message Digest Algorithms to achieve Confidentiality and Integrity.
4. To explore the design issues and working principles of various authentication protocols, PKI standards and different digital signature algorithms to achieve authentication.
5. To explore various secure communication standards including Kerberos, IPsec, and SSL/TLS and email.
6. To develop the ability to use existing cryptographic utilities to build programs for secure communication.

Course Outcomes: Upon successful completion of the course students will be able to

1. Understand system security goals and concepts, classical encryption techniques and acquire fundamental knowledge on the concepts of modular arithmetic and number theory.
2. Understand, compare and apply different encryption and decryption techniques to solve problems related to confidentiality and authentication
3. Apply the knowledge of cryptographic checksums and evaluate the performance of different message digest algorithms for verifying the integrity of varying message sizes.
4. Apply different digital signature algorithms to achieve authentication and design secure applications
5. Understand network security basics, analyze different attacks on networks and evaluate the performance of firewalls and security protocols like SSL, IPsec, and PGP.
6. Analyze and apply system security concepts to recognize malicious code.

Prerequisite: Computer Networks, ISO OSI Layered Protocols, TCP/IP protocol suite.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction and Number Theory	<p>Security Goals, Services, Security Mechanisms and attacks, The OSI security architecture, Network Security Model, Classical Encryption Techniques, Symmetric cipher model, mono-alphabetic and poly-alphabetic substitution techniques: Vigenere cipher, playfair cipher, Hill cipher, transposition techniques: keyed and keyless transposition ciphers, steganography.</p> <p>Modular Arithmetic and Number Theory:- Euclid's algorithm, Prime numbers, Fermat's & Euler's theorem - Testing for primality, The Chinese remainder theorem and its application, Discrete logarithms.</p>	09
2.	Symmetric and Asymmetric key Cryptography and key Management	<p>Block cipher principles, block cipher modes of operation, DES, Double DES, Triple DES, Advanced Encryption Standard (AES), Stream Ciphers: RC5 algorithm</p> <p>Public key cryptography: Principles of public key cryptosystems-The RSA algorithm, The knapsack algorithm, ElGamal Algorithm.</p> <p>Key management techniques: using symmetric and asymmetric algorithms and trusted third party. Diffie Hellman Key exchange algorithm.</p>	08
3.	Hashes, Message Digests and Digital Certificates	<p>Cryptographic hash functions, Hash function requirements, Hash function uses, MD5, SHA-1, MAC, HMAC, CMAC</p> <p>Digital Certificate: X.509 format, Digital Certificate types and applications, PKI</p>	04
4.	Authentication Protocols & Digital signature schemes	<p>Authentication Requirement and Functions, Types of Authentication, User Authentication and Entity Authentication, One-way and mutual authentication schemes, Needham Schroeder Authentication protocol, Kerberos Authentication protocol.</p> <p>Importance of Digital Signature, Digital Signature Schemes – RSA, ElGamal signature schemes</p>	05
5.	Network Security and Applications	<p>Network Security Basics, TCP/IP Vulnerabilities (Layer-wise): Application layer: HTTP, DHCP Transport layer: TCP syn flood, Port Scanning, Network layer: IP Spoofing, Packet sniffing, Data link layer: ARP Spoofing, ARP cache poisoning</p> <p>DOS: Classic DOS attacks: Ping flood, ICMP flood, UDP flood, Distributed DOS, Defenses against DOS attacks</p> <p>Internet Security Protocols: SSL, IPSEC, Secure Email: PGP, Firewall, Honey Pots, IDS</p>	09
6.	System Security	<p>Software Vulnerabilities: Buffer Overflow, Format string, cross-site scripting, SQL injection</p> <p>Malwares: Viruses, Worms, Trojans, Logic Bomb, Bots, Rootkits, Spywares, Backdoors, Ransomware, Keyloggers</p>	04

DETAILED LAB SYLLABUS:

Hardware Requirements: PC With following Configuration

1. Intel Core i3/i5/i7 Processor
2. 4 GB RAM
3. 500 GB Hard Disk

Software Requirements:

1. Windows / Linux Desktop OS / Kali Linux
2. Wireshark
3. ARPWATCH
4. Cppcheck
5. Hping, hping3

Sr. No.	Detailed Lab/Tutorial Description
1	Design and Implementation of a product cipher using Substitution and Transposition ciphers
2	Implementation and analysis of RSA cryptosystem and Digital signature scheme using RSA. Implementation of Diffie Hellman Key exchange algorithm. For varying message sizes, test integrity of message using MD-5, SHA-1, and analyse the performance of the two protocols.
3	Study the use of network reconnaissance tools like WHOIS, dig, traceroute, nslookup to gather information about networks and domain registrars.
4	Study of packet sniffer tools :Wireshark, : 1. Download and install Wireshark and capture ICMP, TCP, and HTTP packets in promiscuous mode. 2. Explore how the packets can be traced based on different filters. 3. Download and install Nmap. Use it with different options to scan open ports, perform OS fingerprinting, do a ping scan, TCP port scan, UDP port scan, XMAS scan etc. 4. Detect ARP spoofing using Nmap and/or open source tool ARPWATCH and Wireshark.
5	Setting up personal Firewall using iptables. Explore the GPG tool of Linux to implement email security. Set up Snort and study the logs.
6	Simulate buffer overflow attack using Ollydbg, Splint, Cppcheck etc. Simulate DOS attack using Hping, hping3.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work.

2. Oral/Viva Assessment:

Practical and Oral exam will be based on the entire syllabus.

Text Books:

1. William Stallings, Cryptography and Network Security, Principles and Practice, 6th Edition, Pearson Education, March 2013
2. Behrouz A. Ferouzan, —Cryptography & Network Security, Tata Mc Graw Hill
3. Bernard Menezes, —Cryptography & Network Security, Cengage Learning.
4. Network Security Bible, Eric Cole, Second Edition, Wiley.

References:

1. Applied Cryptography, Protocols Algorithms and Source Code in C, Bruce Schneier, Wiley.
2. Cryptography and Network Security, Atul Kahate, Tata Mc Graw Hill

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 408	Cloud and Distributed Computing	03	02	--	03	01	-	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 408	Cloud and Distributed Computing	40	40	40	60	25	--	25	150	

Course Objectives:

1. To introduce basic concepts, goals, issues of distributed systems.
2. To understand the concept of Inter process communications, Message oriented communication, stream oriented communications.
3. To provide master skills to measure the performance of distributed synchronization algorithms.
4. Basics of cloud computing.
5. Key concepts of virtualization.
6. Key components of Amazon Web Services.

Course Outcomes:

1. Understand the basic elements and concepts related to distributed systems and illustrate the middleware technologies that supports distributed applications such as RPC, RMI and object based middleware.
2. Analyze various techniques used for clock synchronization, election of coordinators and distributed mutual exclusion.
3. Demonstrate the concepts of resource and process management.
4. Define Cloud Computing and memorize the different Cloud service and deployment models
5. Describe the importance of virtualization along with their technologies..
6. Describe the key components of Amazon web Service

Prerequisite: Operating system

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction to Distributed Systems and Communication	Characterization of Distributed Systems: Issues, Goals, and Types of distributed systems, Distributed System Models Introduction to message passing, Remote communication: Remote Procedure Call (RPC), Remote Object Invocation, Remote Method Invocation (RMI)	08
2.	Synchronization	Clock Synchronization, Physical clock synchronization algorithm, Logical (lambport) Clock, Election Algorithms,	07
3.	Process Management	Introduction to Process management, process migration, threads, code migration.	06
4.	Introduction of Cloud Computing	Introduction to cloud computing: Definition, Goals, Characteristics, Applications. Cloud types: Cloud Deployment Models and Service Models (NIST, Cloud cube model), Cloud computing architecture, Advantages and Disadvantages of cloud Computing.	05
5.	Virtualization	Virtualization: Characteristics of virtualized environment, Understanding the importance of Hypervisors, Virtualization of CPU, Memory and I/O Devices, Technology Examples: KVM, Xen,	06
6.	Exploring the Components of Amazon Web Services	Introduction to AWS cloud computing Platform, Various services available on AWS Cloud Platform like EC2, EBS, VPC, ELB, S3.	07

DETAILED LAB SYLLABUS:

Sr. No.	Detailed Lab/Tutorial Description
1	1. Understanding of basic and advanced linux commands. 2. Linux Shell Scripting.
2	1. Creating and AWS Account. 2. Launching of EC2 instance and accessing through Mobaxtrem
3	1. Understanding of Amazon Machine Image and its sharing 2. EBS: Creating Snapshot & Sharing across region and account.
4	1. Design of VPC & NAT Gateway 2. Management of VPC Peering and NACL
5	1. Application of Auto Scaling Service of AWS for Managing load with different scaling policies. 2. Elastic Load Balancer with Auto Scaling
6	1. Application of Simple storage service in DNS. 2. IAM Services of AWS.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to the number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Equal weightage should be given to laboratory experiments and while assigning term work marks.

2. Oral/Viva Assessment:

Practical and Oral exam will be based on the entire syllabus.

Text Books:

		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 409	Embedded System Design and basics of IOT	40	40	40	60	25	--	25	150	

Course Objectives:

1. To develop background knowledge Embedded Systems.
2. To understand communication techniques.
3. To write programs for embedded systems and real time operating systems
4. To understand fundamentals of IoT / M2M
5. To learn real world application scenarios of IoT along with its social and economic impact using case studies

Course Outcomes:

1. Identify and describe various characteristic features and applications of embedded systems. Analyse and identify hardware for embedded systems implementation
2. Understand the detailed processor design techniques and methods of communication protocols.
3. Detail understanding of low power embedded processor
4. Study the in-depth program modelling concepts as well as study the concepts of Real time operating systems and write programs.
5. Understand IoT and its related issues
6. Design embedded system applications using RTOS . Study basic applications of IoT development.

.Prerequisite: Basics of microprocessor and micro controller.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction	Definition of Embedded System, Embedded Systems Vs General Computing Systems, Classification, Major Application Areas Characteristics and quality attributes (Design Metric) of embedded systems. Real time system's requirements, real time issues, interrupt latency. Embedded Product development life cycle and hardware software Codesign process	04
2.	Embedded Hardware	Embedded cores, Types of memories, Sensors (Optical encoders, Resistive) and Actuators (Solenoid valves, Relay/switch, Opto-couplers), Power supply considerations in Embedded systems: Low power features Idle & Power down mode, Sleep mode, Brown-out detection. Communication Interfaces: Comparative study of serial communication interfaces (RS-232, RS-485), I2C, CAN, USB (v2.0), Bluetooth, Zig-Bee. Selection criteria of above interfaces.	08
3.	ARM CORTEX-M3 Architecture	Comparison of CISC & RISC architectures, overview of ARM family. ARM Cortex-M3 architecture, Programmer's model: Operation Modes and States, registers, special registers, Application Program Status Register Integer status flags, Q status flag, GE bits. Memory system: Features and memory map Exceptions and Interrupts-Nested vectored interrupt controller.	08
4.	Embedded C-programming concepts	Program Modelling concepts: DFG, FSM, UML Embedded C-programming concepts (from Embedded system point of view): Data types, Modifiers, Qualifiers, Functions, Macros, Interrupt service routine, Device drivers. Real-time Operating system: Need of RTOS in Embedded system software and comparison with GPOS, Foreground/Background processes, Interrupt latency, Task, Task states, Multi-tasking, Context switching, Task scheduling, Scheduling algorithms-Rate Monotonic Scheduling, Earliest Deadline First (with numericals), Inter-process communication: Semaphore, Mailbox, Message queues, Event timers, Task synchronisation-Shared data, Priority inversion, Deadlock. Memory Management. Introduction to μ COS II RTOS	08
5.	IoT Introduction and Architecture	History of IoT, M2M – Machine to Machine, Web of Things, IoT protocols Applications: Remote Monitoring & Sensing, Remote Controlling, Performance Analysis The Architecture The Layering concepts, IoT Communication Pattern, IoT protocol Architecture, Application Protocols MQTT, REST/HTTP, CoAP and 6LoWPAN in IoT.	06
6.	Case Study & advanced IoT Applications	Hard Real-time: Car Cruise-Control using μ COS II RTOS- Requirements study, specification study using	05

DETAILED LAB SYLLABUS:

Software Requirements:

Keil 5, Raspbian

Hardware Requirements:

ARM 7 kit, RPi, peripherals

Sr. No.	List of Experiments
1	Two or three programs for GPIO programming with ARM 7
2	Two Interfacing of communication protocols(I2C,CAN,SPI,zigbee etc) with ARM 7
3	Simulation of multitasking with ARM 7 using RTOS
4	Inter process communication using semaphore with ARM 7 in RTOS
5	Minimum two Experiments using any hardware platform (Arduino/Raspberry i/BeagleBone/Galileo) for data handling and storage.
6	Minimum three experiments using any hardware platform (Arduino/Raspberry Pi/BeagleBone/Galileo) for interfacing various sensors and communicating data using Internet using various Protocols.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Equal weightage should be given to laboratory experiments and while assigning term work marks.

2. Oral/Viva Assessment:

Practical and Oral exam will be based on the entire syllabus.

		Test1	Test 2	Avg. of 2 Tests					
EC 410	Robotics & Industrial Applications	40	40	40	60	25	--	25	150

Course Objectives:

1. To study different types of Robots and understand the fundamentals of robotics.
2. To study the concepts of Direct Kinematics & Inverse Kinematics.
3. To analyze the Velocity Kinematics and Dynamics.
4. To familiarize students with Trajectory planning of robots.
5. To familiarize students with robot vision.
6. To familiarize students with task planning of robots.

Course Outcomes: Upon successful completion students will be able to

1. Understand the basic concepts of robotics.
2. Perform the kinematic analysis of robots.
3. Ability to analyze the Velocity Kinematics and Dynamics.
4. Perform trajectory planning of robots
5. Describe importance of visionary system in robotic manipulation
6. Perform task planning of robots

Prerequisite: Applied Mathematics, Linear Control Systems.

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1	Fundamentals of Robotics	Robot Classification, Robot Components, Robot Specification, Joints, Coordinates, Coordinate frames, Workspace, Languages, Applications.	06

2	Kinematics of Robots	Homogeneous transformation matrices, Inverse transformation matrices, Forward and inverse kinematic equations – position and orientation Denavit-Hartenberg representation of forward kinematics, Forward and inverse kinematic solutions of three and four axis robot	08
3	Velocity Kinematics & Dynamics	Differential motions and velocities: Differential relationship, Jacobian, Differential motion of a frame and robot, Inverse Jacobian, Singularities. Dynamic Analysis of Forces : Lagrangian mechanics, Newton Euler formulation, Dynamic equations of two axis robot	08
4	Trajectory planning	Basics of Trajectory planning , Joint-space trajectory planning, Cartesian-space trajectories	06
5	Robot Vision	Image representation, Template matching, Polyhedral objects, Shape analysis, Segmentation, Iterative processing, Perspective transform, Camera Calibration	06
6	Task Planning	Task level programming, Uncertainty, Configuration Space, Gross motion Planning; Grasp planning, Fine-motion Planning, Simulation of Planer motion, Source and goal scenes, Task planner simulation.	06

DETAILED LAB SYLLABUS:

Software Requirements: Matlab / Scilab

Sr. No.	List of Experiments
1	Forward kinematics
2	Inverse kinematic
3	Dynamic analysis
4	Space trajectory
5	Cartesian-space trajectory
6	Template matching
7	Iterative Processing
8	Segmentation

Theory Assessments:

EC 411	Cyber Security and Digital Forensics	40	40	40	60	25	--	25	150	

Course Objectives:

- 1.To understand and identify different types of cybercrime and cyber law.
- 2.To recognize Indian IT Act 2008 and its latest amendments.
- 3.To learn various types of security standards compliances
4. To discuss the need and process of digital forensics and Incident Response Methodology.
5. To explore the procedures for identification, preservation, and acquisition of digital evidence.
6. To explore techniques and tools used in digital forensics for Operating system and malware investigation

Course Outcomes: Upon successful completion of the course students will be able to

- 1.Able to understand the concept of cybercrime and its effect on outside world
- 2.Able to Interpret and apply IT law in various legal issues.
- 3.Able to distinguish different aspects of cyber law.
4. Able to understand the need and process of digital forensics and Incident Response Methodology.
5. Able to understand the procedures for identification, preservation, and acquisition of digital evidence.
6. Able to understand the techniques and tools used in digital forensics for Operating system and malware investigation

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1.	Introduction to Cybercrime	Cybercrime definition and origins of the world, Cybercrime and information security, Classifications of cybercrime, Cybercrime and the Indian ITA 2000, A global Perspective on cybercrimes	04
2.	Cyber offenses & Cybercrime	How criminal plan the attacks, Social Engineering, Cyber stalking, Cyber café and Cybercrimes, Botnets, Attack vector, Cloud computing, Proliferation of Mobile and Wireless Devices, Trends in Mobility, Credit Card Frauds in Mobile and Wireless Computing Era, Security Challenges Posed by Mobile Devices, Registry Settings for Mobile Devices, Authentication Service Security, Attacks on Mobile/Cell Phones, Mobile Devices: Security Implications for Organizations, Organizational Measures for Handling Mobile, Devices-Related Security Issues, Organizational Security Policies and Measures in Mobile Computing Era, Laptops	09
3.	Tools and Methods Used in Cyberline	Phishing, Password Cracking, Keyloggers and Spywares, Virus and Worms, Steganography, DoS and DDoS Attacks, SQL Injection, Buffer Over Flow, Attacks on Wireless Networks, Phishing, Identity Theft (ID Theft)	06
4.	Introduction to Digital Forensics	Digital Forensics Definition, Digital Forensics Goals, Digital Forensics Categories - Computer Forensics, Mobile Forensics, Network Forensics, Database Forensics Introduction to Incident - Computer Security Incident, Goals of Incident Response, CSIRT, Incident Response Methodology, Phase after detection of an incident	08
5.	Digital Evidence, Forensics Duplication and Digital Evidence Acquisition	Digital evidence, Types of Digital Evidence, Challenges in acquiring Digital evidence, Admissibility of evidence, Challenges in evidence handling, Chain of Custody, Necessity of forensic duplication, Forensic image formats, Forensic duplication techniques, Acquiring Digital Evidence - Forensic Image File Format, Acquiring Volatile Memory (Live Acquisition), Acquiring Nonvolatile Memory (Static Acquisition)	06
6.	Forensics Investigation	Analyzing Hard Drive Forensic Images, Analyzing RAM Forensic Image, Investigating Routers Malware Analysis - Malware, Viruses, Worms, Essential skills and tools for Malware Analysis, List of Malware Analysis Tools and Techniques, Investigating logs from Unix and windows systems, Investigating Windows Registry.	06

DETAILED LAB SYLLABUS:**Hardware Requirements:**

Standalone desktops

Software Requirements:

C++

Java or equivalent compiler

Sr. No.	Detailed Lab/Tutorial Description
1	To study the steps to protect your personal computer system by creating User Accounts with Passwords and types of User Accounts for safety and security.
2	Study the steps to protect a Microsoft Word Document of different version with different operating system.
3	Study various methods of protecting and securing databases.
4	Study “How to make strong passwords” and “passwords cracking techniques” using ERD Commander, Cain & able.
5	Web browser Security- Browser Security IE(Mozilla Firefox, Google Chrome) Add-ons.(Firebug, WOT)
6	Cryptography using PGP and Truecrypt
7	Steganography using S-Tools and Snow
8	Email Security (Header Analysis. Email Tracker pro., Read notify)
9	Mobile Security Apps- Smart phone encryption.
10	Ethical Hacking Information Gathering Tool – Samspace (Nslookup , Whois, Tracert,) Scanning Tool(Angry IP Scanner, Nmap)
11	Protection of Information Assets using Recuva.
12	Analysis of forensic images using open source tools. ● FTK Imager ● Autopsy
13	Explore forensics tools in kali linux for acquiring, analyzing and duplicating data. ● dd ● dcfldd
14	Data Carving using open source tools ● Foremost ● Scalpel ● Jpegcarver
15	Performing penetration testing using Metasploit - kali Linux.

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.

- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1. Term work Assessment:

At least 6 experiments covering the entire syllabus of DCSD should be set to have well predefined inference and conclusion. The experiments should be student centric and attempt should be made to make experiments more meaningful, interesting. Simulation experiments are also encouraged. Experiments must be graded from time to time. The grading and term work assessment should be done based on this scheme. The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus. Equal weightage should be given to laboratory experiments and while assigning term work marks.

2. Oral/Viva Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Practical and Oral exam will be based on the entire syllabus.

Course Code	Course Name	Theory (Hrs)	Practical (Hrs)	Tutorial (Hrs)	Theory (Credits)	Practical /Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 412	Blockchain Technology	03	02	--	03	-	--	03

Course Code	Course Name	Examination Scheme								
		Theory Marks				End Sem. Exam	Term Work	Practical	Oral	Total
		Internal assessment								
		Test 1	Test 2	Avg. of 2 Tests						
EC 412	Blockchain Technology	40	40	40	60	-	--	-	100	

Course Objectives:

1. To understand basics of Blockchain technology
2. To understand concept of cryptocurrency and Bitcoin
3. To understand concepts of Ethereum Blockchain
4. To learn the concepts of Hyperledger
5. To understand solidity programming language and concepts of smart contracts
6. To learn and develop various applications of Blockchain

Course Outcomes: Upon successful completion of the course students will be able to

1. Have an understanding and working knowledge of the emerging blockchain technology.
2. Discuss concept of cryptocurrency and Bitcoin
3. Apply the knowledge of Ethereum Blockchain
4. Understand and analyze the working of Hyperledger
5. Explore basics of solidity programming language and smart contracts
6. Develop various applications of Blockchain

Prerequisite: Data Structure and Algorithm, Computer Networks

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1	Introduction of Cryptography and Blockchain	What is Blockchain, Blockchain Technology Mechanisms & Networks, Blockchain Origins, Objective of Blockchain, Blockchain Challenges, Transactions And Blocks, P2P Systems, Keys As Identity, Digital Signatures, Hashing, and public key cryptosystems, private vs. public Blockchain	07
2	Bitcoin and Cryptocurrency	What is Bitcoin, Bitcoin Network, Bitcoin Mining Process, Mining Developments, Bitcoin Wallets, Hot and Cold Storage, Decentralization and Hard Forks, Merkle Tree, Double-Spend Problem, Blockchain and Digital Currency, Transactional Blocks, Impact of Blockchain Technology on Cryptocurrency	08
3	Introduction to Ethereum Blockchain	Introduction to Ethereum, Ethereum Structure, Ethereum Operations, Ethereum Virtual Machine (EVM), Incentive Model, Consensus Mechanisms, How Smart Contracts Work, Metamask Setup, Ethereum Accounts, Initial Coin Offering(ICO)	07
4	Introduction to Hyperledger	What is Hyperledger? , Distributed Ledger Technology & its Challenges, Hyperledger: Distributed Ledger Frameworks and Domain Specific Blockchains, Hyperledger Fabric, Hyperledger Fabric Architecture, Hyperledger Composer.	05
5	Solidity Programming Language	Solidity -Language of Smart Contracts, Installing Solidity & Ethereum Wallet, Basics of Solidity, Layout of a Solidity Source File & Structure of Smart Contracts, General Value Types (Int, Real, String, Bytes, Arrays, Mapping, Decision making, Structs ,Ether units, Enum, address, special variables), Solidity Functions , Solidity patterns (pattern withdrawal and restricted access)	08
6	Blockchain Applications	Blockchain Applications: Internet of Things, Medical Record Management System, Do-main Name Service and future of Blockchain	04

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Course Code	Course Name	Theory (Hrs)	Practical (Hrs)	Tutorial (Hrs)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 413	Internet of Everything	03	02	--	03	01	--	04

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam				
		Test 1	Test 2	Avg. of 2 Tests					
EC 413	Internet of Everything	40	40	40	60	25	--	25	150

Course Objectives:

1. Introduce evolution of internet technology and need for IoT.
2. Discuss on IoT reference layers and various protocols and software.
3. To provide in depth knowledge in physical principles applied in sensing, measurement and a comprehensive understanding on how measurement systems are designed, calibrated, characterized, and analyzed.
4. To introduce the students to sources and detectors of various Optical sensing mechanisms and provide in-depth understanding of the principle of the basic laws and phenomena on which operation of sensor transformation of energy is based, measurement and theory of instruments and sensors.
5. Train the students to build IoT systems using sensors, single board computers and open source IoT platforms.
6. Make the students apply IoT data for business solutions in various domains in a secure manner.

Course Outcomes: Upon successful completion of the course students will be able to

1. Identify the IoT networking components with respect to the OSI layer.
2. Build schematic for IoT solutions .
3. Design and develop IoT based sensor systems.
4. Select IoT protocols and software.
5. Evaluate the wireless technologies for IoT.
6. Appreciate the need for IoT Trust and variants of IoT and compete in the design, construction, and execution of systems for measuring physical quantities

Prerequisite:

Electronics Devices and Circuits(EDC), Microprocessor and Microcontroller (MPC)

DETAILED THEORY SYLLABUS:

Sr. No.	Module	Detailed Content	Hours
1	Introduction to Internet of Things	Defining IoT, Characteristics of IoT, Physical design of IoT, Logical design of IoT, Functional blocks of IoT, Communication models & APIs, Trends in the Adoption of IoT, Societal Benefits of IoT, Risks, Privacy, and Security. Exemplary Device Boards, Arduino, Linux on Raspberry, Interface and Programming & IOT Device. Hardware Platforms and Energy Consumption, Operating Systems, Time Synchronization, Positioning and Localization, Medium Access Control, Topology and Coverage Control, Routing: Transport Protocols, Network Security, Middleware, Databases	06
2	Sensing and Actuation	Sensor fundamentals and characteristics, Optical Sources and Detectors, Intensity Polarization and Interferometric Sensors, Strain, Force, Torque and Pressure sensors, Position, Direction, Displacement and Level sensors, Velocity and Acceleration sensors, Flow, Temperature and Acoustic sensors.	07
3	Networking and the Internet of Things	IoT and Machine to Machine Communications, IoT protocols, Network configurations, Network Operator Requirements, SNMP, NETCONF, YANG, Interoperability in IoT. SDN	08
4	Sensor Networks and IoT	Characteristic and challenges, WSN vs Adhoc Networks, Sensor node architecture, Physical layer and transceiver design considerations in WSNs, Energy usage profile,	10

		<p>Choice of modulation scheme, Dynamic modulation scaling, Antenna considerations.</p> <p>Sensor Network Architecture: Data Dissemination, Flooding and Gossiping-Data gathering Sensor Network Scenarios, Optimization Goals and Figures of Merit, Design Principles for WSNs- Gateway Concepts, Need for gateway, WSN and Internet Communication, WSN Tunneling,</p> <p>Amplifiers and Sensor Noise, Importance and Adoption of Smart Sensors, Architecture of Smart Sensors</p>	
5	Cloud Computing	<p>Interfacing and data logging with cloud, Evolution of Cloud Computation, Commercial clouds and their features, open source IoT platforms, cloud dashboards, Fog Computing, Introduction to big data analytics and Hadoop.</p>	08

DETAILED LAB SYLLABUS:

Software Requirements:

Arduino IDE, Noobs, Keil and energia, CCStudio

Hardware Requirements:

Arduino, Raspberry Pi, ARM7 Board, MSP430, Inductive transducer, Hall Effect sensor, Thermocouple, Thermistor, Temperature sensor, LCD Display, Zigbee Chip, Motors, Miscellaneous

Sr. No.	Detailed Lab/Tutorial Description
1	IoT systems Working with Raspberry pi using Python. Arduino platform Working with open source clouds
2	Python Programming for IoT Systems: Basic operations, String manipulation, Dictionary, Signal plotting, processing and graphics on cloud
3	Develop a displacement measurement system with the following sensors: i. Inductive transducer (LVDT) ii. Hall effect sensor
4	After studying the characteristics of temperature sensors listed below, develop a temperature measurement system for a particular application using the suitable sensor. i. Thermocouple principles ii. Thermistor and linearization of NTC Thermistor iii. Resistance Temperature Detector iv. Semiconductor Temperature sensor OA79 v. Current output absolute temperature sensor

	Based on sensing experiments carried out suggest a noncontact method and try to complete its proof of concept.
5	Embedded Programming and IoT: C programming, Declarations and Expressions, Arrays, Pointers, Constructs, Data structures and Linked list, Embedded C (Keil).
6	Working with ARM (Keil and energia) Sub Task 1: Peripheral programming of ARM7 board Sub Task 2: PWM generation Sub Task 3:Configuring CC3200, wifi configuration ,HTTP and MQTT Protocol
7	Working with MSP430 (CCStudio) Sub Task 1: Port programming of MSP430 microcontrollers Sub Task 2: Analog to Digital Conversion using MSP430 microcontroller Sub Task 3: LCD display of characters and numbers. Sub Task 4: Timer
8	Low power wireless transmission using Zigbee Sub Task 1 : Interfacing Zigbee controller with MSP 430 microcontroller using SPI/UART. Sub Task 2: Programming sleep and wake up mode of MSP 430.
9	Speed regulation measurement of DC motor using armature control system
10	Consider a real time data available in college campus and develop a data analytic system to determine the average, trend and prediction
11	Mini Project

Theory Assessments:

1. Internal Assessment: Two Internal assessments will be conducted for 40 marks each with average marks of both assessments as final score.

2. End Sem Theory Examination:

- Question paper will consist of 5 questions, each carrying 20 marks.
- Total 3 questions need to be solved.
- Q.1 will be compulsory, based on the entire syllabus.
- Remaining questions will be randomly selected from all the modules.
- Weightage of marks should be proportional to number of hours assigned to each module.

Lab Assessment:

1.Term work Assessment:

The final certification and acceptance of term work ensures satisfactory performance of laboratory work and minimum passing marks in term work. Equal weightage should be given to laboratory experiments and while assigning term work marks.

2.Oral/Viva Assessment:

Practical and Oral exam will be based on the entire syllabus.

Course Code	Course Name	Credits
IL 470	e-commerce and e-business	3+1

Objectives:

1. To understand the factors needed in order to be a successful in ecommerce
2. Identify advantages and disadvantages of technology choices such as merchant server software and electronic payment options.
3. Analyse features of existing e-commerce businesses, and propose future directions or innovations for specific businesses.

Outcomes: Learner will be able to...

1. Appreciate the global nature and issues of electronic commerce as well as understand the rapid technological changes taking place.
2. Define and differentiate various types of E-commerce
3. Discuss various E-business Strategies.

Module	Detailed Contents	Hrs
1	E-commerce system: Introduction- scope of electronics commerce, definition of e-commerce, difference between e-commerce and e-business, business models of e-commerce transactions. E-commerce infrastructure: client server technology, two tier client server architecture for e-commerce, drawbacks, three tier architecture for e-commerce.	8
2	Business strategies for e-commerce: Introduction- elements of e-commerce strategy, simplicity, mobile responsiveness, choosing e-commerce store platform, user-based focus, compliance and security measures, e-commerce strategy: strategy overview, strategy task, technology issues. Case study: Flipkart v/s Amazon, competitive edge, marketing strategy, sales strategy	8
3	Design of E-commerce systems: e-commerce types- electronic market, electronics data interchange EDI, modeling of e-commerce system, three tier component model of e-commerce system, e-commerce system design- data model, web modeling, database structure design, process model, user friendly design of e-commerce site.	7
4	Technologies for e-commerce systems: Introduction- technologies for e-commerce, PHP and Java script, SEO, Social Plugins, payment processes, SSL Encryption, hosting server, Service oriented architecture.	7
5	Scalability of e-commerce systems: Web scalability- Vertical scalability , horizontal scalability, Load balancing- working of load balancers, global server load balancers, cloud load balancing- goals of cloud balancing, automated cloud balancing. web caching and buffering	6
6	E-commerce system implementation: E-commerce implementation, - website testing, web maintenance, web advertisement, copyright services, SMS alert services, bulk email services, Web personalization- techniques for gathering information, analysis techniques for website personalization, domain name registration and web hosting- different types of web hosting, different components of web hosting, features in web hosting.	6

Assessment Scheme:

Internal Assessment: Two tests of 20 marks

End Semester Examination:

References:

- 1) Electronic Business and Electronic Commerce Management, 2nd edition, Dave Chaffey, Prentice Hall, 2006
- 2) Elias. M. Awad, " Electronic Commerce", Prentice-Hall of India Pvt Ltd.
- 3) E-Commerce Strategies, Technology and applications (David Whitley) Tata McGrawHill
- 4) E-business- theory and practise, Brahm Canzer, cengage learning
- 5) Secure e-commerce systems (Kindle edition), Amazon publishing, P S Lokhande, B B Meshram, first edition

Course Code	Course Name	Credits
IL 472	Biomedical Instrumentation	3

Objectives:

1. To familiarize students with various aspects of measuring electrical parameters from the living body.
2. To introduce students with the characteristics of medical instruments and related errors.
3. To illustrate various types of amplifiers used in biomedical instruments.
4. To familiarize students with biomedical recording devices.
5. To introduce students with patient monitoring systems & their characteristics.

Outcomes: Learner will be able to...

1. Safely and effectively use biomechanics instrumentation and equipment to record and assess human and object motion.
2. Describe and characterize the origin of bio-potentials and inspect common biomedical signals by their characteristics features
3. Understand the basic instrumentation system with their limitations & familiarize with pc based medical instrumentation & control of medical devices.
4. Describe and characterize medical instruments as per their specifications, static & dynamic characteristics and understand data acquisition system
5. Describe, analyze, characterize and design bio-potential amplifiers and design various medical recording systems & their components.
6. Understand and describe patient monitoring systems and its necessity in healthcare system.

Module	Detailed Contents	Hrs
1	Medical Instrumentation: Sources of Biomedical Signals, Basic medical Instrumentation system, Performance requirements of medical Instrumentation system, Microprocessors in medical instruments, PC based medical Instruments, General constraints in design of medical Instrumentation system, Regulation of Medical devices.	6
2	Measurement systems: Specifications of instruments, Static & Dynamic characteristics of medical instruments, Classification of errors, Statistical analysis, Reliability, Accuracy, Fidelity, Speed of response, Linearization of technique, Data Acquisition System.	6
3	Bioelectric signals and Bioelectric amplifiers: Origin of bioelectric signals, Electrodes, Electrode Tissue interface, Galvanic Skin Response, BSR, Motion artifacts, Instrumentation amplifiers, Special features of bioelectric amplifiers, Carrier amplifiers, Chopper amplifiers, Phase sensitive detector. ECG, EEG, EMG, ERG, Lead systems and recording methods.	8
4	Biomedical recording systems: Basic Recording systems, General consideration for signal conditioners, Preamplifiers, Differential Amplifier, Isolation Amplifier, Electrocardiograph, Phonocardiograph, Electroencephalograph, Electromyography, Digital stethoscope Other biomedical recorders, Biofeedback instrumentation, Electrostatic and Electromagnetic coupling to AC signals, Proper grounding, Patient isolation and accident prevention.	7

5	Patient Monitoring Systems: System concepts, Cardiac monitor, selection of system parameters, Bedside monitors, Central monitors, Heart rate meter, Pulse rate meter, Measurement of respiration rate, Holter monitor and Cardiac stress test, Catheterization Laboratory Instrumentation , Organization and equipments used in ICCU and ITU.	6
6	Biological sensors: Sensors / receptors in the human body, basic organization of nervous system-neural mechanism, Chemoreceptor: hot and cold receptors, barro receptors, sensors for smell, sound, vision, Ion exchange membrane electrodes, enzyme electrode, glucose sensors, immunosensors, Basic principles of MOSFET biosensors & BIOMEMS, basic idea about Smart sensors.	6

Assessment Scheme:

Internal Assessment:

End Semester Examination:

Course Code	Course Name	Credits
IL 473	Design for sustainability	3

Objectives:

1. Understand the complex environmental, economic, and social issues related to sustainable engineering
2. Become aware of concepts, analytical methods/models, and resources for evaluating and comparing sustainability implications of engineering activities
3. Critically evaluate existing and new methods
4. Develop sustainable engineering solutions by applying methods and tools to research a specific system design
5. Clearly communicate results related to their research on sustainable engineering

Outcomes: Learner will be able to...

1. Account for different theoretical and applied design principles and models for sustainable design
2. Account for and critically relate to sustainable design from an ethical, cultural and historical perspective
3. Critically review different design solutions ecological, social and economical consequences, risks, possible uses and functions in the work for a sustainable development
4. Independently apply a specific design theory on a specific challenge within the sustainability field.

Module	Detailed Contents	Hrs
1	Introduction - Need, Evolution of sustainability within Design, environmental - economic sustainability concept, Challenges for sustainable development, Environmental agreement & protocols	6
2	Product Life Cycle Design – Life Cycle Assessment, Methods & Strategies, Software Tools	6
3	Sustainable Product - Service System Design, Definition, Types & Examples ,Transition Path and Challenges, Methods and Tools, Design thinking and design process for sustainable development	8
4	Design for Sustainability – Engineering Design Criteria and Guidelines	6
5	Design for Sustainability – Architecture, Agriculture, Cities & Communities, Carbon Footprint	6
6	Green Building Technologies - Necessity, Principles, low energy materials, effective systems	6

Assessment Scheme:

Internal Assessment:

End Semester Examination:

Course Code	Course Name	Credits
IL 474	Political Science	3

Objectives:

1. Provide a good grounding in the basic concepts of Political Theory.
2. Familiarize learners with fundamental rights and duties.
3. Teach students the structure and process of the electoral system, the features and trends of the party system and create an awareness of the social movements in India.
4. To inculcate the values of renowned thinkers on law, freedom of thought and social justice.
5. To prepare the learners for understanding the importance of Comparative Government and Politics.
6. To train learners in understanding International Relations.

Outcomes: Learner will be able to...

1. Acquire conceptual and theoretical knowledge in the basic concepts of political theory.
2. Demonstrate understanding of fundamental rights and duties and directive principles.
3. Perform successfully in expressing the process of the electoral system, the features and trends of the party system and the importance of the social movements in India.
4. Illustrate the contribution of renowned thinkers and relate it to the current scenario.
5. Compare and contrast Indian Government and Politics with European countries.
6. Develop an understanding of International Relations with respect to Indian foreign policy.
- 7.

Module	Detailed Contents	Hrs
1	Understanding Political Theory- Evolution of State, Nation, Sovereignty, Types and Linkages between Power and Authority; Interrelationships between Law, Liberty, Equality, Rights; Justice and Freedom, Democracy vs Authoritarianism	4
2	Constitutional Government in India -Evolution of the Indian Constitution, . Fundamental Rights and Duties. Directive Principles. Union-State Relations, Union Legislature: Rajya Sabha, Lok Sabha: Organisation, Functions – Law making procedure, Parliamentary procedure, 6. Government in states: Governor, Chief Minister and Council of Ministers: position and functions – State Legislature: composition and functions. 7.Judiciary: Supreme Court and the High Courts: composition and functions – Judicial activism. 8.Constitutional amendment. Major recommendations of National Commission to Review the Working of the Constitution.	6
3	Politics in India: Structures and Processes- Party system: features and trends – major national political parties in India: ideologies and programmes. Coalition politics in India: nature and trends. Electoral process: Election Commission: composition, functions, role. Electoral reforms. 3. Role of business groups, working class, peasants in Indian politics, Role of (a) religion (b) language (c) caste (d) tribe. 5. Regionalism in Indian politics. 6. New Social Movements since the 1970s: (a) environmental movements (b) women’s movements (c) human rights movements.	6

4	Indian Political Thought- 1 Ancient Indian Political ideas: overview. 2. Kautilya: Saptanga theory, Dandaniti, Diplomacy. 3. Medieval political thought in India: overview (with reference to Barani and Abul Fazal). Legitimacy of kingship. 4. Principle of Syncretism, Modern Indian thought: Rammohun Roy as pioneer of Indian liberalism – his views on rule of law, freedom of thought and social justice. 6. Bankim Chandra Chattopadhyay, Vivekananda and Rabindranath Tagore: views on nationalism. 7. M.K. Gandhi: views on State, Swaraj, Satyagraha.	7
5	Comparative Government and Politics- Evolution of Comparative Politics. Scope, purposes and methods of comparison. Distinction between Comparative Government and Comparative Politics.	6
6	Perspectives on International Relations- Understanding International Relations: outline of its evolution as academic discipline. 2. Major theories: (a) Classical Realism and Neo-Realism (b) Dependency (c) World Systems theory. 3. Emergent issues: (a) Development (b) Environment (c) Terrorism (d) Migration. 4. Making of foreign policy. 5. Indian foreign policy: major phases: 1947-1962; 1962-1991; 1991-till date. 6. Sino-Indian relations; Indo-US relations.	7

Assessment Scheme:

Internal Assessment: Test 1-10 marks

Test 2-10 marks

Average- 10 marks

End Semester Examination:

Theory- 40 marks

Term work- 25 marks (10 marks for assignment, 10 marks for practical (in the form of debates) and 5 marks for attendance)

Course Code	Course Name	Credits
IL 475	Research Methodology	3

Objectives:

1. To understand Research and Research Process
2. To acquaint students with identifying problems for research and develop research strategies
3. To familiarize students with the techniques of data collection, analysis of data and interpretation

Outcomes: At the end of the course learner will be able to...

1. Prepare a preliminary research design for projects in their subject matter areas.
2. Accurately collect, analyse and report data.
3. Present complex data or situations clearly.
4. Review and analyse research findings.

Module	Detailed Contents	Hrs
1	<p>Introduction and Basic Research Concepts</p> <p>1.1 Research – Definition; Concept of Construct, Postulate, Proposition, Thesis, Hypothesis, Law, Principle. Assessment Scheme:

Internal:

Assessment consists of two tests out of which; one should be compulsory class test and the other is either.

a class test or at least 3 assignment on complete syllabus or course project.

End Semester Examination:

End Semester Theory Examination:

Some guidelines for setting up the question paper. Minimum 80% syllabus should be covered in question.

papers of end semester examination. **In question paper weightage of each module will be proportional**

to number of respective lecture hours as mentioned in the syllabus.

1. Question paper will comprise of total six question
2. All question carry equal marks
3. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only Four question need to be solved.

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 477	Cooking and Nutrition	Contact Hours	3	-	-	3
		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme							
		Theory Marks				Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam				
		IA 1	IA 2	Average					
IL 477	Cooking and Nutrition	40	40	40	60	-	-	-	100

1. Course Objectives:

The course is aimed to:

1. To understand nutrition and of health problems related to diet and various factors affect diet
2. To various statistical tools required to analyze the experimental data in nutrition and community research
3. Gain information about various food constituents, and changes that occur in them during food processing.
4. To gain food-related knowledge and skills so that they can organise and manage family resources effectively according to the needs and lifestyles of family members
5. To be able to make informed judgements and choices about the use of food available.
6. To create interest in the creative side and enjoyment of food and the skills necessary for food preparation and food preservation. And to be aware of relevant mandatory and other necessary safety and hygiene requirements

2. Course Outcomes:

On successful completion of course learner/student will be able to:

1. To understand the importance and mechanisms of the food components taking place during food processing,
2. To understand nutrition and of health problems related to diet and various factors affect diet
3. To aware how eating patterns and dietary needs depend on age and social group
4. Ability to assess the effectiveness and validity of claims made by advertisers
5. To enhance aesthetic and social sensitivity to dietary patterns and to develop an interest in the creative aspect and enjoyment of food
6. To develop skills necessary for food preparation and food preservation and knowledge of safety and hygiene requirements

3. Detailed Theory Syllabus:

Module No	Module	Detailed Contents of Module	Hrs.
1	Nutritional terms	Nutritional terms: proteins (high biological and low biological value), carbohydrates (monosaccharide, disaccharide and polysaccharide), fats, vitamins (A, C, D, E, K, B group – thiamin, riboflavin, nicotinic acid and cobalamin), mineral elements	3

		(calcium, iron, phosphorous, potassium, sodium, iodide) water Sources and uses of food energy. Sources and functions of dietary fibre.	
2	Kitchen equipment & Kitchen planning	Kitchen equipment & Kitchen planning: Selection, Use and care of: modern cookers, thermostatic control and automatic time-controlled ovens, microwave ovens, slow electric cook pots, refrigerators and freezers, small kitchen equipment, e.g. knives, pans, small electrical kitchen equipment, e.g. food processors, electric kettles, Advantages and disadvantages of microwave ovens, Organisation of cooking area and equipment for efficient work., Selection, Use and care of: work surfaces, flooring, walls and wall coverings, lighting, ventilation	4
3	Meal planning and guidelines	Meal planning and guidelines: Factors affecting food requirements, Planning and serving of family meals, Meals for different ages, occupations, cultures and religions, Special needs of: people with food allergies and intolerances, people with medical conditions linked to diet, such as diabetes, convalescents, vegetarians, including vegans and lacto-vegetarians, Meals for special occasions, festivals, packed meals, snacks, beverages, Use of herbs, spices and garnishes, Attractive presentation of food, Terminology describing recommended dietary intakes, e.g. Dietary Reference Value (DRV) and Reference Daily Intake (RDI).	6
4	Strategic cooking	Strategic cooking: Transfer of heat by conduction, convection and radiation. Principles involved in the different methods of cooking, baking, boiling, braising, cooking in a microwave oven, frying, grilling, poaching, pressure cooking, roasting, simmering, steaming, stewing, use of a slow cooker. Reasons for cooking food, Sensory properties of food (flavour, taste, texture), Effect of dry and moist heat on proteins, fats and oils, sugars and starches, and vitamins to include: caramelisation, coagulation dextrinization, enzymic and non-enzymic browning, gelatinisation, rancidity, smoking point, Preparation and cooking of food to preserve nutritive value, Economical use of food, equipment, fuel and labour.	6
5	Convenience foods and Basic proportions	Convenience foods and Basic proportions: Foods partly or totally prepared by a food manufacturer – dehydrated, tinned, frozen, ready-to-eat, Intelligent use of these foods, Advantages and disadvantages, Food additives – types and function, Packaging – types, materials used, Labelling – information found on labels, Importance of maintaining proportions, maintaining proportions for : Bakery products, melting, rubbing-in and whisking methods, Pastries – shortcrust, flaky and rough puff, Sauces – pouring and coating, roux and blended methods, Batters – thin (pouring) and coating, Sweet and savoury yeast products	5
6	Food preservation & Kitchen safety and first aid	Food preservation & Kitchen safety and first aid: Food preservation & Kitchen safety and first aid: Reasons for preserving food, Methods of preservation and an understanding of the principles involved: heating – canning, bottling; removal of moisture – dehydrating; reduction in temperature – freezing; chemical preservation – sugar, salt, vinegar; modified atmosphere packaging; irradiation;	5

		Awareness of potential danger areas in the kitchen. Safety precautions. First aid for burns and scalds, cuts, electric shock, fainting, shock.	
--	--	--	--

4. Theory Assessment:

- A. Internal Assessment (IA):** Two class tests of 40 marks each. The first class test is to be conducted when approx. 40% syllabus is completed and the second class test when an additional 35% syllabus is completed. Duration of each test shall be one hour.
- B. End Semester Theory Examination:** In question, paper weightage of each module will be proportional to the number of respective lecture hours as mentioned in the syllabus.
1. Question paper will consist of 3 questions, each carrying 20 marks.
 2. Question number 1 will be compulsory and based on maximum contents of the syllabus
 3. Remaining questions will be mixed in nature (for example, if Q.2 has part (a) from module 3 then part (b) will be from other than module 3)
 4. Total three questions need to be solved.

5. Books and References:

1. Fundamentals of Food and Nutrition by Tejmeet Rekhi, Heena Yadav
2. Food Process Engineering And Technology by Akash Pare, B L Mandhyan

Course Code	Course Name	Theory (Hrs.)	Practical (Hrs.)	Tutorial (Hrs.)	Theory (Credits)	Practical/ Oral (Credits)	Tutorial (Credits)	Total (Credits)
EC 491	Project-B	--	08	--	--	04	--	04

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Avg. of 2 Tests						
EC 491	Project-B	--	--	--	--	50	--	50	100	

Course Objectives:

1. To offer students a glimpse into real world problems and challenges that need Engineering based Solutions
2. To enable students to create very precise specifications of the Engineering solution to be designed.
3. To introduce students to the vast array of literature available of the various research challenges in the field of Electronics and Computer Science Engineering.
4. To create awareness among the students of the characteristics of several domain areas where Electronics and Computer Science Engineering can be effectively used.
5. To enable students to use all concepts in creating a solution for a problem
6. To improve the team building, communication and management skills of the students.

Course Outcomes: Upon successful completion of the course students will be able to

1. Discover potential research areas in the field of Electronics and Computer Science Engineering.
2. Conduct a survey of several available literatures in the preferred field of study.
3. Compare and contrast the several existing solutions for research challenge.
4. Demonstrate an ability to work in teams and manage the conduct of the research study.
5. Formulate and propose a plan for creating a solution for the research plan identified.
6. To report and present the findings of the study conducted in the preferred domain.

Guidelines:

1. Project Topic:

- To proceed with the project work it is very important to select a right topic. Project can be undertaken on any domain of Electronics and Computer Science Engineering programme. Research and development projects on problems of practical and theoretical interest should be encouraged.
- Project work must be carried out by the group of at least two students and maximum four and must be original.
- Students can certainly take ideas from anywhere, but be sure that they should evolve them in the unique way to suit their project requirements.
- The project work can be undertaken in a research institute or organization/company/any business establishment.
- Student must consult internal guide along with external guide (if any) in selection of topic.
- Head of department and senior staff in the department will take decision regarding selection of projects.
- Student has to submit weekly progress report to the internal guide and whereas internal guide has to keep track on the progress of the project and also has to maintain attendance report. This progress report can be used for awarding the term work marks.
- In case of industry projects, visit by internal guide will be preferred.

2. Project Report Format:

At the end of semester a project report should preferably contain at least following details:-

- Abstract
- Introduction
- Literature Survey
 - a) Survey Existing system
 - b) Limitation of the Existing system or research gap
 - c) Problem Statement and Objective
 - d) Scope
- Proposed System
 - a) Analysis/Framework/ Algorithm
 - b) Details of Hardware & Software
 - c) Design details
 - d) Methodology (your approach to solve the problem)
- Implementation Plan for next semester
- Conclusion
- References

3. Term Work:

Distribution of marks for term work shall be as follows:

- a) Weekly Attendance on Project Day
- b) Contribution in the Project work
- c) Project Report (Spiral Bound)
- d) Term End Presentation (Internal)

The final certification and acceptance of TW ensures the satisfactory performance on the above aspects.

4. Oral Exam:

Oral examination of Project-B should be conducted by Internal and External Examiners. Students have to give presentation and demonstration on the Project- B.

Bachelor of Technology
In
Electronics & Computer
Science
(Semester VIII)

Course Code	Course Name	Scheme	Theory	Practical	Tutorial	Total
IL 480	Digital Business	Contact Hours	3	-	-	3

		Internal Assessment			Average					
		IA 1	IA 2	Average						
IL 480	Digital Business Management and Digital Marketing	40	40	40	60	-	-	--	100	

Course Objectives:

1. To familiarize with digital business concepts.
2. To acquaint oneself with E-commerce.
3. To give insights into E-business and its strategies.
4. To understand digital marketing plans.

Course Outcomes: After completion of this course, learner will be able to

1. Identify drivers of digital business.
2. Illustrate various approaches and techniques for E-business and management.
3. Prepare an E-business plan.
4. Develop a digital marketing plan.

Module	Detail Content	Hrs.
1	Introduction to E-Business, Making Functional Areas E-Business Enabled : Value chain and supply chain, inter and intra organizational business processes, ERP	6
2	Making Functional Areas E-Business Enabled : E-marketing, E-Selling, E-Supply Chain Management, E-Procurement.	6
3	Technologies for E-Business: Internet and Web based system, Security and payment systems, Supply chain integration technologies: EDI, RFID, Sensors, IoT, GPS, GIS; Supply chain integration technologies: Web services and cloud.	8
4	Marketing concept, Coordinated marketing, Meta marketing, Holistic marketing dimensions, : Case Analysis, Case Discussion; Marketing Environment.	6
5	Marketing decisions, Customer delivered value, Buyer Behaviour, Input - output map, Case Discussion, Marketing Planning, Price, Distribution, Advertising and Promotion, Case Discussion.	8
6	Marketing mix, Product policy, New products, PLC, Marketing organization, Product Management.	5

Assessment:**Internal Assessment: 40 marks**

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Books/References:

1. Digital Business and E-Commerce Management, 6th Ed, Dave Chaffey, Pearson, August 2014.

5. NPTEL Course on Integrated Marketing Management;
https://onlinecourses.nptel.ac.in/noc24_mg27/preview
Refer Week 1 and Week 2 for Module 4; Week 3 and Week 4 for Module 5; and Week 5, Week 6 and Week 7 for Module 6.

Course Code	Course Name	Credits
IL 481	Medical Image Processing	3

Objectives:

1. To introduce the learners the basic theory of digital image processing.
2. To expose learners to various available techniques and possibilities of this field.
3. To prepare learners to formulate solutions to general image processing problems.

Outcomes:

Learner will be able to.

1. Record, extract and analyse key information about teeth, muscles, bones etc
2. Acquire the fundamental concepts of a digital image processing
3. Analyze images in the spatial and frequency domain.

Module	Detailed Contents	Hrs
1	Medical Imaging Systems: Properties, advantages and disadvantages of X-rays based imaging systems, Magnetic Resonance Imaging (MRI) imaging, Gamma-rays based imaging systems, Positron emission tomography (PET), Single-photon emission computerized tomography (SPECT) scan, Computed Tomography (CT) scan, Ultrasound (sonography), Endoscopy, and Thermography based imaging systems. Difference between different medical imaging systems. Nature of Biomedical images, Objectives of biomedical image analysis, Difficulties in biomedical image acquisition and analysis.	7
2	Medical Imaging Toolkits: ImageJ (and/or FIJI), ITK-Snap, SimpleITK, MITK, FreeSurfer, SLICER, OsiriX. Image Formats: dicom (.dcm), Nifti (.nii), Minc (.mnc), Analyze (img/hdr), Raw (.raw), MHD (.mhd) and MHA (.mha)	5
3	Medical Image Detection and Recognition: Medical image parsing, Deep Learning for Medical Image Recognition, Automatic Interpretation of Carotid Intima–Media Using Convolutional Neural Networks, Deep Cascaded Networks for Sparsely Distributed Object Detection, Deep Voting and Structured Regression for Microscopy Image Analysis.	6
4	Medical Image Registration: Intensity-based methods, Cost functions - correlation, least squares, mutual information, robust estimators. Optimization techniques - fixed-point iteration, gradient descent, Nelder-Mead simplex method. MRI motion compensation, Convolutional Neural Network for Robust and Real-Time 2-D Registration..	6
5	Medical Image Segmentation Networks: Comparative study and analysis of U-Net family of segmentation: U-Net, V-Net, 3D U-Net, H-DenseUNet, GP-Unet, UNet++, MDU-Net, DUNet, RA-UNet, nnU-Net, SUNet, IVD-Net, LADDERNET, Attention U-Net, R2U-Net, MultiResUNet, U-NetPlus, CE-Net, CIA-Net, U2-Net, ScleraSegNet, AHCNet, MFP-Unet, ResUNet-a, RAUNet, 3D U2-Net, SegNAS3D, U ² -Net, UNET 3+.	9
6	Deep Learning for Healthcare: Deep learning for different healthcare applications: Diabetic Retinopathy, Knee Osteoarthritis, Histological and Microscopic Elements	6

Detection, Gastrointestinal Diseases Detection, Cardiac Imaging. Lesion detection: Brain tumor detection, prostate lesion detection, Lung nodule detection.

Assessment Scheme:

Internal Assessment:

End Semester Examination:

Course Code	Course Name	Credits
IL 482	Technologies for Rural Development	3

Objectives:

1. To understand the nature and characteristics of rural resources and its importance in Rural Development.
2. To understand various technologies required for Rural Development

Outcomes: Learner will be able to...

1. Understand various natural resources and their importance in rural development.
2. Get exposure to various challenges and problems with regard to availability and use of natural resources.
3. Develop and implement various technologies for rural development
4. Explore various schemes for rural development

Module	Detailed Contents	Hrs
1	Nature and Characteristics of Rural Resources: Land Resources, water Resources, Living Resources, Human Resources Definition and meaning of Resources, Types of Rural Resources, Natural and Man-made, Characteristics of Resources, Importance of different resources in Rural Development.	8
2	Concept of Information and Communication Technologies (ICT's) Evolution of ICT's, Communication Functions of ICT's, Nature and Scope of ICT's, Information Haves and Information Have Nots in the Rural Areas, Strengths and Weaknesses of ICT's in Rural India, Application of ICT's for Rural Development in India, Management Information System for Rural Development in India, Success Stories relating to ICT's for Rural Development (Andhra Pradesh, Tamil Nadu, Kerala and Karnataka Experiments), Satellite Communication support for Rural Development, Telecommunication support for Rural Development, Computer Communication support for Rural Development	10
3	Crop production technology /Processing Plants for major cereal crops viz., paddy, wheat, maize, pearl millet, sorghum, etc.; Major varieties, sowing time, method of sowing, spacing, inter culturing, fertilizer and water requirement, time of harvest, maturity index, yield potential, cost of cultivation, income from production, etc. Rural Energy system Technologies for Water treatment	8
4	The Role of Rural Technology – Need & importance of rural Technology, appropriate rural Technology, Technology for Rural Women, difficulties in adoption of rural technology.	6
5	Globalisation of Rural Economy- Globalisation and aims and objectives; Impact of Globalisation on rural economy, Contract farming, corporate farming, SEZ's and Agriculture. Agricultural value chain	6

6	Government Schemes, initiatives and participation of various Stake holders for development and Protection of Rural resources	4
---	--	---

Assessment Scheme:

Internal Assessment:

End Semester Examination:

6. W.T.O and Indian Economy by Deogirakar, A. B. Jaipur: Shri Niwas Publications, 2004

Course Code	Course Name	Credits
IL 483	Economics	3

Objectives:

1. Provide a good grounding in the basic concepts of Micro and Macroeconomics.
2. Familiarize learners with concept of demand, supply, price, income and equilibrium.
3. Teach students to represent Indifference curve in regular as well as in exceptional cases with respect to consumer behaviour, consumer preferences and Risk Aversion.
4. To inculcate the skills required to understand the concept of Production function with single and two variable inputs.
5. To create an awareness of the different market structures and its impact on the price and output of a product.
6. To prepare the learners in understanding the Keynesian System of Money, Interest and Income and its impact in society with respect to Inflation.

Outcomes: Learner will be able to...

1. Acquire conceptual and theoretical knowledge of Micro and Macroeconomics and learn to think critically about issues and topics of the subject.
2. Demonstrate the understanding of the concepts of demand, supply, price, income and equilibrium and relate it to the existing scenario in the society.
3. Perform successfully in representing the Indifference curve in relation to the prevalent consumer behaviour and consumer preferences.
4. Illustrate the skills required for maximising output and minimising cost for effective production.
5. Determine the importance of the existence of different market structures and its impact in society.
6. Develop an understanding of the Keynesian System of Money, Interest and Income and formulate anti- inflationary policies.

Module	Detailed Contents	Hrs
1	Introduction to Micro and Macro Economics	5
2	Demand & Supply: Concept of demand & supply functions, Price, Income & Cross elasticities of demand, Elasticity of Supply, Market demand functions, Concept of equilibrium, Impact of changes in demand & supply on equilibrium	7
3	Theory of Consumer Behaviour: Concept of cardinal and ordinal utility, consumer's equilibrium, Consumer's preferences, Risk Aversion and Indifference Curve Analysis, & its properties, Shapes of Indifference Curves in exceptional cases	7
4	The Theory of Production: Concept of Production function, Production with a single variable input, Production with two variable inputs, Optimal input combination, Constrained output maximization, Cost minimization, Elasticity of substitution	6
5	Theory of Cost: Different concept of cost, Short-run and Long- run cost analysis, modern concept. Market Structures a. Perfect Competition Short-run and long-run equilibrium of the firm and Industry, Stability of equilibrium, Concept of imperfect competition; short run and long run price and output decisions of a monopoly firm;	4

	concept of a supply curve under monopoly; comparison of perfect competition and monopoly,	
6	The Keynesian System: Money, Interest and Income Money in the Keynesian theory, Interest Rate Determination (Liquidity Preference Theory), Money Market, Bond market and Commodity Market, Monetary policies and fiscal policies, Inflation and Unemployment Inflation, Role and Effects of inflation, Anti- inflationary policies	7

Assessment Scheme:

Internal Assessment: Test 1-10 marks
Test 2-10 marks
Average- 10 marks

End Semester Examination: Theory- 40 marks
Term work- 25 marks (10 marks for assignment, 10 marks for practical (in the form of debates) and 5 marks for attendance)

Course Code	Course Name	Credits
IL 484	GIS and Remote Sensing	3

Objectives:

1. To gain basic understanding of GIS and remote sensing techniques
2. To understand basic software such as QGIS used for GIS analysis
3. To understand various GIS data sources, their processing and interpretation
- 4.

Outcomes: Learner will be able to...

1. Know and apply GIS and remote sensing concepts to real world problems
2. Learner will become proficient in using Python and QGIS to conduct geospatial analysis

Prerequisites: Knowledge of Python or other software programming language

Module	Detailed Contents	Hrs
1	Introduction to GIS Mapping. GIS Data models and modelling, Maps and Databases, GIS data types (vector, raster etc), Geographic coordinate systems,	10
2	Introduction to QGIS software, GIS data sources, Digitizing data, Georeferencing.	10
3	Spatial Analysis techniques vector and raster analysis and tools.	20
4	Satellite images, electromagnetic energy and remote sensing, satellites and sensors, arial cameras, surveys using drones, multispectral scanners, LIDAR.	10
5	Applications of GIS in industry, governments, NGOs etc	10

Assessment Scheme:

Internal Assessment: Course will have 6 take home assignments worth 10% of the final grade

End Semester Examination: Will have a final exam worth 40% of the final grade

References:

Course Code	Course Name	Credits
IL 485	Physical Education, Fitness & Sports	4

Objectives:

1. To understand the components of Physical Fitness.
2. To understand the modern development and social aspects of physical education
3. To understand general troop games, recreational games and the importance of playing to achieve health & wellness.
4. To acquaint students with principles of nutrition and the application of human energy.
5. To understand the role of food in physical performance.
6. To understand the need for wellness & weight management.
7. To understand common sports injuries, first aid & their treatment.
8. To understand the application of Yoga in physical education & sports.
9. To enable the student to understand the basic structure & function of the human body and the effect of exercise on the body as a whole.

Outcomes: Learner will be able to...

1. Maintain a health-enhancing level of fitness throughout the program as well as be able to collect and analyse personal fitness data.
2. Gain knowledge regarding the application of yoga to Physical Education and Sports
3. Understand the anatomy and Physiology of Asanas and Pranayamas.
4. Acquire the knowledge regarding the effect of exercise on the body as a whole
5. Develop an understanding of the concept of personality, factors affecting personality development
6. To understand proportional body weights and their management
7. To understand nutrition and balance diet

Module	Detailed Contents	Hrs
1	Physical Fitness 1.1 Concept, definition and meaning of Physical fitness, activity and exercise 1.2 Component of Physical fitness, Benefit of Physical fitness & exercise. 1.3 Principles of physical fitness 1.4 Definition and concept of wellness and factors affecting Physical fitness & wellness 1.5 Concept and importance of physical conditioning, warming up and cooling down of all age groups	8
2	Nutrition and Dietary Requirement 2.1 Nutrition components and balanced diet 2.2 Meaning and definition of doping and ergogenic aids 2.3 Prevention and first-aid of common injuries during Physical training 2.4 Need of Energy, Carbohydrate and Protein 2.5 Concept training nutrition and competition nutrition	6
3	Wellness, Weight management and Holistic health 3.1 Meaning, concept and components of Wellness 3.2 Manipulation of energy balance to induce weight loss and weight gain 3.3 Methods of weight management 3.4 Concept, types and cause of obesity and its management.	6

	3.5 Waist hip ratio, larger heart, BMI, calculation of Training Heart Rate	
4	Human body system, function and effect of exercise 4.1 Meaning and Importance of the study of Human anatomy in physical education & sports 4.2 Classification and functions of bones and joints 4.3 Movements of various joints 4.4 Structural classification of muscle, types of muscle and effect of exercise on the musculoskeletal system. 4.5 Structure and Effect of exercise on the cardiorespiratory system 4.6 Digestion and effect of exercise on the digestive system 4.7 Nervous system and effect of exercise on the nervous system.	6
5	Yoga and meditation 5.1 Concept of Yoga and misconception about Yoga 5.2 Comparison of Physical Education exercise and Yogic exercise. 5.3 Meaning, Types and principles of Meditation 5.4 Principles governing various exercises in Yoga(Asana, Pranayam, Bandha, Mudra, Kriya) 5.5 Yoga for stress management and emotional stability 5.6 Application of Yoga in sports & physical education and effect of Yogic exercise on different systems of the human body.	8
6	General & recreational troop games and its method of skill training 6.1 The game soccer and its rules and regulation 6.2 The game Volleyball, Basketball and its rules and regulations 6.3 The Indoor games and their rules and regulations 6.4 Method of sports skill developing training 6.5 Recreational games and their importance in day to day life	6

Assessment Scheme:

1. Term Papers(40 Marks):

Two theory papers will be conducted for 40 marks each with average marks of both papers as the final score. One hour theory paper as per the pattern of the semester-end examination will be conducted.

2. Projects/Assignments(30 Marks):

Project on Nutrition (10 Marks): The learner will be given one project on the calculation of Basel metabolic rate. He /she will submit the report of the same in a prescribed format based on which the learner will be evaluated for 10 marks by the concerned teacher/s

Projects/Assignment on Yoga education (10 Marks): The learner will be given an assignment on yoga education such as gathering/compiling the information about the various aspects of asanas and asking to prepare and submit the report of the same based on which the concerned subject teacher will give marks out of 10.

Assignments on Sports Injuries (10 Marks): The learner will be given two assignments on the specific sports injuries and their remedial aspects based on the report submitted in the prescribed format by him/her as well as observations, the concerned teacher/s will give marks out of 10.

3. Physical Activities(25 Marks):

- a. To perform 8 Asanas in a group (10)
- b. To perform one Pranayama and one Kriyas(5)

c. To perform any five exercises of Motor Fitness. (5)

d To perform any five exercises of HRPF(5)

4. Trekking/ Hiking (05 Marks)- The learner should be provided experience of participating in the organization and the actual conduct of the co-curricular activities viz. Hiking/Trekking and the assessment of 05 marks should be done based on learners actual participation and involvement in the same.

		Credits	3	-	-	3

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal Assessment			End Sem Exam					
		IA 1	IA 2	Average						
IL 486	Environmental Management	40	40	40	60	-	-	--	100	

Objectives:

1. To promote the safety, health, and welfare of people and the environment through engineering professionals.
2. To encourage students to be productive and contributing members of the environmental profession as practitioners, entrepreneurs, researchers, or teachers.
3. To develop environmental awareness among students that meet specified engineering needs with consideration of public health, safety, and welfare, as well as global, environmental, and legal factors.

Outcomes: On successful completion of the course learner/student will be able to:

1. Understand core concepts and methods from ecological sciences and their application in environmental problem-solving.
2. Recognize different types of toxic substances and analyze toxicological information
3. Acquire and apply environmental knowledge to the engineering field as needed.
4. Assist industries and projects in obtaining environmental clearance and compliance with other environmental laws.
5. Interpret appropriate environment-related legislation.
6. Develop a thorough understanding of practice and procedure followed by various enforcing agencies/bodies/countries.

Module	Detail Contents	Hrs.
1	Fundamentals of Environmental Sciences Definition, Principles, and Scope of Environmental Science. Structure and composition of the atmosphere, hydrosphere, lithosphere, and biosphere. Concept of Ecology- Ecosystem, Food chain, Food web, Ecological pyramid, Ecological succession, limiting factor, and carrying capacity. Global Environmental Concerns (Global warming, Loss in Bio-diversity, Ozone depletion, E-waste management) and Renewable Energy Resources (Solar Energy, Wind Energy, Hydrothermal Energy, etc.)	8
2	Environmental Chemistry Toxic chemicals: Pesticides and their classification and effects. Biochemical aspects of heavy metals (Hg, Cd, Pb, Cr) and metalloids (As, Se), Sewage treatment, Concept of DO, BOD, and COD. Composition of air-chemical processes in the formation of inorganic and organic particulate matter, Thermochemical and	8

	photochemical reactions in the atmosphere, Oxygen and Ozone chemistry. Photochemical smog, Air Quality Index	
3	Fundamentals of Environmental Management Concept of Environmental Management, Need & Objective of Environmental Management, Role of Engineers in Environmental Management, Career Opportunities. The need for sustainable development, Sustainable Development Goals	5
4	Scope of Environmental Management Role and functions of Government as a planning and regulatory agency. Environment Quality Management and Corporate Environmental Responsibility. Total quality Environmental management: ISO 14000, EMS Certification. Environmental Management System Standards (ISO-14000 series). Environment and Social Management Plan	7
5	Overview of Environmental Laws in India Constitutional provisions in India (Articles 48A and 51A). Wildlife Protection Act, 1972 Indian Forest Act, Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environmental (Protection) Act, 1986, The e-waste (Management) Rules 2016	5
6	Environmental Conventions and Agreements Stockholm Conference on Human Environment 1972, Montreal Protocol, 1987, Earth Summit at Rio de Janeiro, 1992, Agenda-21, Convention on Biodiversity (1992), UNFCCC, Kyoto Protocol, 1997, Copenhagen Summit, Paris Agreement, CITES.	6

Assessment:

Internal Assessment: 40 marks

1. Consisting of One Compulsory Class Tests of 40 Marks
2. Continuous evaluation: Class Test/ Assignments / Quiz/ Case studies/ Seminar presentation of 40 Marks

End Semester Examination: 60 marks

Weightage of each module in the end semester examination will be proportional to the number of respective lecture hours mentioned in the syllabus.

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		Test1	Test 2	Average						
EC 492	Project C	--	--	--	--	50	--	100	150	

Course Objectives:

1. To offer students a glimpse into real world problems and challenges that need Engineering based Solutions
2. To enable students to create very precise specifications of the Engineering solution to be designed.
3. To introduce students to the vast array of literature available of the various research challenges in the field of Electronics and Computer Science Engineering.
4. To create awareness among the students of the characteristics of several domain areas where Electronics and Computer Science Engineering can be effectively used.
5. To enable students to use all concepts in creating a solution for a problem
6. To improve the team building, communication and management skills of the students.

Course Outcomes:

1. Discover potential research areas in the field of Electronics and Computer Science Engineering.
2. Conduct a survey of several available literatures in the preferred field of study
3. Compare and contrast the several existing solutions for research challenge
4. Demonstrate an ability to work in teams and manage the conduct of the research study.
5. Formulate and propose a plan for creating a solution for the research plan identified
6. To report and present the findings of the study conducted in the preferred domain

Lab Assessment:

Guidelines:

1. Project Report Format:

At the end of the semester the student needs to prepare a project report which should be prepared as per the guidelines issued by the ECS Department. Along with the project report a

CD containing: project documentation, Implementation code, required utilities, Software's and user Manuals need to be attached.

2. Term Work:

Students have to submit a weekly progress report to the internal guide and the internal guide has to keep a track on the progress of the project and also has to maintain the attendance report. This progress report can be used for awarding the term work marks. In case of industry projects, visits by internal guide will be preferred to get the status of the project. Distribution of marks for term work shall be as follows:

- a) Weekly Attendance on Project Day
- b) Project work contributions as per objective
- c) Project Report (Hard Bound)
- d) Term End Presentation (Internal)

The final certification and acceptance of TW ensures the satisfactory performance on the above aspects.

3. Oral Exam:

Oral examination of Project-C should be conducted by Internal and External Examiners. Students have to give a presentation and demonstration on the Project- C.

EC 493	Internship	-	16	-	-	8	-	8

Course Code	Course Name	Examination Scheme								
		Theory Marks					Term Work	Practical	Oral	Total
		Internal assessment			End Sem. Exam					
		1	2	Avg						
EC 493	Internship	50	50	50	-	50	-	100	200	

Course Description:

Provides the student with an opportunity to gain knowledge and skills from a planned work experience in the student's chosen career field. Internships or placements are directly related to the student's program of study and provide learning experiences not available in the classroom setting. Internships provide entry-level, career-related experience, and workplace competencies that employers value when hiring new employees. Internships may also be used as an opportunity to explore career fields.

1. Course Objectives: The course is aimed:

- To provide an opportunity to apply theoretical knowledge and skills into practice.
- To offer firsthand experience with cutting-edge technologies utilized in industry, research labs, and startup environments.
- To develop networking with professionals while learning new skills.
- To familiarize students with the code of conduct, organizational work ethics and environment.

2. Course Outcomes: On successful completion of the course learner/student will be able to:

- Gain exposure to real-world organizational scenarios and attain hands-on experience within a professional setting.
- Develop expertise in various business or industry skills relevant to the internship or placement field.
- Enhance professional communication skills through written, verbal, and non-verbal methods.
- Refine and clarify professional and career goals through critical analysis of the internship experience
- Recognize their individual educational requirements to stay competent in an evolving world.
- Acquire the capability to function effectively as a team member or leader.

3. Guidelines regarding Internship:

- To get hands-on experience of the real world, every candidate is required to undertake an individual internship in an organization of repute. The duration of the Internship will be a minimum of 14 weeks to a maximum of 20 weeks.
- The internship duration /slot will start immediately after completion of semester VII examinations and it will end on the last instructional date of semester VIII (as per the academic calendar).

3. All students enrolled in semester VII must submit the Application Form in the prescribed format to the Internship Cell/ Internship Coordinator at least a month before the last instructional day of semester VII
 4. Students shall submit an implementation plan in the form of a Gantt/PERT/CPM chart, which will cover the weekly activity of the internship.
 5. In the case of an internship offered through the college selection process, the student is eligible for only one offer and cannot appear for further process once selected.
 6. The applications will be scrutinized by the internship approval committee at the college /department level for their merit. The decision of the committee will be final and further grievances will not be entertained.
 1. The college will assign a mentor for each student who will monitor the student's progress throughout the internship. The students are expected to be in contact with the mentor on a regular basis.
 2. Students can join an internship only after getting an approval from the internship-committee.
 3. In case any student attempts to join an internship bypassing college procedure, it will not be considered for credit completion of semester VIII and hence for award of the B.Tech degree.
 7. Faculty Internship Advisor or Internship Education Program Advisor may give input to students during an internship, however, the focus shall be on self-learning by the student.
 8. A log book to be prepared by each student, wherein students can record weekly work progress, faculty Internship Advisor can verify and record notes/comments.
 9. Students should make an Internship report as per the format provided.
4. **Suggested Internships Categories:** The following are the suggested categories of valid Internships:
1. Industrial Internship- Private, Public, LLP or Start-up company
 2. Incubation center - Under start-up or pre-incubation registered with Incubation center, Innovation / Entrepreneurship related activities.
 3. Government Sector - BSNL, BEL, BHEL, ONGC, GMRT, Railways, etc..
 4. Government Research organization - IIT, NIT's, IITM, IISR, DIAT, ISRO, TIFR etc..
 5. Research lab - NCL, CSIR, CME, CPR, HEMRL, DRDO, Police Research Centre etc..
 6. Institutional Internship through UGROP.
 7. Internships other than UG project work offered by PI/CoPI of any Research project, live Industry projects, different technical activity clubs, learning at departmental Lab/ Tinkering Lab/ Institutional workshop, etc..

5. Internship Attendance Guidelines:

1. Students are required to report to work on time and must adhere to the requirements outlined in their individualized work schedule.
2. Students are required to follow the attendance policies set by the employer and are expected to inform the Faculty Internship Advisor in case of any absence from work.
3. Students are expected to adhere to their work schedule and report to work even when the employer operates during college holidays.

6. Internship Report Format:

At the end of the semester the Internship report should preferably contain at least the following details:

1. Introduction

- 1.1 About the Organization
- 1.2 About the Internship
- 1.3 Purpose of Internship
- 1.4 Scope and Objectives of Internship
- 1.5 Roles and Responsibility
- 1.6 Organization of the Internship Report

2. Internship Activities

- 2.1 Responsibilities and Tasks Assigned
- 2.2 Weekly Overview of Internship Activities
- 2.3 Work Accomplishments
- 2.4 Details of Work Carried Out and its Evidence
- 2.5 Challenges Faced
- 2.6 Achievements and Benefits to the Company/Society

3. Learning through Internship

- 3.1 Technology & Tools Used
- 3.2 Methodology Adopted
- 3.3 Skills Acquired/Enhanced

4. Conclusion

- 4.1 Summary of Key Points
- 4.2 Overall Internship Experience

Bibliography

7. Internship Evaluation Guidelines:

The institute shall ask the Internship offering Organization to allocate a mentor to the students to monitor and update the progress of the student and undertake a groundwork to make the internship more effective. The institute (concerned department) will allocate an internal faculty mentor to the students. The faculty mentor will undertake a continuous evaluation of the students and will be responsible for the submission of his/her grades. The interactions may be through Email/Skype/Video Conferencing. etc. or a personal visit by a faculty mentor to the internship site, as the need be or the policy of the institute. The student needs to submit the internship joining report duly signed by the mentor from the organization and the mentor from the institute to the department within two weeks from the commencement of the internship.

A. Average of Two Internal mock assessment: 50 marks

which includes:

- a. Attendance: **15 Marks**
- b. Weekly log report: **15 Marks**
- c. Presentation (as per defined rubrics/parameters): **20 Marks**

B. Suggested distribution of Term Work of 50 marks for internship shall be awarded based on:

- Quality of internship report : **30 marks**
- Quality of work carried out during Internship and presentation: **20 marks**

C. Suggested distribution of Oral/Practical of 100 marks for internship shall be awarded based on:

- Evaluation/Feedback by industry/employer and final presentation: **30 marks**
- Evidence and demonstration of learning: **10 Marks**
- Depth of knowledge, technology used and skills acquired during Internship: **20 marks**
- Quality of work carried out, achievements and benefits to the company/society: **20 marks**
- Effectiveness of presentation and response to question(s): **20 marks**
